**Change** Gregory R. Maio, Geoffrey Haddock, 2009 Written by two world leading academics in the field of attitudes research is

a brand new textbook that gets to the very heart of this fascinating and far reaching field Greg Maio and Geoffrey Haddock describe how scientific methods have been used to better understand attitudes and how they change With the aid of a few helpful metaphors the text provides readers with a grasp of the fundamental concepts for understanding attitudes and an appreciation of the scientific challenges that lay ahead The Lucifer Effect Philip Zimbardo, 2007-03-27 The definitive firsthand account of the groundbreaking research of Philip Zimbardo the basis for the award winning film The Stanford Prison Experiment Renowned social psychologist and creator of the Stanford Prison Experiment Philip Zimbardo explores the mechanisms that make good people do bad things how moral people can be seduced into acting immorally and what this says about the line separating good from evil The Lucifer Effect explains how and the myriad reasons why we are all susceptible to the lure of the dark side Drawing on examples from history as well as his own trailblazing research Zimbardo details how situational forces and group dynamics can work in concert to make monsters out of decent men and women Here for the first time and in detail Zimbardo tells the full story of the Stanford Prison Experiment the landmark study in which a group of college student volunteers was randomly divided into guards and inmates and then placed in a mock prison environment Within a week the study was abandoned as ordinary college students were transformed into either brutal sadistic guards or emotionally broken prisoners By illuminating the psychological causes behind such disturbing metamorphoses Zimbardo enables us to better understand a variety of harrowing phenomena from corporate malfeasance to organized genocide to how once upstanding American soldiers came to abuse and torture Iraqi detainees in Abu Ghraib He replaces the long held notion of the bad apple with that of the bad barrel the idea that the social setting and the system contaminate the individual rather than the other way around This is a book that dares to hold a mirror up to mankind showing us that we might not be who we think we are While forcing us to reexamine what we are capable of doing when caught up in the crucible of behavioral dynamics though Zimbardo also offers hope We are capable of resisting evil he argues and can even teach ourselves to act heroically Like Hannah Arendt's Eichmann in Jerusalem and Steven Pinker's The Blank Slate The Lucifer Effect is a shocking engrossing study that will change the way we view human behavior Praise for The Lucifer Effect The Lucifer Effect will change forever the way you think about why we behave the way we do and in particular about the human potential for evil This is a disturbing book but one that has never been more necessary Malcolm Gladwell An important book All politicians and social commentators should read this The Times London Powerful an extraordinarily valuable addition to the literature of the psychology of violence or evil The American Prospect Penetrating Combining a dense but readable and often engrossing exposition of social psychology research with an impassioned moral seriousness Zimbardo challenges readers to look beyond glib denunciations of evil doers and ponder our collective responsibility for the world's ills Publishers Weekly A sprawling discussion Zimbardo couples a thorough narrative of the Stanford Prison Experiment with an analysis of the social dynamics of the Abu Ghraib prison in Iraq Booklist Zimbardo bottled evil in a laboratory The lessons he learned show us our dark

nature but also fill us with hope if we heed their counsel The Lucifer Effect reads like a novel Anthony Pratkanis Ph D professor emeritus of psychology University of California Ideological Battlegrounds Dana L. Solomon, 2018-12-04 Can entertainment challenge divisive ideologies Can we use theater film games novels and stories disarm the ideologies of fear Ideological Battlegrounds Entertainment to Disarm Divisive Propaganda introduces and develops Ideologically Challenging Entertainment ICE to challenge us versus them narratives ICE counters polarizing perspectives by embracing multiple valid viewpoints without losing sight of facts Additionally this book explores the first ICE production Two Merchants The Merchant of Venice adapted to challenge ideologies related to the Arab Israeli Conflict A mixed methods study of audience responses to this production showed that a significant number of audience members reconsidered their views not only about the Arab Israeli conflict but also about ideological divisions that were more personally relevant Ideological Battlegrounds is unique both in its conceptualization of entertainment as a means to address local and global conflicts and in its provision of evidence for the power of performance as a tool for confronting and influencing ideological change This book offers a new approach to bridging dangerous ideological chasms that without significant intervention will only continue to worsen *Predicting and Changing Behavior* Martin Fishbein, Icek Ajzen, 2011-02-14 This book describes the reasoned action approach an integrative framework for the prediction and change of human social behavior It provides an up to date review of relevant research discusses critical issues related to the reasoned action framework and provides methodological and conceptual tools for the prediction and explanation of social behavior and for designing behavior change interventions Attitudes and Attitude Change William D. Crano, Radmila Prislin, 2011-07-21 This volume assembles a distinguished group of international scholars whose chapters on classic and emerging issues in research on attitudes provide an excellent introduction for advanced undergraduates and graduate students The book's chapters cover all of the most critical features of attitude measurement attitude development and attitude change Implicit and explicit approaches to measurement and conceptualization are featured throughout making this one of the most up to date treatments of attitude theory and research currently available The comprehensive coverage of the central topics in this important field provides a useful text in advanced courses on persuasion or attitude change **Persuasion in Society** Herbert W. **The Affective and Cognitive Domains** Barbara L. Martin, Leslie J. Briggs, 1986      **Catholic Citizens in the Third Reich**

Donald J. Dietrich, 1988-01-01 Why did some German Catholics support and others oppose the police state that was the Third Reich In this insightful analysis Donald Dietrich explores the social psychological dynamics behind the religious reactions of German Catholics to political and moral issues during the late Weimar and Third Reich eras Along with many other Germans Catholics were enmeshed in a cruel dilemma Assenting to Nazi ideals would mean a loss of moral credibility opposing them would result in persecution Dietrich shows how Catholics accommodated and sometimes resisted totalitarianism and the Final Solution Three groups of Catholics are examined the hierarchy the theologians and the laity The literature on Nazi Germany is enormous But this is the first analysis of the dynamics shaping individual motivations and group response to Nazi ideals This comprehensive work fuses results derived from social science research with the massive amount of historical data available It is an interdisciplinary study relating religious values to patterns of behavior an issue that retains its significance today
