*Acute and Critical Care in Adult Nursing* Desi Tait,Jane James,Catherine Williams,David Barton,2012-05-17 The assessment and management of patients who are critically or acutely ill or showing signs of clinical deterioration is a crucial nursing skill This book will help adult nursing students to competently manage care of critically and acutely ill patients and to recognise and deal with the early signs of deterioration The book takes a practical real life approach to care with each chapter focussing on patients with specific problems then interweaving the knowledge and skills

needed to care for that patient including the nurse's role and responsibilities assessment diagnosis planning management related pathophysiology and collaborative team working Care of the Acutely Ill Adult Fiona Creed, Christine Spiers, 2010-03-25 Aimed at all nurses this key textbook equips them with the knowledge and skills required to care for the deteriorating patient in the clinical environment The assessment recognition and rapid escalation of the deteriorating patient is emphasized throughout the book Using a unique system based approach each chapter contains structured learning outcomes and concludes with a competence based skills assessment which can be used to assess practice skills These skills are recommended as essential for every nurse in an acute area and key to successful practice Using real life case studies to link knowledge to actual practice and written by senior nurses for nurses this book is an essential purchase for all nurses who work in acute care settings *Nursing the Acutely Ill Adult: Case Book* Karen Page, Aidin McKinney, 2012-09-16 Nursing the Acutely ill Adult is a comprehensive text Each chapter draws on the clinical and academic expertise of the author and follows a structured approach that explores the case problems altered physiology and nursing interventions and care It is an ideal reference resource for nurses who wish to reflect and explore the evidence base underpinning the complexities of nursing acutely ill adults Alison Eddleston Senior Lecturer Acute Operative and Critical Care School of Health University of Central Lancashire UK This informative case based book encourages the reader to critically consider the assessment and care needed by acutely ill adult patients with a variety of underlying conditions Nursing and other healthcare students should find that the book helps with the development of an integrated mindset and evidence based decision making Janice Christie Senior Lecturer in Public Health and Primary Care City University London UK The book will enable practitioners to approach the assessment of patients with a range of acute conditions in a structured manner The case scenarios are very realistic and there are good explanations of underlying pathophysiology There is also a well structured explanation of investigations and priority interventions This book will enable the development of expertise in assessment and prioritising of care in a range of settings Laurence Leonard Senior Lecturer Kingston University and St George's University of London UK The complexity of caring for patients who become acutely ill or have deteriorated can be a daunting challenge for nurses Part of a case book series this accessible book contains 17 in depth case studies relating to care of the acutely ill adult The cases combine pathophysiology pharmacology and nursing care in realistic clinical settings providing an engaging resource for nursing students taking acute care modules This handy book Follows a step by step question and answer format Facilitates the application of theory to practice through the use of clinical case studies Considers the most common acute illness scenarios that are frequently encountered by practitioners Integrates knowledge of pathological processes applied pharmacology and related nursing implications to acute illness Nursing the Acutely Ill Adult Case Book offers a unique way of relating theory to practice making it key reading for undergraduate nursing students It will also be beneficial to students in areas such as intensive care as well as nurse educators looking for a way to bridge the gap between the classroom and clinical practice

Contributors Patrick Gallagher Niall McKenna Billie Joan Rice      **Neuroscience Nursing** Sue Woodward, Ann-marie Mestecky, 2010-12-01 Superior An important resource for nurses Shanne McNamara Vice President British Association of Neuroscience Nurses Neuroscience Nursing is a comprehensive practical text that reflects both the richness and the diversity of contemporary neuroscience nursing It aims to inform the practice of neuroscience nursing through the report of current research best available evidence policy and education This important new book is divided into several sections exploring anatomy and physiology of the nervous system assessment interpretation and management of specific problems in the neurological patient neurological investigations and neurosurgical procedures management of patients with intracranial disorders and management of patients with long term conditions It also explores the underpinning concepts of neuroscience care including its history and development and legal and ethical issues Uniquely this text also includes patients perspectives of living with a variety of neurological conditions Key features The first evidence based UK neuroscience textbook for nurses Extensive full colour illustrations throughout Applicable to a wide variety of settings including prevention primary care acute and critical care rehabilitation and palliative care Contributions from nurse specialists nurse consultants academics and subject experts from throughout the UK      **Manual of Clinical Paramedic Procedures** Pete Gregory, Ian

Mursell, 2015-06-01 I can enthusiastically recommend the Manual of Clinical Paramedic Procedures as the book that I wish had been available to me when I was studying to become a paramedic From the foreword by Professor Malcolm Woollard Chair College of Paramedics Professor in Pre hospital and Emergency Care Director Pre hospital Emergency Cardiovascular Care Applied Research Group Coventry University Clinical procedures are a fundamental aspect of care for practitioners working in pre hospital settings The Manual of Clinical Paramedic Procedures is written specifically to support the practice of paramedics ambulance technicians first responders and volunteer ambulance personnel It presents up to date evidence based expert knowledge enabling paramedics to deliver effective patient focused care This accessible handbook provides a comprehensive exploration of core competencies and skills looking at topics including Aseptic Technique Airway Management Assisted Ventilation Cardiopulmonary Resuscitation Defibrillation and External Cardiac Pacing Observations Pain Assessment Management Respiratory Therapy Spinal Management and Venepuncture Each chapter provides the relevant anatomy physiology evidence based rationales for each procedure and contraindications of use Key features The first UK text to explore clinical procedures for paramedics With further reading and illustrations throughout All procedures include the rationale for the action recommended Guides paramedics in the clinical application of evidence based procedures

**Clinical Nursing Practices** Sarah Renton, Claire McGuinness, Evelyn Strachan, 2019-10-08 The new edition of Clinical Nursing Practices reflects the many changes in nurse education and practice A team of clinical and education experts has updated the core practices contained within this text while to ensure continuity the previous editors have acted as consultants in the development of this edition To reflect the continuing evolution of nursing and nursing practice this new 6th

edition emphasizes the importance of evidence based practice values based care person centred care health and social care integration and interprofessional education To encourage reflective practice self assessment questions remain at the end of each chapter for some of the practices Where appropriate certain practices are evidenced mainly by National Guidelines and Standards such as Cardio Pulmonary Resuscitation Infection Control and Blood Transfusion consequently the presentation of the skill or procedure reflects this The updated text addresses the wider issues which impact on everyday nursing and healthcare practice and is specially written to meet the needs of nurses today The core philosophy of book however remains the same to encourage its readers to deliver the highest quality care to each individual patient safely and effectively Simple and straightforward step by step account of the key clinical procedures with clear learning outcomes For nurses learning procedures for the first time for newly qualified nurses needing to check their knowledge or for nurses returning to work needing an update or refresher Equips readers to deliver high quality safe and effective care to patients References the new NMC standards of proficiency Updates to all chapters and skills New Action Rationale format clearly shows the reasons for performing each procedure 25 new illustrations New editor team

**Critical Care Assessment by Midwives** Maureen Boyle, Judy Bothamley, 2018-06-27 Over the last ten years pregnancy has not only become more complicated for many women but the traditional provision of general intensive care units has been reduced To bridge this gap critical care units usually staffed by midwives have been set up in many maternity units This textbook is an accessible and comprehensive introduction to this emerging area of practice Critical Care Assessment by Midwives also notably sets out a template for assessment of women that will enable early identification of deteriorating health Serious illness can arise subsequent to an emergency a pre existing illness or a complication of pregnancy but can also occur in the context of what appears to be a low risk pregnancy For this reason all midwives need to be skilled in assessment that facilitates timely appropriate referrals and saves lives It covers ABCDE assessment tailored for midwives assessment of cardiac conditions assessment of respiratory conditions assessment of neurological conditions pre eclampsia haemorrhage shock including hypovolaemia sepsis and anaphylaxis haemodynamic monitoring fluid replacement and balance ketoacidosis hypoglycaemia and sickle cell crisis Covering the context of care relevant pathophysiology signs and symptoms specific assessment in detail relevant drugs assessment of the fetus summaries of management psychosocial support and the specific professional responsibilities of the midwife this is an essential guide for all midwives and midwifery students

*Accident & Emergency* Brian Dolan, Lynda Holt, 2008 This edition shows nurses why they are doing what they do rather than just how for a range of A E conditions It has sections that cover potential problem areas such as paediatrics and treating the mentally ill A E patient A basic A P section is included so even the most experienced nurse can refresh their knowledge

**Ward-based Critical Care: a guide for health professionals** Ann M Price, Dr Sally A Smith, Dr Alistair Challiner, 2016-01-01 Like the original Ward based Critical Care this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting It should be of

value to a wide range of healthcare professionals including junior doctors nurses physiotherapists and students It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections The book is still structured around the ABCDE approach to assessing and managing patients as this is promoted in critical care and resuscitation care training The focus on practical examples and hot tips to aid memory of key points continues All the chapters have been updated with the most recent guidance as available at the time of writing This has meant that some chapters have required major revisions while others have remained relatively unchanged Some new chapters have been included such as the ones on anaphylactic shock patient safety dealing with pregnant women in the ward setting and massive blood transfusion In addition each section now starts with a chapter giving an overview of the A E approach in order to provide more detail about assessing and managing those aspects of patient care This informative book contains many useful features such as clinical scenarios hot tips and practical skills and the text is richly illustrated and cross referenced throughout

*The Royal Marsden Manual of Clinical Nursing Procedures* Lisa Dougherty, Sara Lister, 2015-03-05 Nationally recognised as the definitive guide to clinical nursing skills The Royal Marsden Manual of Clinical Nursing Procedures has provided essential nursing knowledge and up to date information on nursing skills and procedures for over 30 years Now in its 9th edition this full colour manual provides the underlying theory and evidence for procedures enabling nurses to gain the confidence they need to become fully informed skilled practitioners Written with the qualified nurse in mind this manual provides up to date detailed evidence based guidelines for over 200 procedures related to every aspect of a person's care including key information on equipment the procedure and post procedure guidance along with full colour illustrations and photos Following extensive market research this ninth edition contains the procedures and changes in practice that reflect modern acute nursing care includes thoroughly reviewed and updated evidence underpinning all procedures is organised and structured to represent the needs of a patient along their care pathway integrates risk management into relevant chapters to ensure it is central to care contains revised procedures following hands on testing by staff and students at Kingston University is also available as an online edition
