Mobile Robot Navigation with Intelligent Infrared Image Interpretation William L. Fehlman,Mark K. Hinders,2009-06-13 Mobile robots require the ability to make decisions such as go through the hedges or go around the brick wall Mobile Robot Navigation with Intelligent Infrared Image Interpretation describes in detail an alternative to GPS navigation a physics based adaptive Bayesian pattern classification model that uses a passive thermal infrared imaging system to automatically characterize non heat generating objects in unstructured outdoor environments for mobile robots The resulting classification model complements an autonomous robot s situational awareness by providing the ability to classify smaller structures commonly found in the immediate operational environment **Chemometric Methods in**

Analytical Spectroscopy Technology Xiaoli Chu,Yue Huang,Yong-Huan Yun,Xihui Bian,2022-05-23 This book discusses chemometric methods for spectroscopy analysis including NIR MIR Raman NMR and LIBS from the perspective of practical applied spectroscopy It covers all aspects of chemometrics associated with analytical spectroscopy including representative sample selection algorithm outlier detection algorithm model updating and maintenance algorithm and strategy and calibration performance evaluation methods To provide a systematic and comprehensive overview the latest progress of chemometric methods including recent scientific research and practical applications are presented In addition the book also highlights the improvement of classical algorithms and the extension of common strategies It is therefore useful as a reference book for researchers engaged in analytical spectroscopy technology chemometrics analytical instruments and other related fields Mathematical and Statistical Methods in Food Science and Technology Daniel Granato,Gastón

Ares,2014-03-03 Mathematical and Statistical Approaches in Food Science and Technology offers an accessible guide to

applying statistical and mathematical technologies in the food science field whilst also addressing the theoretical foundations Using clear examples and case studies by way of practical illustration the book is more than just a theoretical guide for non statisticians and may therefore be used by scientists students and food industry professionals at different levels and with varying degrees of statistical skill **Intelligent Computing Technology and Automation** Z. Hou,2024-02-08 Artificial Intelligence AI is a rapidly developing field of computer science which integrates multiple disciplines such as computer science psychology and philosophy It is a technology that develops theories methods technologies and application systems to simulate extend and expand human intelligence by attempting to understand its essence producing a new intelligent machine that can respond in a way similar to human intelligence Artificial intelligence now plays an increasingly important role in the development of global industries and economies and as such is currently changing our world significantly making AI research a hot topic worldwide This book presents the proceedings of ICICTA 2023 the 16th International Conference on Intelligent Computing Technology and Automation held on 24 25 October 2023 in Xi an China The conference is an annual forum dedicated to emerging and challenging topics in AI and its applications and its aim is to bring together an international community of researchers and practitioners in the field of AI to share the latest research achievements discuss recent advances influence future direction and promote the diffusion of the discipline throughout the scientific community at large A total of 322 submissions were received for ICICTA 2023 and each paper received at least 2 review reports in a rigorous peer review procedure Based on these reports 141 papers were ultimately accepted and are included in this book The book offers a current overview of developments in AI technology and will be of interest to all those working in the field **Research Developments in Wood Engineering and Technology** Aguilera, Alfredo,Davim, J. Paulo,2013-09-30 This book examines the latest research advances and technological developments for wood material as an engineering product and the innovation it provides for environmental friendly materials Provided by publisher **Environmental Analysis and Technology for the Refining Industry** James G. Speight,2005-08-31 A timely hands on guide to environmental issues and regulatory standards for the petroleum industry Environmental analysis and testing methods are an integral part of any current and future refining activities Today s petroleum refining industry must be prepared to meet a growing number of challenges both environmental and regulatory Environmental Analysis and Technology for the Refining Industry focuses on the analytical issues inherent in any environmental monitoring or cleanup program as they apply to today s petroleum industry not only during the refining process but also during recovery operations transport storage and utilization Designed to help today s industry professionals identify test methods for monitoring and cleanup of petroleum based pollutants the book provides examples of the application of environmental regulations to petroleum refining and petroleum products as well as current and proposed methods for the mitigation of environmental effects and waste management Part I introduces petroleum technology refining and products and reviews the nomenclature used by refiners environmental scientists and engineers Part

It discusses environmental technology and analysis and provides information on environmental regulation and the impact of refining. Coverage includes in-depth descriptions of analyses related to gaseous emissions, liquid effluents, and solid waste. A checklist of relevant environmental regulations. Numerous real-world examples of the application of environmental regulations to petroleum refining and petroleum products. An analysis of current and proposed methods of environmental protection and waste management. **Advanced Dairy Science and Technology** Trevor Britz, Richard K. Robinson, 2008-04-30

This important and comprehensive book covers in depth the most important recent advances in dairy technology. Providing core commercially important information for the dairy industry, the editors, both internationally known for their work in this area, have drawn together an impressive and authoritative list of contributing authors. Topics covered include heat treatment, membrane processing, hygiene by design, application of HACCP, automation, safety, and quality, modern laboratory practices, and analysis and environmental aspects. This book is an essential purchase for all dairy technologists worldwide, whether in academic research and teaching or within food companies. **Coatings Technology** Arthur A. Tracton, 2006-11-07

Drawn from the third edition of *The Coatings Technology Handbook*, this book focuses entirely on testing, experimental design, and strategies for selecting processing techniques in the coatings, adhesives, paints, and inks industries. *Coatings Technology Fundamentals: Testing and Processing Techniques* contains the latest coating and processing methods.

Coatings Technology Handbook Arthur A. Tracton, 2005-07-28. Serving as an all-in-one guide to the entire field of coatings technology, this encyclopedic reference covers a diverse range of topics, including basic concepts, coating types, materials, processes, testing, and applications, summarizing both the latest developments and standard coatings methods. Take advantage of the insights and experience of over 100 experts. *Process Analytical Technology* Katherine A. Bakeev, 2008-04-15. The use of real or near real-time measurement of chemical production process parameters as the basis for achieving control or optimisation of a manufacturing process has wide application in the petrochemical, food, and chemical industries. Process analytical chemistry (PAC) or process analytical technology (PAT) as it has recently been called, is now being deployed in the pharmaceutical industry, where it is seen as a technology that can help companies to improve their conformity with manufacturing compliance regulations. The objective of this book is to provide a starting point for implementing process analytical chemistry tools in process monitoring applications or as part of a total quality management system. Written from the perspective of the spectroscopist required to implement PAT tools in a process environment, attention is focussed on measurements that are made in process, at line or off line, providing data on product during manufacture. With chapters covering the key spectroscopic tools, their applications in the pharmaceutical and chemical industries, and basic chemometrics, the novice can quickly develop a sound understanding of the most practical technologies and applications. Implementation strategies are fully covered and address some of the critical issues that need to be tackled when setting up a PAT project, including choosing a project with a sound business justification in the first place. **Proceedings of the ...**
