Pulling Together Jason Dorland, 2017-05-15 A former Olympic rower reflects on his evolution from ultra competitive athlete to supportive coach and offers his game changing thoughts on achieving success Once the embodiment of an aggressive athlete Jason Dorland used to identify himself according to the results of his competitions winner or loser The elite rower was raised with an in it to win it attitude and was trained to think of every competitor as an enemy It took a devastating loss at the 1988 Olympic Games to shatter this destructive way of thinking and it took the advice of middle distance runner Robyn Meagher who would later become Dorland s wife to help re shape his views on what it truly means to

win both in sport and in life When he retired from competition and became an elite rowing coach Dorland knew he had to produce results but vowed to adopt a more process based approach to competition than the one he had been taught It was a radical shift that was not always welcomed by the sporting community However the outcomes were nothing short of extraordinary Dorland found that by creating an emotionally safe environment for his athletes they felt free to fail yet ultimately achieved success beyond their wildest dreams Pulling Together reflects on Dorland s coaching philosophy the lessons his sport has taught him and how those lessons can be applied both on and off the playing field **Australian Sport--better by Design?** Bob Stewart,2004 Publisher Description Motor Learning and Control for Practitioners Cheryl Coker,2021-09-30 With an array of critical and engaging pedagogical features the fifth edition of Motor Learning and Control for Practitioners offers the best practical introduction to motor learning available This reader friendly text approaches motor learning in accessible and simple terms and lays a theoretical foundation for assessing performance providing effective instruction and designing practice rehabilitation and training experiences that promote skill acquisition Features such as Exploration Activities and Cerebral Challenges involve students at every stage while a broad range of examples helps readers put theory into practice The book also provides access to a fully updated companion website which includes laboratory exercises an instructors manual a test bank and lecture slides As a complete resource for teaching an evidence based approach to practical motor learning this is an essential text for undergrad and post grad students researchers and practitioners alike who plan to work in the areas of motor learning motor control physical education kinesiology exercise science coaching physical therapy or dance Motor Learning and Control for Practitioners Cheryl A. Kaplan,David P. Norton,2006-02-23 Most organizations consist of multiple business and support units each populated by highly trained experienced executives But often the efforts of individual units are not coordinated resulting in conflicts lost opportunities and diminished performance Robert S Kaplan and David P Norton argue that the responsibility for this critical alignment lies with corporate headquarters In this book the authors apply their revolutionary Balanced Scorecard management system to

corporate level strategy revealing how highly successful enterprises achieve powerful synergies by explicitly defining corporate headquarters role in setting coordinating and overseeing organizational strategy Based on extensive field research in organizations worldwide Alignment shows how companies can build an enterprise level Strategy Map and Balanced Scorecard that clearly articulate the enterprise value proposition how the enterprise creates value above that achieved by individual business units operating alone The book provides case studies actionable frameworks and sample scorecards that show how to align business and support units boards of directors and external partners with the corporate strategy and create a governance process that will ensure that alignment is sustained The next breakthrough in strategy execution from the field s premier thinkers Alignment shows how today s companies can unlock unrealized value from enterprise synergies
