Jets at Sea Leo Marriott,2009-03-09 As World War Two drew to a close jet powered aircraft were beginning to be introduced into service To take advantage of this major development it was necessary for all the worlds air powers to rethink combat tactics and develop the means of handling these faster and generally larger aircraft in the air on land and especially

at sea As this modern breed approached and finally broke the sound barrier so did landing and takeoff speeds The decade after the war saw rapid developments in the design of both naval aircraft and their seaborne bases the aircraft carrier The first jet to land aboard a carrier was a modified de Havilland Vampire in 1945 on H M S Ocean Progress was rapid and the application of British inventions such as the angled flight deck steam catapult and mirror landing sight soon became adopted by the major navies of the world Naval aircraft too became more sophisticated by the addition of high lift flap systems and strengthened undercarriages to allow them to operate more safely at sea The author describes the development of these improvements and then their operational advantages in the Korean War and Suez He goes on to describe the US development of a potential nuclear carrier borne bomber the French Navy and its withdrawal from Vietnam in 1954 and then the use of naval aircraft for anti submarine work **First Job** Rinker Buck,2002-08-21 From the author of the acclaimed coming of age story Flight of Passage comes a rollicking memoir of a special time of his and everyone else s life Photos
