The Economic Value of Information David B. Lawrence,2012-12-06 The Scope of This Book Popular culture often refers to current times as the Information Age classifying many of the technological economic and social changes of the past four decades under the rubric of the Information Revolution But similar to the Iron Age before it the description Information Age suggests the idea that information is a commodity in the marketplace one that can be bought and sold as an item of value When people seek to acquire information yet complain about information overload and when organizations invest millions in information systems yet are unable to pinpoint the benefits perhaps this reflects a difficulty with the assessment of the value of this commodity relative to its cost an inability to discern the useless from the useful from the wasteful The Information Age requires us to assess the value cost and gain from information and to do it from several different viewpoints At the most elementary level is the individual who perceives a need for information her current state of knowledge is insufficient and something needs to be understood or clarified or updated or forecast There is a universe of alternative information sources from which to choose some more informative than others some more costly than others The individual s problem is to evaluate the alternatives and choose which sources to access An organization comprising many information seeking employees and agents must take a somewhat broader viewpoint
