Higher Education: Handbook of Theory and Research J.C. Smart, 2012-12-06 To recapitulate Greeks differ from Independents and from the academy's value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy's value priorities i.e. students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system's effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy's agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy's educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy's agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

Bridging the Gap between the Abundance of American Higher Education Talent and the Immense Foreign Demand for It Richard J. Joseph, 2022-11-03 The gap between the abundance of American higher education talent and the immense foreign demand for it is the great chasm in global education It is a gulf of lost opportunities It is also a space of great economic potential This book describes the great chasm examines factors underlying it and suggests ways to bridge the gap to realize this potential The abundance of talent stems from the slackening

growth of the U S higher education sector in the New Millennium Contributing to the slowdown are flat enrollments adverse demographic trends U S visa restrictions and intensifying competition The immense foreign demand has been fueled by the secular expansion of the global economy It has been shaped by the pressing need in emerging markets to develop an educated workforce The great chasm creates an opportunity for American academic institutions to extend their global reach Bridging the gap however is not an easy feat for most U S colleges and universities It is complicated by an institutional culture that is averse to commercialization an organizational structure that is operationally slow and a governance system that often leads to indecision conflict and paralysis Bridging the gap requires fundamental changes in the culture organization and governance of traditional U S academic institutions These changes will pave the way for international expansion which could enhance the financial well being of these institutions the social well being of less developed nations and the critical role that America plays globally in knowledge creation the dissemination of ideas and the pursuit of the truth
