Political Violence Candice D. Ortobals, Lori M. Poloni-Staudinger, 2018-03-09 This book examines the role of gender in political conflicts worldwide specifically the intersection between gender and terrorism Political violence has historically been viewed as a male domain with men considered the perpetrators of violence and power and women as victims without power Whereas men and masculinity are associated with war and aggression women and femininity conjure up socially constructed images of passivity and peace This distinction of men as aggressors and women as passive victims denies women their voice and agency This book investigates how women cope with and influence violent politics and is both a descriptive and analytical attempt to describe in what ways women are present or absent in political contexts involving political violence and how they deal with gender assumptions express gender identities and frame their actions regarding political violence encountered in their lives The book looks to reach beyond the notion of women as victims of terrorism or genocide without agency and to recognize the gendered nature of political conflicts and how women respond to violence This book will be of interest to advanced undergraduate and graduate students in political science sociology cultural studies and gender studies academics in terrorism studies and gender studies government officials NGOs and professionals working in areas of violent conflict

Structured Worlds Jeanne Legarski, Ron Legarski, Patrick Oborn, Ned Hamzic, Steve Sramek, Bryan Clement, Patrick Leddy, Aaron Jay Lev, 2024-09-22 Structured Worlds The Comprehensive Guide to Libraries Directories Categories and the Art of Organization serves as an essential resource for anyone navigating the complexities of information management in both physical and digital environments This guide delves deeply into the foundational principles of organization and categorization offering practical applications across various sectors like libraries archives businesses and personal data management Covering historical approaches to organization modern techniques and emerging technologies this book provides a thorough exploration of systems designed to improve data accessibility communication and efficiency It addresses the challenges posed by evolving digital landscapes offering insight into tools software and strategies that enhance organization categorization and data management Structured in a methodical way the book progresses from traditional organizing methods to the latest innovations with a focus on metadata taxonomies artificial intelligence and user accessibility It is an invaluable resource for professionals students and enthusiasts in fields such as library science information management and beyond equipping them with the knowledge to master the art of organization and data structuring for maximum efficiency tags organization categorization libraries directories metadata taxonomy digital organization archives information management AI in organization user accessibility organizational tools digital transformation categorization systems structured information European and International Experiences of Strategic Environmental Assessment Barry Sadler, Jiří Dušík, 2016-03-17 This book brings together the latest thinking in Strategic Environmental Assessment SEA and considers the key question of whether the processes are having a positive impact on strategic decision making both in Europe and worldwide As governments move to develop green agendas the book explores the challenges of working within national

systems as well as the strengths and weaknesses of sector specific SEA The importance of stakeholder engagement is considered as is the question of how to turn NIMBYs into WIMBYs that is creating positive reasons to encourage development and allow local stakeholders to profit In assessing ways in which the practice of SEA can provide a new agenda for the 21st Century the chapters explore current and emerging approaches procedures and methods along with ways in which SEA can be linked with other planning tools The role of research and academia is considered and the book looks beyond the current status of SEA to address the question of how practitioners can capitalise on the potential of SEA to become integrated into high level policy as a key element of climate change mitigation strategies Each chapter is written by internationally renowned authors and based on many years of experience in the field The book will be essential reading for forward thinking practitioners and students of SEA
