Green, Rod B. McNaughton, 2017-12-15 This title was first published in 2000 This volume addresses the role of proximity in network formation and performance between small and medium sized firms in local business communities Its theoretical and applied viewpoints should be useful to both firms and economic development agencies whose mandate is to assist firm growth and internationalism through local networks and clusters of firms Proximity and the Cluster Organization Anna Maria Lis, Adrian Lis, 2023-04-05 Including the category of proximity in theoretical considerations and empirical analyzes in cluster organizations is an attempt to integrate existing approaches to understand and explain the specificity of inter organizational cooperation developed in geographical proximity The importance of geographical proximity to create a competitive advantage is emphasized in all theories on the establishment and development of industrial clusters However proximity should not be perceived only in the geographical dimension The similarity of knowledge systems cognitive proximity relationships based on trust social proximity organizational links organizational proximity and finally the similarity of institutional operating conditions institutional proximity enable and facilitate the development of cooperation relationships between business entities Each of the above mentioned threads deals separately with issues that have much in common namely they can be treated as different dimensions of the same concept proximity Proximity provides a specific concretization of the features processes and mechanisms underlying inter organizational cooperation and thus facilitates its understanding increasing the possibility of its effective management The study provides new important elements to the current system of knowledge filling in the cognitive and research gaps in the scientific literature on problems related to proximity development in cluster organizations The new element includes a multidimensional concept of proximity explaining its role in the development of cooperative relationships in the cluster organizations A strong point of the developed concept is its inductive abductive origin and the use of grounded theory methodology which is rare in the studies of cluster organizations The developed concept has also significant practical advantages since it allows to consciously shape proximity in COs thus contributing to the development of cooperation between cluster enterprises **Proximity, Distance and**
