The Hidden Web A Sourcebook serves as a valuable source of information about the Hidden Web much of which comprises websites containing statistical information or data from a wide variety of government agencies. The concepts, search techniques and specific websites presented will be helpful in information literacy instruction and the teaching of research skills. A Guide to Finding Quality Information on the Internet Alison Cooke, 2001. This book addresses the growing problem of how to sort the quality sites from the mass of junk available. Uniquely it suggests a system of criteria and guidelines developed through empirical research for selecting and evaluating high quality information resources. It also advises on devising checklists and rating schemes for numerically evaluating the quality of information. This edition updates the user on the latest developments in Internet based search tools for locating quality information including search engines, subject catalogues and directories, rating and reviewing services, subject based gateway services, virtual libraries. Information and guidance about the new Resource Discovery Network, the potential role and usefulness of metadata in locating quality information and using web citations for retrieving quality material have also been added to this edition. Step by step examples have been included on how to evaluate particular types of resources available via the Internet.
