Privacy II Jay Black, 2017-10-03 Concerns over privacy in America and the role of a free and responsible press have intensified in recent years. The Journal of Mass Media Ethics has worked with Poynter Institute for Media Studies in an effort to focus and broaden the discussion. This issue, the second devoted to privacy matters, features articles that the editors hope will add useful perspectives to the current discussions of privacy issues, particularly those raised by new technology.

Ancient Egyptian Wisdom for the Internet Anna Mancini, 2002 As cyberspace and real space function differently, they cannot implicate the same legal values. The most elementary wisdom invites us to forget our legal past so obviously ill adapted to the Internet so as to gain a better insight into the functioning of virtual space. Attempts to regulate the Internet in the same way as the real world have inevitably failed and will continue to fail. The only solution that can foster the expansion of the net and justify state intervention will come from a philosophy of law suited to virtuality. Our philosophical legal traditions stemmed from agricultural and industrial roots and are therefore widely useless within the virtual context. They cannot help us, but the philosophy of ancient civilizations can. At first sight it may seem paradoxical to look to ancient civilizations for counsels on legal regulation of the Internet. But the virtual world is not a modern invention; it has existed forever. Ancient Egyptian Wisdom for the Internet demonstrates that the legal philosophy and knowledge of ancient civilizations are of great value in helping us deal with the Internet. Through a challenging exploration of ancient legal knowledge, this book offers new perspective on how to deal with and best profit from the Internet.

Journal of Information Ethics, 1992 *Technology and Values* Kristin Shrader-Frechette, Laura Westra, 1997-10-30 Technology and Values provides a highly useful collection of essays organized around issues related to science, technology, public health, economics, the environment, and ethical theory. The editors present effective introductions that provide background information as well as philosophical tools and case studies to facilitate understanding of the variety of issues emanating from the most significant developments in technology, including the effects on privacy of the widespread use of computers to store and retrieve personal information and the ethical considerations of genetic engineering.

Copyright Law is Obsolete Anna Mancini, 2006 Copyright laws worldwide were created for a publishing world where books were tangible printed in a limited number and sold within territory based markets Technological changes are giving place to a new book market where books are intangible exist in unlimited number of copies and travel worldwide in an increasingly global market In this emerging global book market made possible by the conjunction of the Internet e book technologies DRM and print on demand devices the three important legal concepts traditionally used in copyright laws have become obsolete territory property and the Aristotelian idea of justice These three concepts were well suited to the tangible book market but are no longer for the virtual book market where persons matter more than objects This book invites the reader to explore the specific functioning of the virtual economy It proposes guidelines to modernize copyright law so that it can foster an adequate use of new communication technologies For the first time in History the humankind has acquired a technology that allows to create a world of information affluence and freedom of speech or its opposite This book explains why the option for abundance and freedom must prevail how the law can support this movement and what would be to the contrary the disastrous consequences of the other option This book goes beyond a simple reflection on the book market and considers the choice of society even of civilization implied by the use right or wrong of the new communication technologies *Computers and Ethics in the Cyberage* D. Micah Hester, Paul J. Ford, 2001 This anthology of essays contributed and compiled by experts in a variety of fields addresses both perspectives in the debate regarding the proliferation of computers in our lives Topics ranges from privacy copyright and computer crime issues to the global impact of computers online communities and virtual reality For anyone interested in a broad based interdisciplinary view of the ethical issues facing society in light of the computer s proliferation in our personal and professional lives **Informatization and the Public Sector** ,1994
