The Interface of Competition Law,

Industrial Policy and Development Concerns Balthasar Strunz, 2018-07-28 This book analyses essential concepts of competition law and industrial policy and shows where the two areas clash with and complement each other respectively The discussion takes place in the context of developing countries taking into consideration their realities and specific needs South Africa serves as a real world example for competition law that goes beyond the notion of consumer welfare An in depth analysis of the enforcement of South African law illustrates how the law is used both to combat the negative effects of past industrial policy and to accommodate current economic and social needs The book is intended for all readers with an interest in the enforcement of competition law in developing countries It will particularly benefit those who want to learn about unorthodox approaches that integrate the concept of public interest and social imperatives into the application of competition law *Innovation, Growth and Competitiveness* Peter Nijkamp, Iulia Siedschlag, 2010-12-01 This book investigates dynamic regions in the context of greater global interaction in a world economy increasingly driven by knowledge and innovation It offers novel empirical evidence on the underlying factors of the growth performance of these spaces In particular the following questions are addressed What role is there for research education and innovation in the development strategies of the dynamic growth regions What are the risks and consequences of dynamic growth on patterns of world growth and development competitiveness inequalities and convergence What development strategies should be promoted at national and international levels to promote a growing and more sustainable world economy What are the implications of the emerging new competitors for Europe s competitiveness Using an innovative integrated framework of analysis the contributions in this book combine a wide array of complex theoretical and methodological approaches

Policies for Industrial Growth in a Competitive World, 1984

Structural Change, Competitiveness and

Industrial Policy Aurora Teixeira, Ester Silva, Ricardo Mamede, 2014-06-20 The onset of the global crisis has emphasised the

persistence of substantial differences in development and social progress within the euro area. The specific case of countries located in the southern periphery region has come to the centre stage due to the harsh economic conditions that all these countries have experienced in the recent past. In the aftermath of the American subprime credit bubble, these countries' high indebtedness raised doubts as to their ability to sustain public finances with the financial crisis developing and gaining momentum due to the fragilities presented in the economy. To varying degrees of severity, all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation, which have translated into recession and rising unemployment. This book undertakes a comprehensive analysis of the causes of the crisis in southern European countries, showing that the Achilles heel of these economies is rooted in the dismal evolution of productivity and in a specialisation pattern excessively based on the so-called traditional low and low-medium tech industries, which yield low margins, declining export shares and ultimately withering international competitiveness. Such evidence suggests that the southern European periphery industrial growth model has reached its limits, demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis. Without denying the need to adjust public and private balance sheets, it is argued that finding a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term.

Macroeconomic Policy as Implicit Industrial Policy: Its Industry and Enterprise Effects John Randolph Norsworthy, Diana H. Tsai, 2012-12-06
Whether they should or not, few economists do in fact refrain from making pronouncements on public policy, although the state of the economy both here and elsewhere suggests that either the advice given is bad or, if good, that it is ignored. I happen to think that we are appallingly ignorant about many aspects of the working of the economic system: the economics of the firm and industry. Ronald H. Coase, *Economists and Public Policy*. In this volume, we attempt to address an element of Coase's concern by linking the empirical economics of the firm and industry more closely to macroeconomic policies and to demonstrate how to assess some of the effects of those policies. The scope of our study ranges from a structural macroeconomic model of the United States from which macroeconomic effects are propagated to detailed structural models of SIC four-digit industries. The rationale for our approach is very much in the spirit of various integrated macroeconomic industry models constructed by Dale Jorgenson, working with various collaborators. Our approach is also consistent with and motivated by Lawrence Klein's agenda of modeling explicitly and structurally the macro and sectoral elements in the national economy. We also examine the effects of the macroeconomic policies of different countries on the enterprise. In only one case, our examination of crowding out of private investment by government deficit financing, is the linkage among sectors implicit.

Competitiveness, Subsidiarity and Industrial Policy Pat J. Devine, Yannis S. Katsoulacos, Roger Sugden, 2005-08-18
What does competitiveness mean? In recent years, discussion of economic policy has become dominated by the notion of competitiveness. In this volume, a group of leading economists explore the issue through cross-country comparisons and by

means of single country case studies They also examine the relationship between competitiveness and community objectives the co existence of diversity subsidiarity and EU industrial policy the impact of European enlargement and further integration

Regulatory Reform and Competitiveness in Europe: Horizontal issues Giampaolo Galli, Jacques Pelkmans, 2000-01-01 Throughout the book the authors aim to show how the market can function more efficiently and offer policy recommendations to show how regulatory reform can improve competitiveness at the firm level as well as performance at the industry national and EU levels
