Information and Communication Technologies (ICTs): Impacts and Impediments S. Venkatesh, 2003-01-01

Information and communication technologies for development and poverty reduction Maximo Torero, Joachim von Braun, 2006-01-01 The IT revolution made some glorious promises to the world's poor instant access to information and far flung markets political empowerment greater growth even the possibility that countries could leapfrog entire stages of development But when none of that happened in a hurry the hoopla gave way to concern that rather than closing the wealth gap IT was exacerbating it Yet for all the international debate and millions of words written about the digital divide very little systematic empirical research or studies over time have been done to confirm claims and counterclaims and to guide policymakers on how this technology actually affects the development of low income countries In this volume Maximo Torero and Joachim von Braun seek to address this omission with a collection of case studies exploring the relationship between information and communication technologies ICTs and development in Bangladesh China India Ghana Laos Peru and East Africa Their conclusion is that yes ICTs do have potential to serve and empower the poor by linking them to commercial and social networks cutting transaction costs and making the delivery of public goods like education and healthcare more efficient But these benefits can accrue only when the supporting infrastructure is in place and when ICT policies take into account not only questions of connectivity but also of capability how to help poor people use the new tools and of content what is relevant and in what form All three c's are critical Without coherent strategies and the right regulatory policies there is the very real likelihood that scarce resources will be misallocated and that ICT induced growth will remain elusive Contributors Abdul Bayes Arjun Bedi Romeo Bertolini Shyamal K Chowdhury Virgilio Galdo K Lal Francis A S T Matambalya Maja Micevska Dietrich Mueller Falcke Gi Soon Song Maximo Torero Joachim von Braun Wensheng Wang and Susanna Wolfe Gi Soon Song Maximo Torero Joachim von Braun Wensheng Wang Susanna Wolf

The impact of information and communication technology (ICT) on international trade in agri-food products Franziska Thiemann, 2013-11-13 The rapid diffusion of information and communication technologies ICT is believed to be one of several important drivers of international trade and globalisation The purpose of this dissertation was to analyse whether the three ICT fixed telephone lines mobile phones and the internet has encouraged international trade in important agri food products Gravity models of bilateral trade between countries were chosen to explain international trade We used panel data of the values of bilateral trade between pairs of countries for the period 1995 to 2009 The empirical results from OLS and negative binomial regression estimation suggest that ICT has an effect on international trade in agri food products The impact is however not always strong and contrary to expectations it is often negative For the products wine and fruit and vegetable juice we found no effect of ICT on trade at all Although there is great variation in the estimated impacts of individual ICT on international trade the impact of mobile phones is somewhat stronger than that of fixed telephone lines and of the internet Die rasante

Verbreitung von Informations und Kommunikationstechnologien IKT gilt als einer von vielen treibenden Krften des internationalen Handels und der Globalisierung Ziel dieser Dissertation war es herauszufinden ob die drei IKT Festnetztelefone Mobiltelefone und Internet den internationalen Handel von wichtigen Agrar und Ern hrungsg tern f rdert Gravitationsmodelle des bilateralen Handels wurden ausgew hlt um den internationalen Handel zu erkl ren Paneldaten wurden genutzt um den bilateralen Handel zweier L nder zwischen den Jahren 1995 und 2009 zu analysieren Die empirischen Ergebnisse der OLS Sch tzung und der negativ binominalen Regression zeigen dass IKT einen Effekt auf das Handelsvolumen von Agri food Produkten aus bt Der Einfluss ist nicht immer stark und entgegengesetzt der Erwartungen ist der gesch tzte Einfluss h ufig negativ Lediglich bei Wein und bei Obst und Gem ses ften konnte kein Einfluss von einem speziellen IKT auf den Handel nachgewiesen werden Obwohl es gro e Variationen bei den gesch tzten Effekten von einzelnen IKT auf den internationalen Handel gibt ist der Einfluss von Mobiltelefonen gr er als der von Festnetztelefonen und dem Internet

Multiculturalism and Information and Communication Technology Pnina Fichman, Madelyn Sanfilippo, 2022-05-31 Research on multiculturalism and information and communication technology ICT has been important to understanding recent history planning for future large scale initiatives and understanding unrealized expectations for social and technological change This interdisciplinary area of research has examined interactions between ICT and culture at the group and society levels However there is debate within the literature as to the nature of the relationship between culture and technology In this synthesis we suggest that the tensions result from the competing ideologies that drive researchers allowing us to conceptualize the relationship between culture and ICT under three primary models each with its own assumptions 1 Social informatics 2 Social determinism and 3 Technological determinism Social informatics views the relationship to be one of sociotechnical interaction in which culture and ICTs affect each other mutually and iteratively rather than linearly the vast majority of the literature approach the relationships between ICT and culture under the assumptions of social informatics From a socially deterministic perspective ICTs are viewed as the dependent variable in the equation whereas from a technologically deterministic perspective ICTs are an independent variable The issues of multiculturalism and ICTs attracted much scholarly attention and have been explored under a myriad of contexts with substantial literature on global development social and political issues business and public administration as well as education and scholarly collaboration We synthesize here research in the areas of global development social and political issues and business collaboration Finally we conclude by proposing under explored areas for future research directions
