High Performance Sailing

Bernard Smith

High Performance Sailing:

High Performance Sailing Frank Bethwaite, 1996 Based on 25 years of research and Olympic coaching High Performance Sailing reinvents the strategies of sailboat racing It presents revolutionary explanations of wind prediction and boat design a fundamental rethinking of how to sail a boat fast literally faster than the wind Bethwaite's theories boosted the average speed of the highest performance sailboats from two thirds the windspeed to windspeed or faster Bethwaite is Australia's most successful Olympic coach and his family includes three Olympic sailing champions and three world champions This book will have a revolutionary impact on racing sailboats and the way they are sailed Essential for any serious racing sailor Gary Jobson It represents a breakthrough in the way that it relates the theoretical aspects of wind seastate and rig shape to the way a crew would sail and handle a boat during a race It has the potential to be a standard reference work on the subject and will not quickly date It is a book that my Olympic squad will benefit from Rod Carr British Olympic Sailing Team Manager Frank's book is a treasure chest full of brilliant insights into the ways of air and water as they flow around our sailing boats Best of all he tells us what to do when we go sailing Alan Payne Designer of America's Cup challengers Greta I and II Allowed only one if only in yacht racing it would have been to have read Frank Bethwaite's High Performance Sailing years ago and to have it available for constant reference Taking all the advice which he offers from his wide experience would have made championship winning a great deal easier Bob Fisher Journalist broadcaster and winner of many national and international sailing championships The most significant scientific thinking about sailboat racing to come along in three decades A brilliant and important book for serious racing sailors Ed Adams US Sailing Team Coach national North American and world champion sailor Bethwaite's grasp of the entire spectrum of sailing speed is unique and formidable Gerry Hoyt Yacht designer sailing speed innovator

Higher Performance Sailing Frank

Bethwaite, 2013-08-04 Monumental Bob Ross Australian Sailing High Performance Sailing is now regarded as the bible of racing sailors and carries a string of endorsements from high achievers Since its publication in 1984 racing yachts and dinghies have developed out of all recognition a new high tech breed of apparent wind fast racers has claimed the water and so far no one has applied themselves seriously to analysing what makes these boats sail fast and what will make them faster This is Frank Bethwaite's ground breaking achievement in Higher Performance Sailing By means of extensive research and working with sailors of different racing calibre Bethwaite analyses how to harness the apparent wind for increased speed and better position on your rivals Higher Performance Sailing will provide the key to racing sailors dreams Praise for Bethwaite's High Performance Sailing It represents a breakthrough It is a book that my Olympic squad will benefit from Rod Carr former British Olympic Sailing Team Manager Allowed only one if only in yacht racing it would have been to have read Higher Performance Sailing years ago Bob Fisher journalist broadcaster and international championship winner *Single-handed Racing* Derrick Fries, 1986

Fast Handling Technique Frank Bethwaite, 2013-05-12 From the author of the bestselling

High Performance Sailing and Higher Performance Sailing comes the first scientific analysis of what makes fast sailors fast. Eschewing the idea that luck or innate talent are the keys to success, Frank Bethwaite shows how knowledge truly is power. Making use of video cameras aligned to GPS read outs to track the fastest racers, he meticulously analyses what winners do and how they do it to show the rest of us how to get the best out of a racing craft. Frank Bethwaite's previous books were groundbreaking bibles that applied scientific theories to how sails and hulls interact with wind and water to influence boat speed. But whilst they applied scientific theories to boat construction, they didn't apply science to practical boat handling. This book fills that gap and then goes further. Budding racers of all levels will welcome this unique book as a godsend. It will inform, instruct and enable them to employ the techniques and timing of the most successful racers and make racing more competitive for participants and more exciting for those of us watching.

Designing the Dynamic Jane Burry, 2013. Who knows more about the performance impact of design changes in real time than the sailor and sail trimmer in an ocean race? Performance can be most influential on design decision making when the performance response to design change is experienced in real time. In architecture and design, dynamic feedback is the computational and analogue design challenge of the hour: how to experience within dynamic digital and physical design models as those changes are actually happening. So in this book, the challenge is first explored by looking beyond the design of the static built infrastructure of the city to the ultimate in reflexive action and high performance design: sailboat racing. Successful design decision making relies on design team interaction between individuals of very diverse expertise and points of departure: generalists and specialists. *Designing the Dynamic* brings together leading researchers from architecture, boat design, industrial design, mathematics, aerospace, structural engineering and computer science to explore the design and representation of dynamic systems. The authors expose diverse aspects of the subject ranging from the empirical science and sociology to the deep poetry of designing with dynamic phenomena.

Major Selling Point: This is a cutting edge design book that will be of real interest to those involved in the dynamics of practical, super-efficient design methods as well as those with an interest in sailing and maximising the efficiency of sails in racing conditions.

High Speed Sailing Joseph Norwood, 1979. *Performance Calculation Methods for High Speed Sailing Craft* Malcolm Barnsley, 2025-01-03. This book takes a fresh look at the fundamental physics of sailing, emphasising factors that are unique to high speed boats and building logically from the fluid force mechanisms through the hydro and aero components to the numerous boat configurations that now exist. Suitable performance calculations are clearly explained for all the dominant types: Windsurfers, kite surfers, kite foilers, trimaran, catamaran, planing monohulls, moths etc, along with fascinating observations and speculation of the potential for further increase in speed. In addition, the book includes exclusive calculations of the performance in waves for some popular boat types. A selection of the calculations can be downloaded with an access code that comes free with the book. This book should be on any technically minded sailing person's book shelf.
