**The Influence of Sea Power Upon History, 1660-1783** A. T. Mahan, 2016-08-26 The definite object proposed in this work is an examination of the general history of Europe and America with particular reference to the effect of sea power upon the course of that history Historians generally have been unfamiliar with the conditions of the sea having as to it neither special interest nor special knowledge and the profound determining influence of maritime strength upon great issues has consequently been overlooked This is even more true of particular occasions than of the general tendency of sea power It is easy to say in a general way that the use and control of the sea is and has been a great factor in the history of the world it is more troublesome to seek out and show its exact bearing at a particular juncture Yet unless this be done the acknowledgment of general importance remains vague and unsubstantial not resting as it should upon a collection of special instances in which the precise effect has been made clear by an analysis of the conditions at the given moments A curious exemplification of this tendency to slight the bearing of maritime power upon events may be iv drawn from two writers of that English nation which more than any other has owed its greatness to the sea Twice says Arnold in his History of Rome Has there been witnessed the struggle of the highest individual genius against the resources and institutions of a great nation and in both cases the nation was victorious For seventeen years Hannibal strove against Rome for sixteen years Napoleon strove against England the efforts of the first ended in Zama those of the second in Waterloo Sir Edward Creasy quoting this adds One point however of the similitude between the two wars has scarcely been adequately dwelt on that is the remarkable parallel between the Roman general who finally defeated the great Carthaginian and the English general who gave the last deadly overthrow to the French emperor

Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

The Influence of Sea Power Upon History 1660-1783 by A. T. Alfred Thayer Mahan. The history of Sea Power is largely, though by no means solely, a narrative of contests between nations of mutual rivalries of violence frequently culminating in war. The profound influence of sea commerce upon the wealth and strength of countries was clearly seen long before the true principles which governed its growth and prosperity were detected. To secure to one's own people a disproportionate share of such benefits, every effort was made to exclude others, either by the peaceful legislative methods of monopoly or prohibitory regulations, or when these failed, by direct violence. The clash of interests, the angry feelings roused by conflicting attempts thus to appropriate the larger share, if not the whole, of the advantages of commerce and of distant unsettled commercial regions, led to wars. On the other hand, wars arising from other causes have been greatly modified in their conduct and issue by the control of the sea. Therefore, the history of sea power, while embracing in its broad sweep all that tends to make a people great upon the sea, or by the sea, is largely a military history, and it is in this aspect that it will be mainly, though not exclusively, regarded in the following pages. A study of the military history of the past, such as this is enjoined by great military leaders as essential to correct ideas and to the skilful conduct of war in the future. Napoleon names among the campaigns to be studied by the aspiring soldier those of Alexander, Hannibal, and Caesar, to whom gunpowder was unknown, and there is a substantial agreement among professional writers that while many of the conditions of war vary from age to age with the progress of weapons, there are certain teachings in the school of history which remain constant and being therefore of universal application, can be elevated to the rank of general principles. For the same reason, the study of the sea history of the past will be found instructive by its illustration of the general principles of maritime war, notwithstanding the great changes that have been brought about in naval weapons by the scientific advances of the past half century, and by the introduction of steam as the motive power. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand-curated by our staff. Our philosophy has been guided by a

desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience      **Going Deep** Lawrence Goldstone, 2017-06-06 The controversial history of the attack submarine and the story of its colorful creator John Philip Holland that reveals how this imaginative invention changed the face of modern warfare From Twenty Thousand Leagues Under the Sea to The Hunt for Red October readers the world over have demonstrated an enduring fascination with travel under the sea Yet the riveting story behind the invention of the submarine an epic saga of genius persistence ruthlessness and deceit is almost completely unknown Like Henry Ford and the Wright brothers John Philip Holland was completely self taught a brilliant man raised in humble circumstances earning his living as a schoolteacher and choirmaster But all the while he was obsessed with creating a machine that could successfully cruise beneath the waves His struggle to unlock the mystery behind controlled undersea navigation would take three decades during which he endured skepticism disappointment and betrayal But his indestructible belief in himself and his ideas led him to finally succeed where so many others had failed Going Deep is a vivid chronicle of the fierce battles not only under the water but also in the back rooms of Wall Street and the committee rooms of Congress A rousing adventure surrounded by an atmosphere of corruption and greed at its heart this a story of bravery passion and the unbreakable determination to succeed against long odds      *Red Star over the Pacific, Second Edition* Toshi Yoshihara, James Holmes, 2018-12-15 Combining a close knowledge of Asia and an ability to tap Chinese language sources with naval combat experience and expertise in sea power theory the authors assess how the rise of Chinese sea power will affect U S maritime strategy in Asia They argue that China has laid the groundwork for a sustained challenge to American primacy in maritime Asia and to defend this hypothesis they look back to Alfred Thayer Mahan s sea power theories now popular with the Chinese The book considers how strategic thought about the sea shapes Beijing s deliberations and compares China s geostrategic predicament to that of the Kaiser s Germany a century ago It examines the Chinese navy s operational concepts tactics and capabilities and appraises China s missile force The authors conclude that China now presents a challenge to America s strategic position of such magnitude that Washington must compete in earnest      **The Influence of Sea Power Upon History, 1660-1783, by Captain A.T. Mahan ...** Alfred Thayer Mahan, 1889      *The Palgrave Handbook of Presidents and Prime Ministers From Cleveland and Salisbury to Trump and Johnson* Michael Patrick Cullinane, Martin Farr, 2022-01-13 This handbook examines the personal relationships between American presidents and British prime ministers It aims to determine how personal diplomacy shaped the Anglo American relationship and whether individual leaders made the relationship special From the great rapprochement of the 1890s to the Cold War and contemporary transatlantic rapport the Anglo American relationship has been one of global significance making presidents and prime ministers central to international security trade and commerce culture and communication Naturally it explores the ideas and convictions of presidents and prime ministers the political parties they led as well as the political images

constructed in the media and how the aura of the Anglo American relationship might differ from the reality With a deeper understanding of these political leaders and the relationship they forge with their counterparts we come that much closer to appreciating the dynamics of transatlantic statecraft

The Geopolitics of Cyberspace Shaun Riordan,2019-09-02 In *The Geopolitics of Cyberspace A Diplomatic Perspective* Riordan explores the extent to which the key concepts of classical and critical Geopolitics can be applied to cyberspace and how they might explain the behaviour of key state and non state actors Case studies seek to apply both kinds of geopolitical analysis to the US Russia China the EU and internet companies discussing what it can tell us about their past and future behaviour Riordan then explores the implications for both the theory and especially the practice of diplomacy in relationship to cyberspace He argues that foreign ministries and diplomatic services need to reform both their culture and structures to engage successfully with the challenges posed by cyberspace Underlying the article is an attempt to rescue both diplomacy and geopolitics from popular usages that risk emptying both concepts of meaning

*Written on the Water* Samuel Baker,2010-07-08 The very word culture has traditionally evoked the land But when such writers as William Wordsworth Samuel Taylor Coleridge Lord Byron and later Matthew Arnold developed what would become the idea of modern culture they modeled that idea on Britain's imperial command of the sea Instead of locating the culture idea's beginnings in the dynamic between the country and the city Samuel Baker insists on taking into account the significance of water for that idea's development For the Romantics figures of the island the deluge and the sundering tide often convey the insularity of cultures understood to stand apart from the whole yet Baker writes the sea also stands in their poetry of culture as a reminder of the broader sphere of circulation in which the poet's work if not the poet's subject inheres Although other books treat the history of the idea of culture none synthesizes that history with the literary history of maritime empire *Written on the Water* tracks an uncanny interrelationship between ocean imagery and culturalist rhetoric of culture forward from the late Augustans to the mid Victorians In so doing it analyzes Wordsworth's pronounced ambivalence toward the sea Coleridge's sojourn as an imperial functionary in Malta Byron's cosmopolitan seafaring tales and Arnold's dual identity as poet of water and prose arbiter of culture It also considers Romanticism's classical inheritance arguing that the Lake Poets dissolved into the idea of culture the Virgilian system of pastoral georgic and epic modes of literature and life This compelling new study will engage any reader interested in the intellectual and literary history of Britain and the lived experience of British Romanticism

**Geographies of Mars** K. Maria D. Lane,2010-12-15 One of the first maps of Mars published by an Italian astronomer in 1877 with its pattern of canals fueled belief in intelligent life forms on the distant red planet a hope that continued into the 1960s Although the Martian canals have long since been dismissed as a famous error in the history of science K Maria D Lane argues that there was nothing accidental about these early interpretations Indeed she argues the construction of Mars as an incomprehensibly complex and engineered world both reflected and challenged dominant geopolitical themes during a time of major cultural intellectual political and economic

transition in the Western world Geographies of Mars telescopes in on a critical period in the development of the geographical imagination when European imperialism was at its zenith and American expansionism had begun in earnest Astronomers working in the new observatories of the American Southwest or in the remote heights of the South American Andes were inspired Lane finds by their own physical surroundings and used representations of the Earth s arid landscapes to establish credibility for their observations of Mars With this simple shift to the geographer s point of view Lane deftly explains some of the most perplexing stances on Mars taken by familiar protagonists such as Percival Lowell Alfred Russel Wallace and Lester Frank Ward A highly original exploration of geography s spatial dimensions at the beginning of the twentieth century Geographies of Mars offers a new view of the mapping of far off worlds      **Dubious Battles** John Arquilla,2017-09-29 Why do leaders initiate wars they are destined to lose This study shows that imperfect understanding of land sea wars was at the root of defeats for leaders from Louis XIV to Saddam Hussein      *Global Challenges in the Arctic Region* Elena Conde,Sara Iglesias Sánchez,2016-08-05 Bringing together interconnected discussions to make explicit the complexity of the Arctic region this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national regional and international level One of the intrinsic features of the region is the difficulty in the determination of boundaries responsibilities and interests Against this background sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and at the same time influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region This perspective lays the ground for further discussion revolving around the main clusters of governance focusing on the Arctic Council and the European Union with the particular roles and interest of Arctic and non Arctic states and the impact on indigenous populations environment including the relevance of national regulatory schemes and the intertwinement with concerns related to energy or migration strategy concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors and covering security and climate change related challenges This collection provides an avenue for parallel and converging research of complex realities from different disciplines through the expertise of scholars from different latitudes
