Communication Networks And Computer Systems: A Tribute To Professor Erol Gelenbe Javier A Barria, 2006-06-19 Communication networks and computer systems research is entering a new phase in which many of the established models and techniques of the last twenty years are being challenged The research community is continuing to free itself from past intellectual

constraints so that it may fully exploit the convergence of computing and communications Evaluating the performance of emerging communications and computer systems constitutes a huge challenge Thus current research provides a set of heterogeneous tools and techniques embracing the uncertainties of time and space varying environments when the requests for diverse services are made in real time and with very different quality of service expectations These novel techniques will lead to fast and economic service deployment and effective dynamic resource management and hence to new business strategies and infrastructures that will facilitate the emergence of future services and applications This volume contains contributions and presentations made by leading international researchers at a workshop which was held in April 2004 to honour Professor Erol Gelenbe on the occasion of his inaugural lecture as the Dennis Gabor Chair at Imperial College London

HPC, Big Data, and AI Convergence Towards Exascale Olivier Terzo, Jan Martinovič, 2022-01-13 HPC Big Data AI Convergence Towards Exascale provides an updated vision on the most advanced computing storage and interconnection technologies that are at basis of convergence among the HPC Cloud Big Data and artificial intelligence AI domains Through the presentation of the solutions devised within recently founded H2020 European projects this book provides an insight on challenges faced by integrating such technologies and in achieving performance and energy efficiency targets towards the exascale level Emphasis is given to innovative ways of provisioning and managing resources as well as monitoring their usage Industrial and scientific use cases give to the reader practical examples of the needs for a cross domain convergence All the chapters in this book pave the road to new generation of technologies support their development and in addition verify them on real world problems The readers will find this book useful because it provides an overview of currently available technologies that fit with the concept of unified Cloud HPC Big Data AI applications and presents examples of their actual use in scientific and industrial applications *Compendium of Hydrogen Energy* Ram Gupta, Angelo Basile, T.
