Nuclear Holocausts Paul Brians,1987 The anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether some to despair and others to place unwarranted confidence in scientific or governmental control However the vivid characters and realistic settings of fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to confront their fears and phobias This bibliography study is the only compilation of its kind to deal exclusively with nuclear war in fiction The first five chapters provide a historical survey of the development of the nuclear war theme and a study of the causes and aftermath of nuclear war as treated in literature In addition Brians considers the significant failure of some works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to provide scholars librarians and general readers with ready access to a great variety of information about his body of writing the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works In his critical analysis and through the annotations in the bibliography Brians attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear weaponry Jacket **The Secret Doorway** Paul Hutchins,2008-11 A pictorial drama of the creation of Heaven and Earth based upon the awe inspiring photo images from the Hubble and Spitzer space telescopes Author Paul Hutchins uncovers a grand drama on a universal scale that has been playing out since the invention of the telescope He poses the question is this grand drama merely in response to an ancient invitation recorded in the Book of Isaiah It states in Isaiah 40 26 Look up into the heavens Who created all the stars Through the use of his imagination and the invention of the telescope man has discovered a once secret doorway to a world beyond imagination He has now in this age of cutting edge technology developed flying space telescopes in his quest to know how did we get here What he has found has astounded him Hutchins farther poses the question if it took over 400 years of man s

imagination from when the telescope was invented and countless other inventions including the Hubble and Spitzer space telescopes to merely take photo images of the universe then who's imagination is responsible for the reality those photo images represent As we peer through this doorway to the heavens and look upon these heavenly cosmic bodies we find ourselves awed by their grandeur The pressing question becomes too large to ignore Who is responsible for all these things Could it be that we are now peering into the mind of a supreme architect with an imagination far beyond that of mere mortals Could we be peering into the mind of imagination supreme Could it be that we have been brought to this point in history unbeknownst to ourselves and given this technology by the one who extended that ancient invitation recorded by Isaiah 2700 years ago **Timbrel** Chris Saint John, 2004-11 a story of love and loyalty set in the fantasy genre
