We are All Multiculturalists Now Nathan Glazer, 1998 The melting pot is no more Where not very long ago we sought assimilation we now pursue multiculturalism Nowhere has this transformation been more evident than in the public schools where a traditional Eurocentric curriculum has yielded to diversity and often to confrontation and confusion In a book that brings clarity and reason to this highly charged issue Nathan Glazer explores these sweeping changes He offers an incisive account of why we all advocates and skeptics alike have become multiculturalists and what this means for national unity civil society and the education of our youth Focusing particularly on the impact in public schools Glazer dissects the four issues uppermost in the minds of people on both sides of the multicultural fence Whose truth do we recognize in the curriculum Will an emphasis on ethnic roots undermine or strengthen our national unity in the face of international disorder Will attention to social injustice past and present increase or decrease civil disharmony and strife Does a multicultural curriculum enhance learning by engaging students interest and by raising students self esteem or does it teach irrelevance at best and fantasy at

worst Glazer argues cogently that multiculturalism arose from the failure of mainstream society to assimilate African Americans anger and frustration at their continuing separation gave black Americans the impetus for rejecting traditions that excluded them But willingly or not we are all multiculturalists now Glazer asserts and his book gives us the clearest picture yet of what there is to know to fear and to ask of ourselves in this new identity Social and Cultural Foundations in Global Studies Eve Stoddard,John Collins,2016-10-04 From the Foundations in Global Studies series this text offers students a fresh comprehensive multidisciplinary entry point to the study of the social and cultural aspects of global studies After a brief introduction to global studies the early chapters of the book survey the key concepts and processes of globalization as well as a critical look at the meaning and role globalization Students are guided through the material with relevant maps resource boxes and text boxes that support and guide further independent exploration of the topics at hand The second half of the book features interdisciplinary case studies each of which focuses on a specific issue **Concepts and Trends in Global**
