G. Neufeld, M. Ito, 2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Zurich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all the authors of the papers that were submitted We also thank several organizations which have

contributed financially to this workshop specially NSERC ASI CICS R UBC MPR Teltech and Newbridge Networks

Architecture and Protocols for High-Speed Networks Otto Spaniol, Andre Danthine, Wolfgang Effelsberg, 1994-10-31
Multimedia data streams will form a major part of the new generation of applications in high speed networks Continuous media streams however require transmission with guaranteed performance In addition many multimedia applications will require peer to multipeer communication Guaranteed performance can only be provided with resource reservation in the network and efficient multipeer communication must be based on multicast support in the lower layers of the network Architecture and Protocols for High Speed Networks focuses on techniques for building the networks that will meet the needs of these multimedia applications In particular two areas of current research interest in such communication systems are covered in depth These are the protocol related aspects such as switched networks ATM MAC layer network and transport layer and the services and applications Architecture and Protocols for High Speed Networks contains contributions from leading world experts giving the most up to date research available It is an essential reference for all professionals engineers and researchers working in the area of high speed networks
