Grosse, 2007-08-14 This book addresses one of the most important material categories Materials used for constructions A large percentage of the gross national product of most countries goes into infrastructure and buildings This statement is true not only for the present but for most other periods in history and for most cultures This explains why understanding the behavior of construction materials has always been the object of intense investigations The construction industry consumes extreme volumes of material and the growing demand for quality and safety requires continuous improvement of materials and material compositions A deep understanding of material behavior is essential to enable efficient construction light weight or heavily burdened structures ask for the development of innovative composites or new material compositions Rapid economic growth and a dense and growing population require sensitive and sustainable use of resources Finally efficient use of resources means extending the usage of existing structures so non destructive testing methods are needed to assess the safety and utility of these structures Civil Engineers and Material Scientists from all over the world are openly discussing ideas for new materials and for structural health monitoring Over the last decade many innovations have come to fruition primarily in the field of composites but also for improving the design of existing material This is especially true for concrete perhaps the most used material in the world broadening its range of applications and improving performance *Fibre Reinforced Cementitious Composites* Arnon Bentur, Sidney Mindess, 2006-11-16 Advanced cementitious composites can be designed to have outstanding combinations of strength five to ten times that of conventional concrete and energy absorption capacity up to 1000 times that of plain concrete This second edition brings together in one volume the latest research developments in this rapidly expanding area The book is split *Fifth International Workshop on High Performance Fiber Reinforced Cement Composites (HPFRCC5)* Antoine E.
