Viewpoint-based Flexible Information System Architectures Dmitri Valeri Panfilenko, 2021-06-07 Information system architecture ISA specification as a part of software engineering field has been an information systems research topic since the 60s of the 20th century There have been manifold specification methodologies over the recent decades developed newly or adapted in order to target the domains of software modelling legacy systems steel production and automotive safety Still there exist considerable issues constituting the need for a flexible ISA development e.g. incomplete methodology for requirements in model driven architectures lacking qualitative methods for thorough definition and usage of viewpoints Currently existing methods for information system architecture specification usually devise the target architectures either addressing only a part of software life cycles or neglecting less structured information The method for flexible information system architectures FISA specification uses the viewpoint concept for mediating the domain expert and technical system levels The FISA method defines construction and application reference models based on the ANSI IEEE Standard 1471 2000 viewpoints with model transformations based on OMG Standard Model Driven Architecture MDA and four different approaches for ISA specification thus providing for flexibility both in construction and refactoring procedures The

development of FISA method has been based on a thorough analysis of the ISA specification method field and constructs a comprehensive procedure and reference engineering models for flexible ISA specification The genericity of the conceived construction and application procedure models of FISA allows for its usage not only in research but also in industry settings as presented on illustrative scenarios in steel manufacturing and automotive safety Information Systems Plan, 1989

Building the Data Warehouse W. H. Inmon, 2005-10-03 The new edition of the classic bestseller that launched the data warehousing industry covers new approaches and technologies many of which have been pioneered by Inmon himself In addition to explaining the fundamentals of data warehouse systems the book covers new topics such as methods for handling unstructured data in a data warehouse and storing data across multiple storage media Discusses the pros and cons of relational versus multidimensional design and how to measure return on investment in planning data warehouse projects Covers advanced topics including data monitoring and testing Although the book includes an extra 100 pages worth of valuable content the price has actually been reduced from 65 to 55 CKBS '90 S.M. Deen, 2012-12-06 This is the first international conference aimed at bringing the distributed database and distributed AI DAD experts together from both academia and industry in order to discuss the issues of the next generation of knowledge based systems namely Cooperating Knowledge Based Systems or CKBS for short As the area of CKBS is new we intended it to be an ideas conference a conference where interesting new ideas rather than results from completed projects are explored discussed and debated The conference was organised by the DAKE Centre This is an interdisciplinary centre at the University of Keele for research and development in Data and Knowledge Engineering DAKE The Centre draws most of its strength from the Department of Computer Science which also provides administrative support for the activities of the Centre although its membership is spread over several departments The Centre has three main streams of research activities namely Large Knowledge Bases Software Engineering Neural Networks The Large Knowledge Base group which provided the focus for this conference is active in a number of research areas relating to data and knowledge bases spanning from distributed databases to cooperations among data and knowledge bases The current research topics include integration of data and knowledge bases and cooperating knowledge based systems with several major projects in the latter see the entries under the Poster Session given below **NASA SP-7500** United States. National Aeronautics and Space Administration, **ESPRIT '90** CEC, DG for Telecommunications, 2012-12-06 The 1990 ESPRIT Conference is being held in Brussels from the 12th November to the 15th November Well over 1700 participants from all over Europe and overseas are expected to attend the various events The Conference will offer the opportunity to be updated on the results of the ESPRIT projects and Basic Research actions and to develop international contacts with colleagues both within a specific branch of Information Technology and across different branches The first three days of the Conference are devoted to presentations of Esprit projects and Basic Research actions structured into plenary and parallel sessions the scope of the Conference has been broadened this year by the inclusion of

several well known international speakers All areas of Esprit work are covered Microelectronics Information Processing Systems Office and Business Systems Computer Integrated Manufacturing Basic Research and aspects of the Information Exchange System During the IT Forum on Thursday November 15th major European industrial and political decision makers will address the audience in the morning In the afternoon a Round Table will discuss the impact of Information Technology on society More than 100 projects and actions will display their major innovations and achievements at the Esprit Exhibition which will be for the first time open to the general public
