thus to appropriate the larger share if not the whole of the advantages of commerce and of distant unsettled commercial regions led to wars On the other hand wars arising from other causes have been greatly modified in their conduct and issue by the control of the sea Therefore the history of sea power while embracing in its broad sweep all that tends to make a people great upon the sea or by the sea is largely a military history and it is in this aspect that it will be mainly though not exclusively regarded in the following pages A study of the military history of the past such as this is enjoined by great military leaders as essential to correct ideas and to the skilful conduct of war in the future Napoleon names among the campaigns to be studied by the aspiring soldier those of Alexander Hannibal and C sar to whom gunpowder was unknown and there is a substantial agreement among professional writers that while many of the conditions of war vary from age to age with the progress of weapons there are certain teachings in the school of history which remain constant and being therefore of universal application can be elevated to the rank of general principles For the same reason the study of the sea history of the past will be found instructive by its illustration of the general principles of maritime war notwithstanding the great changes that have been brought about in naval weapons by the scientific advances of the past half century and by the introduction of steam as the motive power We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience The Influence of Sea Power Upon History 1660-1783 Alfred T. Mahan, 2010 Mahan presents an examination of the general history of Europe and America with special reference to the effect of sea power on the course of history The Influence of Sea Power Upon History, 1660-1783 A. T. Mahan, 2016-08-26 The definite object proposed in this work is an examination of the general history of Europe and America with particular reference to the effect of sea power upon the course of that history Historians generally have been unfamiliar with the conditions of the sea having as to it neither special interest nor special knowledge and the profound determining influence of maritime strength upon great issues has consequently been overlooked This is even more true of particular occasions than of the general tendency of sea power It is easy to say in a general way that the use and control of the sea is and has been a great factor in the history of the world it is more troublesome to seek out and show its exact bearing at a particular juncture Yet unless this be done the acknowledgment of general importance remains vague and unsubstantial not resting as it should upon a collection of special instances in which the precise effect has been made clear

by an analysis of the conditions at the given moments A curious exemplification of this tendency to slight the bearing of maritime power upon events may be iv drawn from two writers of that English nation which more than any other has owed its greatness to the sea Twice says Arnold in his History of Rome Has there been witnessed the struggle of the highest individual genius against the resources and institutions of a great nation and in both cases the nation was victorious For seventeen years Hannibal strove against Rome for sixteen years Napoleon strove against England the efforts of the first ended in Zama those of the second in Waterloo Sir Edward Creasy quoting this adds One point however of the similitude between the two wars has scarcely been adequately dwelt on that is the remarkable parallel between the Roman general who finally defeated the great Carthaginian and the English general who gave the last deadly overthrow to the French emperor of Sea Power upon History Alfred Thayer Mahan, 2020-12-08 In The Influence of Sea Power upon History 1660 1783 Alfred Thayer Mahan presents a groundbreaking analysis of the critical role naval power has played in shaping world history This seminal work marked by Mahan's eloquent prose and rigorous historical method explores the strategic importance of maritime supremacy during a transformative era dominated by colonial expansion and conflicts at sea Mahan's thematic exploration underscores how nations like Great Britain leveraged their naval capabilities to exert geopolitical influence thus setting the stage for modern naval doctrine and international relations As a naval officer and historian Mahan s own experiences in the U S Navy informed his insights into maritime strategy His career coincided with the rise of the United States as a global power allowing him to draw from both historical antecedents and contemporary politics Mahan s scholarship reflects his belief in the nexus between sea power and national prosperity culminating in a narrative that not only articulates the past but also serves as a guide for future military and political strategies This authoritative text is indispensable for readers interested in maritime history military strategy and political science Mahan's theories remain relevant today providing critical insights into the significance of naval capabilities in contemporary geopolitical conflicts Engaging and meticulously researched this book is a must read for scholars strategists and anyone fascinated by the enduring impact of naval power on global affairs The Influence of Sea Power Upon History, 1660-1783 (Esprios Classics) A. T. Mahan, 2021-12-02 Alfred Thayer Mahan 1840 1914 was a United States Navy officer geostrategist and educator His ideas on the importance of sea power influenced navies around the world and helped prompt naval buildups before World War I Despite his success in the Navy his skills in actual command of a ship were not exemplary and a number of vessels under his command were involved in collisions On the other hand the books he wrote ashore made him arguably the most influential naval historian In 1885 he was appointed lecturer in naval history and tactics and the Naval War College Before entering on his duties Mahan was pointed to write his future studies and lectures on the influence of sea power He organized his lectures into his most influential books The Influence of Sea Power upon History 1660 1783 1890 The Influence of **Sea Power Upon History 1660 To 1783** Alfred Thayer Mahan, 2015-05-06 The Influence of Sea Power Upon History 1660

to 1783 from Alfred Thayer Mahan United States Navy flag officer geostrategist and historian 1840 1914 The Influence of Sea Power Upon History, 1660-1783. by A. T. Mahan, 2016-06-17 The Influence of Sea Power Upon History 1660 1783 is a history of naval warfare published in 1890 by Alfred Thayer Mahan It details the role of sea power during the seventeenth and eighteenth centuries and discusses the various factors needed to support and achieve sea power with emphasis on having the largest and most powerful fleet Scholars consider it the single most influential book in naval strategy Its policies were quickly adopted by most major navies ultimately leading to the World War I naval arms race Mahan formulated his concept of sea power while reading a history book in Lima Peru The book was published by Mahan while president of the US Naval War College and was a culmination of his ideas regarding naval warfare Mahan began the book with an examination of what factors lead to a supremacy of the seas especially how Great Britain was able to rise to its near dominance He identifies such features as geography population and government and expands the definition of sea power as comprising a strong navy and commercial fleet Mahan also promotes the belief that any army would succumb to a strong naval blockade The book then goes on to describe a series of European and American wars and how naval power was used in Timeliness contributed no small part to the widespread acceptance and resultant influence of Mahan's views Although his history was relatively thin he relied on secondary sources the vigorous style and clear theory won widespread acceptance of navalists across the world 8 Sea power supported the new colonialism which Europe and Japan were imposing on Africa and Asia Given the very rapid technological changes underway in propulsion from coal to oil from reciprocating engines to steam turbines ordnance with better fire directors and new high explosives and armor hardened steel the emergence of new craft such as destroyers and submarines and the development of radio Mahan's emphasis on the capital ship and the command of the sea came at an opportune moment Mahan was initially introduced to the German navy by the strategist Ludwig Borckenhagen in a series of influential papers Subsequently his name became a household word in the German navy as Kaiser Wilhelm II ordered his officers to read Mahan and Admiral Alfred von Tirpitz 1849 1930 used Mahan's reputation to finance a powerful surface fleet His ideas decisively shaped Japanese naval doctrine especially in the fleet actions of World War II Between 1890 and 1915 Mahan and British admiral Jacky Fisher 1841 1920 faced the problem of how to dominate home waters and distant seas with naval forces not strong enough to do both Mahan argued for a universal principle of concentration of powerful ships in home waters and minimized strength in distant seas while Fisher reversed Mahan by utilizing technological change to propose submarines for defense of home waters and mobile battle cruisers for protection of distant imperial interests The French at first adopted Mahan's theories French naval doctrine in 1914 was dominated by Mahan's theory of sea power and therefore geared toward winning decisive battles and gaining mastery of the seas But the course of World War I changed ideas about the place of the navy as the refusal of the German fleet to engage in a decisive battle the Dardanelles expedition of 1915 the development of submarine warfare and the organization of convoys all showed the navy s new role in combined operations
