Berry, Jean S. Phinney, David L. Sam, Paul Vedder, 2022-09-30 The Classic Edition of Immigrant Youth in Cultural Transition first published in 2006 includes a new introduction by the editors describing the ongoing

relevance of this volume in the context of future challenges for this vital field of study. It emphasizes the importance of continued actions and policies to improve the quality of interactions between multiple ethno cultural groups and highlights how these issues have developed the field of cross cultural psychology. In the original text, an international team of psychologists with interests in acculturation, identity, and development describes the experience and adaptation of immigrant youth using data from over 7 000 immigrant youth from diverse cultural backgrounds and national youth living in 13 countries of settlement. They explore the way in which immigrant adolescents carry out their lives at the intersection of two cultures: those of their heritage group and the national society, and how well these youth are adapting to their intercultural experience. It explores four distinct patterns followed by youth during their acculturation: an integration pattern in which youth orient themselves to and identify with both cultures; an ethnic pattern in which youth are oriented mainly to their own group; a national pattern in which youth look primarily to the national society; and a diffuse pattern in which youth are uncertain and confused about how to live interculturally. The study shows the variation in both the psychological adaptation and the sociocultural adaptation among youth, with most adapting well. This Classic Edition continues to be highly valuable reading for researchers, graduate students, and public policy makers who have an interest in public health, psychology, anthropology, sociology, demography, education, and psychiatry. *Philosophical Magazine*, 1910

Women in Presidential Cabinets Maria C. Escobar-Lemmon, Michelle M. Taylor-Robinson, 2016-07-01 Though parity is still rare, presidential cabinets contain more women than ever before. Who are these women, and what types of political capital resources do they bring to the administration? Are they new types of political players, or very much like the men who have traditionally run the government? And once they gain office, are they treated equally in the cabinet? Do they have the capacity to be as effective as their male counterparts? Drawing on data from five presidential democracies—Argentina, Chile, Colombia, Costa Rica, and the United States—*Women in Presidential Cabinets* examines the backgrounds, connections, and credentials of all full-rank cabinet ministers in presidential administrations over the course of two decades to determine if women and men bring similar numbers and diversity of political capital resources to the administration. Maria C. Escobar-Lemmon and Michelle M. Taylor-Robinson find that, with a few notable exceptions, presidents select men and women with similar work and education backgrounds, political experience, and linkages to related interest groups. There are, however, differences across types of posts and countries. They evaluate the treatment and effectiveness of similarly credentialed male and female ministers on four benchmarks. Specifically, they examine whether women with equal qualifications can really obtain all posts, or whether glass ceilings persist in some areas. They then turn to the ability of women to hold onto a post, considering the nature and circumstances surrounding their departures from office and how long they remain in office. In doing so, they uncover evidence that female ministers in Latin America stand on an unequal playing field when it comes to the ability to enact policy through legislation. Ultimately, Escobar-Lemmon and Taylor-Robinson show conclusively that while women lack numerical equality,

they are no longer tokens instead appearing positioned to exercise power at the highest levels within the executive branch
