Information Linkage Between Applied Math:

Information Linkage between Applied Mathematics and Industry Peter Wang,2012-12-02 Information Linkage Between Applied Mathematics and Industry is a collection of papers dealing with mathematics in engineering context and applications One paper describes Chernoff faces as a technique of representing multidimensional data and compares the technique with Andrews sine curves and Anderson s metroglyphys Another paper investigates practical problems that can arise during implementation of the methods of parameter optimization using as an example the trajectory of the space shuttle from liftoff to insertion into orbit One paper analyzes Soviet foreign policy using a graphical representation of k dimensional data as a statistical tool written specifically for analysts in foreign policy and international relations During the period 1964 1975 Soviet foreign policy is active in 25 Sub Saharan African countries Another paper discusses ballistics modeling in real time and recommends that investigators be familiar with the computer language to be used the type of system to be applied the type of weapon to be modeled the accuracy required and other existing ballistic programs Other papers discuss probabilistic dynamic programming for fault isolation and applied mathematics as well as engineering in the transport of Antarctic ice resources The collection can prove valuable to mathematicians engineers or designers of industrial processes computers aviation and space technology   **Information Linkage Between Applied Mathematics and Industry** Arthur Schoenstadt,2012-12-02 Information Linkage between Applied Mathematics and Industry II presents the proceedings of the Second Annual Workshop on the Information Linkage between Applied Mathematics and Industry held in Monterey California on February 22 24 1979 This book focuses on the linear systems of equations in practical applications Comprised of two parts encompassing 29 chapters this volume starts with an analysis of the undetermined systems of linear algebraic equations that are frequently encountered in solving physical problems This book then discusses the guiding principles of the methods used to stabilize the problem against ill conditioning and rank deficiency This text explains the methods that are developed to solve the typical radiation spectrum unfolding problems Other chapters describe the mathematical technique that is the basis of unfolding code called FERD Finally the reader is introduced to integral and differential equations by using a point by point approach Mathematicians engineers researchers and students will find this book extremely useful   *Information linkage between applied mathematics and industry : proceedings of the ... using GALERKIN S method in space For the temporal discretization the generalized Newmark methods higher order RUNGE KUTTA methods and discontinuous and continuous GALERKIN methods are used Furthermore the residual error is introduced to open an alternative way to obtain a numerically efficient estimation of the time integration accuracy Simulation results of the electric magnetic and thermal fields are provided together with parameter studies concerning spatial discretization frequency dependence and penetration depth of the heating zone Another topic analyzed is the residual error and its estimation quality regarding polynomial degree and time step size A further aspect of this work is the investigation of the thermal fluid structure interaction with respect to functionally graded materials Different coupling strategies for the acceleration of the fixed point iteration in each time step is in the foreground Relaxation methods as well as extrapolation methods make it possible to significantly reduce the number of fixed point iterations At the same time an adaptive strategy with higher order RUNGE KUTTA methods can provide a further advantage in combination with acceleration methods

Fighting The Virus: How Disease Modeling Can Enhance Cybersecurity Marc Mangel,2025-05-27 Many of the words used to describe disease infection transmission virus are also used to characterize cyber security for example a computer is infected by a virus that can be transmitted to other current uninfected computers This correspondence is much more than a convenient metaphor and the aim of this book is to show how the models developed to understand the dynamics of infection recovery and possible reinfection in disease can be applied to understand attack compromise and recovery of components of a cyber system and how such attacks affect performance of the cyber system or its dependent enabled physical system   *Mathematical Aspects of Computerized Tomography* G.T.
