Infoaged 80 Glimpses Of The Nineties:

The Apple II Age Laine Nooney,2023-05-09 An engrossing origin story for the personal computer showing how the Apple II's software helped a machine transcend from hobbyists plaything to essential home appliance Skip the iPhone the iPod and the Macintosh If you want to understand how Apple Inc became an industry behemoth look no further than the 1977 Apple II Designed by the brilliant engineer Steve Wozniak and hustled into the marketplace by his Apple cofounder Steve Jobs the Apple II became one of the most prominent personal computers of this dawning industry The Apple II was a versatile piece of hardware but its most compelling story isn't found in the feat of its engineering the personalities of Apple's founders or the way it set the stage for the company's multibillion dollar future Instead historian Laine Nooney shows what made the Apple II iconic was its software In software we discover the material reasons people bought computers Not to hack but to play Not to code but to calculate Not to program but to print The story of personal computing in the United States is not about the evolution of hackers it's about the rise of everyday users Recounting a constellation of software creation stories Nooney offers a new understanding of how the hobbyists' microcomputers of the 1970s became the personal computer we know today From iconic software products like VisiCalc and The Print Shop to historic games like Mystery House and Snooper Troops to long forgotten disk cracking utilities The Apple II Age offers an unprecedented look at the people the industry and the money that built the microcomputing milieu and why so much of it converged around the pioneering Apple II
