contributors to the Encyclopedia of Leadership are leaders among the many thousands of scholars responsible for the health and vast breadth of leadership studies. They show us that leadership plays an important increasingly integral role today in fields ranging from world politics to community development. Bernard M. Bass, Distinguished Professor Emeritus, Center for Leadership Studies, School of Management, Binghamton University, and author of *Transformational Leadership: Industrial, Military, and Educational Impact* (1998) and *Leadership and Performance beyond Expectations* (1985). This new Encyclopedia provides leaders with the historical perspective and a vision of the tenuous future so essential if leaders of the future are to redefine leadership on their own terms with their own people. Frances Hesselbein, Chairman of the Board of Governors, Leader to Leader Institute, formerly the Drucker Foundation, and coeditor of *On Creativity, Innovation, and Renewal: A Leader to Leader Guide* (2002) and *Leading Beyond the Walls* (1999). From the earliest times, people have been entranced by stories about leaders: about Greek city-state rulers, Roman consuls, Chinese emperors, religious potentates, military conquerors, and politicians. Perhaps more importantly, leadership is a challenge and an opportunity facing millions of people in their professional and personal lives. The Encyclopedia of Leadership brings together for the first time everything that is known and truly matters about leadership as part of the human experience. Developed by the award-winning editorial team at Berkshire Publishing Group, the Encyclopedia includes hundreds of articles written by 280 leading scholars and experts from 17 countries exploring leadership theories and leadership practice. Entries and sidebars show leadership in action in corporations and state houses, schools, churches, small businesses, and nonprofit organizations. Questions the Encyclopedia of Leadership will answer: What is a leader? What is a great leader? How does someone become a leader? What are the types of leadership? How can leadership theories help us understand contemporary situations? How can I be a good and maybe great leader? The Encyclopedia of Leadership is an unprecedented learning resource. Scholars, students, professionals, and active citizens will turn to the Encyclopedia for guidance on the theory and practice of leadership, for the stories of great leaders, and for the tools and knowledge they need to lead in the 21st century.

Key Features: Four volumes, 400 substantive articles ranging in length from 1,000 to 6,000 words, 200 photographs and other illustrations, 250 sidebars drawn from public records, newspaper accounts, memoirs, and ethnography.

Key Themes: Biographies, Case studies, Followers and followership, Gender issues, Leadership in different disciplines, Leadership in different domains, Leadership styles, Personality characteristics, Situational factors, Theories and concepts.

The Encyclopedia of Leadership will be a vital tool for librarians with collections in business management, history, politics, communication, psychology, and a host of other disciplines. Students and teachers in courses ranging from history to psychology, anthropology, and law will also find this an invaluable reference. In addition, there are nearly 900 leadership programs in American post-secondary institutions, and a growing number of efforts to develop leadership in high schools. There are leadership studies majors and minors, as well as certificate and Ph.D. programs in the United States, Belgium, U.K., Japan, and elsewhere.
