**The Architecture of Alexandria and Egypt, C. 300 B.C. to A.D. 700** Judith McKenzie, Rhys-Davids Junior Research Fellow in Archaeology Judith McKenzie, Peter Roger Stuart Moorey, 2007-01-01 This masterful history of the monumental architecture of Alexandria as well as of the rest of Egypt encompasses an entire millennium from the city's founding by Alexander the Great in 331 B.C. to the years just after the Islamic conquest of A.D. 642 Long considered lost beyond recall the architecture of ancient Alexandria has until now remained mysterious But here Judith McKenzie shows that it is indeed possible to reconstruct the city and many of its buildings by means of meticulous exploration of archaeological remains written sources and an array of other fragmentary evidence The book approaches its subject at the macro and the micro level from city planning building types and designs to architectural style It addresses the interaction between the imported Greek and native Egyptian traditions the relations between the architecture of Alexandria and the other cities and towns of Egypt as well as the wider Mediterranean world and Alexandria's previously unrecognized role as a major source of architectural innovation and artistic influence Lavishly illustrated with new plans of the city in the Ptolemaic Roman and Byzantine periods reconstruction drawings and photographs the book brings to life the ancient city and uncovers the true extent of its architectural legacy in the Mediterranean world

**Sagalassos I** Marc Waelkens, 1993 Sagalassos once the metropolis of the Western Taurus range Pisidia Turkey was only thoroughly surveyed in 1884 and 1885 by an Austrian team directed by K. Lanckoronski In 1986-1989 this work was resumed by a British-Belgian team co-directed by Dr. Stephen Mitchell University College of Swansea and by Prof. Dr. Marc Waelkens Catholic University of Leuven In 1990 Sagalassos became a full-scale Belgian project and a leading center for interdisciplinary archaeological and archaeometrical research Due to its altitude the site is one of the best preserved towns from classical antiquity with a rich architectural and sculptural tradition dating from the second century B.C. to the sixth century A.D. From early Imperial times until the early Byzantine period a complete range of coarse and red slip wares was produced locally Excavations are concentrated on the upper and lower agoras to document the political and commercial life in the town and also in the area where a late Hellenistic fountain house which still functions to date and a Roman library were discovered Major efforts are undertaken to restore the excavated monuments in their old glory Several disciplines integrate the town again within its ancient environment and document the central role which Sagalassos played in

the area     Outlines of the History of Architecture Rexford Newcomb,1922     **Pergamon and Rome: Culture, Identity, and Influence** ,2025-06-19 This interdisciplinary volume provides the first comprehensive study of Rome s relationship with the kingdom and city of Pergamon It surveys the rich and diverse interactions between these two cities from the late third century BCE to the fourth century CE ranging across multiple cultural spheres including art and architecture history and politics literature and poetry philosophy and thought scholarship and rhetoric The book reassesses the nature scope and extent of Pergamon and Rome s so called special relationship shedding light on much discussed problems offering new evidence for their cultural interactions and questioning long established assumptions One recurrent theme concerns the limitations of our knowledge extant evidence is limited and often skewed by later Roman sources and it is frequently very difficult to identify and define cultural features that are distinctively Pergamene Nevertheless there was certainly an important relationship between these two cities which this volume seeks to map out with greater nuance precision and breadth setting it within a wider interconnected Hellenistic context As a whole the volume reflects on the scholarly reception of Pergamon uncovering how and when a certain view of a cohesive Pergamene culture took shape among modern scholarship and what factors prejudices and assumptions undergirded its creation It also challenges and rethinks the frameworks that shape our view of cultural activity in the Hellenistic world emphasizing the porousness of cultural movements across political boundaries This book will be of interest not only to scholars of Roman culture but also to those interested in the impact of Hellenistic culture on Rome more generally and to scholars engaged with theories and models of cultural influence     A World History of Architecture Marian Moffett,Michael W. Fazio,Lawrence Wodehouse,2003 The Roman architect and engineer Vitruvius declared firmitas utilitas and venustas firmness commodity and delight to be the three essential attributes of architecture These qualities are brilliantly explored in this book which uniquely comprises both a detailed survey of Western architecture including Pre Columbian America and an introduction to architecture from the Middle East India Russia China and Japan The text encourages readers to examine closely the pragmatic innovative and aesthetic attributes of buildings and to imagine how these would have been praised or criticized by contemporary observers Artistic economic environmental political social and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients society at large and future generations     *The Journal of Hellenic Studies* ,1904

A Companion to the Archaeology of the Roman Empire, 2 Volume Set Barbara Burrell,2024-03-13 A one of a kind exploration of archaeological evidence from the Roman Empire between 44 BCE and 337 CE In A Companion to the Archaeology of the Roman Empire distinguished scholar and archaeologist Professor Barbara Burrell delivers an illuminating and wide ranging discussion of peoples institutions and their material remains across the Roman Empire Divided into two parts the book begins by focusing on the unifying factors institutions and processes that affected the entire empire This ends with a chapter by Professor Greg Woolf Ronald J Mellor Professor of Ancient History at UCLA which summarizes and

enlarges upon the themes and contributions of the volume. Meanwhile the second part brings out local patterns and peculiarities within the archaeological remains of the City of Rome as well as almost every province of its empire. Each chapter is written by a noted scholar whose career has focused on the subject. Chronological coverage for each chapter is formally 44 BCE to 337 CE but since material remains are not always so closely datable most chapters center on the first three centuries of the Common Era plus or minus 50 years. In addition the book is amply illustrated and includes new and little known finds from oft ignored provinces. Readers will also find a thorough introduction to the peoples and operations of the Roman Empire including not just how the center affected the periphery Romanization but how peripheral provinces operated on their own and among their neighbors. Comprehensive explorations of local patterns within individual provinces. Contributions from a diverse panel of leading scholars in the field. A unique form of organization that brings out systems across the empire such as transport across sea rivers and roads monetary systems pottery and foodways the military construction and technology. Perfect for graduate and advanced undergraduate students of archaeology and the history of the Roman Empire. A Companion to the Archaeology of the Roman Empire will also earn a place in the libraries of professional archaeologists in other fields including Mayanists medievalists and Far Eastern scholars seeking comparanda and bibliography on other imperial structures.

Origins of the Colonnaded Streets in the Cities of the Roman East Ross Burns, 2017-06-02. The colonnaded axes define the visitor's experience of many of the great cities of the Roman East. How did this extraordinarily bold tool of urban planning evolve? The street instead of remaining a mundane passage a convenient means of passing from one place to another was in the course of little more than a century transformed in the Eastern provinces into a monumental landscape which could in one sweeping vision encompass the entire city. The colonnaded axes became the touchstone by which cities competed for status in the Eastern Empire. Though adopted as a sign of cities prosperity under the Pax Romana they were not particularly Roman in their origin. Rather they reflected the inventiveness fertility of ideas and the dynamic role of civic patronage in the Eastern provinces in the first two centuries under Rome. This study will concentrate on the convergence of ideas behind these great avenues examining over fifty sites in an attempt to work out the sequence in which ideas developed across a variety of regions from North Africa around to Asia Minor. It will look at the phenomenon in the context of the consolidation of Roman rule.

*Jesus as Mediator* Malcolm Gill, 2008 This book addresses the influence of the imperial cult in first century AD Asia Minor and its subsequent relevance to the reading of the New Testament In particular this work argues through a contrapuntal reading of 1 Timothy 2 1 7 that the early Christian community strongly resisted the Emperor's claim to be the mediator between the gods and humanity In contrast to this claim the author shows that 1 Timothy 2 1 7 can be read as a polemic from a minority community the Christian church in Ephesus against the powerful voice of the Roman Empire in regard to divine mediation

**Temples and Towns in Roman Iberia** William E. Mierse, 2023-12-22 This is the first comparative study of Roman architecture on the Iberian peninsula covering six centuries from the arrival of the Romans in the third century B C until the decline of urban life on the peninsula in the third century A D During this period the peninsula became an influential cultural and political region in the Roman world Iberia supplied writers politicians and emperors a fact acknowledged by Romanists for centuries though study of the peninsula itself has too often been brushed aside as insignificant and uninteresting In this book William E Mierse challenges such a view By examining in depth the changing forms of temples and their placement within the urban fabric Mierse shows that architecture on the peninsula displays great variation and unexpected connections It was never a slavish imitation of an imported model but always a novel experiment Sometimes the architectural forms are both new and unexpected in some cases specific prototypes can be seen but the Iberian form has been significantly altered to suit local needs What at first may

seem a repetition of forms upon closer investigation turns out to be theme and variation Mierse brings to his quest an impressive learning including knowledge of several modern and ancient languages and the archaeology of the Roman East which allows him a unique perspective on the interaction between events and architecture This is the first comparative study of Roman architecture on the Iberian peninsula covering six centuries from the arrival of the Romans in the third century B C until the decline of urban life on the peninsula in the third century A D During this peri
