Kinship To Mastery Biophilia In Human Evolution And Development:

Kinship to Mastery Stephen R. Kellert, 2003-10 Kinship to Mastery is a fascinating and accessible exploration of the notion of biophilia the idea that humans having evolved with the rest of creation possess a biologically based attraction to nature and exhibit an innate affinity for life and lifelike processes Stephen R Kellert sets forth the idea that people exhibit different expressions of biophilia in different contexts and demonstrates how our quality of life in the largest sense is dependent upon the richness of our connections with nature While the natural world provides us with material necessities food clothing medicine clean air pure water it just as importantly plays a key role in other aspects of our lives including intellectual capacity emotional bonding aesthetic attraction creativity imagination and even the recognition of a just and purposeful existence As Kellert explains each expression of biophilia shows how our physical material intellectual emotional and spiritual well being is to a great extent dependent on our relationships with the natural world that surrounds us Kinship to Mastery is a thought provoking examination of a concept that while not widely known has a significant and direct effect on the lives of people everywhere Because the full expression of biophilia is integral to our overall health our ongoing destruction of the environment could have far more serious consequences than many people think In a readable and compelling style Kellert describes and explains the concept of biophilia and demonstrates to a general audience the wide ranging implications of environmental degradation Kinship to Mastery continues the exploration of biophilia begun with Edward O Wilson s landmark book Biophilia Harvard University Press 1984 and followed by The Biophilia Hypothesis Island Press 1993 co edited by Wilson and Kellert which brought together some of the most creative scientists of our time to explore Wilson s theory in depth

Theological Foundations for Environmental Ethics Jame Schaefer, 2009 This book asks whether religion can make a positive contribution to preventing further destruction of biological diversity and ecosystems and threats to our earth The author reconstructs the teachings of Augustine Thomas Aquinas and other classic thinkers to reflect our current scientific understanding of the world

Connection to Nature, Deep Ecology, and Conservation Social Science Christian Diehm, 2020-12-15 In Connection to Nature Deep Ecology and Conservation Social Science Human Nature Bonding and Protecting the Natural World Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of identification with nature Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm

demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it Strangers to Nature Gregory R. Smulewicz-Zucker, 2012-03-22 *Strangers to Nature* challenges a reading public that has grown complacent with the standard framework of the animal ethics debate Human influence on and the control of the natural world has greater consequences than ever making the human impact on the lives of animals more evident We cannot properly interrogate our conduct in the world without a deeper understanding of how our actions affect animals It is crucial that the human animal relationship become more central to ethical inquiry This volume brings together many of the leading scholars who work to redefine and expand the discourse on animal ethics The contributors examine the radical developments that change how we think about the status of non human animals in our society and our moral obligations *Strangers to Nature* will engage both scholars and lay people by revealing the breadth of theorizing about current human non human animal relationships *Dark Green Religion* Bron Raymond Taylor, 2010 A love of green may be a human universal Deepening the palette of green scholarship Bron Taylor proves remarkably to be both an encyclopedist and a visionary Jonathan Benthall author of *Returning to Religion Why a Secular Age is Haunted by Faith* This important book provides insight into how a profound sense of relation to nature offers many in the modern world a vehicle for attaining a spiritual wholeness akin to what has been historically associated with established religion In this sense *Dark Green Religion* offers both understanding and hope for a world struggling for meaning and purpose beyond the isolation of the material here and now Stephen Kellert Yale University School of Forestry and Environmental Studies In this thought provoking volume Bron Taylor explores the seemingly boundless efforts by human beings to understand the nature of life and our place in the universe Examining in depth the ways in which influential philosophers and naturalists have viewed this relationship Taylor contributes to the further development of thought in this critically important area where our depth of understanding will play a critical role in our survival Peter H Raven President Missouri Botanical Garden Carefully researched strongly argued originally conceived and very well executed this book is a vital contribution on a subject of immense religious political and environmental importance It s also a great read Roger S Gottlieb author of *A Greener Faith Religious Environmentalism and our Planet s Future* A fascinating analysis of our emotional and spiritual relationship to nature Whether you call it dark green religion or something else Bron Taylor takes us through our spiritual relationship with our planet its ecosystems and evolution in an enlightened and completely undogmatic manner Dr Claude Martin Former Director General World Wildlife Fund An excellent collection of guideposts for perplexed students and scholars about the relationships of nature religions spirituality animism pantheism deep ecology Gaia and land ethics and for the environmentalist seeking to make the world a better place through green religion as a social force Fikret Berkes author of *Sacred Ecology Traditional Ecological Knowledge and Resource Management* *Dark Green Religion* shows conclusively how nature has inspired a growing religious movement on the planet

contesting the long reign of many older faiths Taylor expertly guides us through an astonishing array of thinkers past and present who have embraced in part or whole the new religion I was thoroughly convinced that this movement has indeed become a major force on Earth with great potential consequences for our environmental ethics Donald Worster University of Kansas In this exceptionally interesting and informative book Bron Taylor has harvested the fruits of years of pioneering research in what amounts to a new field in religious studies the study of how religious spiritual themes show up in the work of people concerned about nature in many diverse ways Taylor persuasively argues that appreciation of nature s sacred or spiritual dimension both informs and motivates the work of individuals ranging from radical environmentalists and surfers to eco tourism leaders and museum curators I highly recommend this book for everyone interested learning more about the surprising extent to which religious spiritual influences many of those who work to protect to exhibit or to represent the natural world Michael E Zimmerman Director Center for Humanities and the Arts University of Colorado at Boulder

Therapeutic Landscape Design Stefano Capolongo, Monica Botta, Andrea Rebecchi, 2023-02-04 Through an approach strongly oriented to socio health contexts and healthcare facilities with multidisciplinary contributions on the methodological and technical aspects or legislative issues the book provides tools and design strategies to plan and realize therapeutic places and healing gardens for care rehabilitation interaction and social inclusion It addresses all the technical and medical professionals like Architects Urban Planners Agronomist Sociologists Epidemiologists Public Health experts Policy Makers etc wishing to explore the link between built environment well being and health referring in particular to the direct relationship between places and therapy **The Nature Principle** Richard Louv, 2012-04-24 For many of us thinking about the future conjures up images of Cormac McCarthy s The Road a post apocalyptic dystopia stripped of nature Richard Louv author of the landmark bestseller Last Child in the Woods urges us to change our vision of the future suggesting that if we reconceive environmentalism and sustainability they will evolve into a larger movement that will touch every part of society This New Nature Movement taps into the restorative powers of the natural world to boost mental acuity and creativity promote health and wellness build smarter and more sustainable businesses communities and economies and ultimately strengthen human bonds Supported by groundbreaking research anecdotal evidence and compelling personal stories Louv offers renewed optimism while challenging us to rethink the way we live **Foundations of Environmental**

Sustainability Larry Rockwood, Ronald Stewart, Thomas Dietz, 2008-06-04 This book reviews and analyzes the period roughly from the 1950s to the present when the environment became an issue as important as economic growth or war and peace to assess the current situation and begin planning for the challenges that lie ahead Most people are aware of both the environmental destruction taking place around the world and of the specter of climate change The devastation of New Orleans by hurricane Katrina illustrates the potential for disaster when climate change is combined with the mismanaged environmental policy How did we get to this point What has been done and what can be done to avoid future environmental

disasters Thirty two contributing chapter authors among them one of the principal drafters of the National Environmental Policy Act Chief of the African Environment Division and the World Bank Vice President of the Center for Conservation Innovation at the World Wildlife Fund President of the Zoological Society of London former President of the Ecological Society of America use their unique authoritative perspective to review the evolution of environmental science and policy in the past half century Each author describes the evolution of environmental science and policy in the past half century and consider the challenges of the future Although the authors of this book come from various fields they have followed paths that have generally converged on the concept of sustainability This book attempts to define what sustainability is how we can achieve it and what the prospects for sustainability in the future are **Building for Life** Stephen R. Kellert, 2012-09-26

Sustainable design has made great strides in recent years unfortunately it still falls short of fully integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design award winning author Stephen R Kellert proposes a new architectural model of sustainability In *Building For Life* Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built environment *A Biophilic Pattern Language for Cities* Phillip B. Roös, 2022-12-06

This book presents a holistic integral sustainable design and planning method embedded in the hypothesis of biophilia our innate connection to nature used as a platform to chart a biophilic pattern language framework In *A Biophilic Pattern Language for Cities* the author positioned the innate human nature connection as critical in biophilic design and sustainable city planning solutions *The Creation: An Appeal to Save Life on Earth* Edward O. Wilson, 2010-11-29

The book that launched a movement Wilson speaks with a humane eloquence which calls to us all Oliver Sacks Called one of the greatest men alive by The Times of London E O Wilson proposes an historic partnership between scientists and religious leaders to preserve Earth's rapidly vanishing biodiversity **Encyclopedia of Religion and Nature** Bron Taylor, 2008-06-10

The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style Widely praised by reviewers and the recipient of two reference work awards since its publication see www.religionandnature.com

ern this new more affordable version is a must have book for anyone interested in the manifold and fascinating links between religion and nature in all their many senses **Handbook of Moral and Character Education** Larry Nucci, Darcia

Narvaez, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more **Corporal Compassion**

Ralph R. Acampora, 2019-11-21 Most approaches to animal ethics ground the moral standing of nonhumans in some appeal to their capacities for intelligent autonomy or mental sentience Corporal Compassion emphasizes the phenomenal and somatic commonality of living beings a philosophy of body that seeks to displace any notion of anthropomorphic empathy in viewing the moral experiences of nonhuman living beings Ralph R Acampora employs phenomenology hermeneutics existentialism and deconstruction to connect and contest analytic treatments of animal rights and liberation theory In doing so he focuses on issues of being and value and posits a felt nexus of bodily being termed symphysis to devise an interspecies ethos Acampora uses this broad based bioethic to engage in dialogue with other strains of environmental ethics and ecophilosophy Corporal Compassion examines the practical applications of the somatic ethos in contexts such as laboratory experimentation and zoological exhibition and challenges practitioners to move past recent reforms and look to a future beyond exploitation or total noninterference a posthumanist culture that advocates caring in a participatory approach **Letters from the Hive**

Stephen Buchmann, Banning Repplier, 2006-05-30 They work hard are devoted to family love sex and know the importance of a good piece of real estate Honey bees and the daily workings of their close knit colonies are one of nature s great miracles And they produce one of nature s greatest edible bounties honey More than just a palate pleaser honey was once an offering to the gods a preservative and a medicine whose sought after curative powers were detailed in ancient texts and are being rediscovered by modern medical science In Letters from the Hive Prof Stephen Buchmann takes us into the hive nursery honey factory queen s inner sanctum and out to the world of backyard gardens open fields and deserts in full bloom where the age old sexual dance between flowers and bees makes life on earth as we know it possible Hailed for their hard work harmonious society and mistakenly for their celibacy bees have a link to our species that goes beyond biology In Letters from the Hive Buchmann explores the fascinating role of bees in human culture and mythology following the honey hunters of native cultures in Malaysia the Himalayas and the Australian Outback as they risk life and limb to locate a treasure as valuable as any gold To contemplate a world without bees is to imagine a desolate place culturally and biologically and

Buchmann shows how with each acre of land sacrificed to plow parking lot or shopping mall we inch closer to what could become a chilling reality He also offers honey based recipes cooking tips and home remedies further evidence of the gifts these creatures have bestowed on us Told with wit wisdom and affection and rich with anecdote and science Letters from the Hive is nature writing at its best This is natural history to be treasured a sweet tribute that buzzes with life

The Retreat of the Elephants Mark Elvin, 2020-08-11 The eminent China scholar delivers a landmark study of Chinese culture s relationship to the natural environment across thousands of years of history Spanning the three millennia for which there are written records The Retreat of the Elephants is the first comprehensive environmental history of China It is also a treasure trove of literary political aesthetic scientific and religious sources which allow the reader direct access to the views and feelings of Chinese people toward their environment and their landscape China scholar and historian Mark Elvin chronicles the spread of the Chinese style of farming that eliminated elephant habitats the destruction of most of the forests the impacts of war on the landscape and the re engineering of the countryside through gigantic water control systems He documents the histories of three contrasting localities within China to show how ecological dynamics defined the lives of the inhabitants And he shows that China in the eighteenth century was probably more environmentally degraded than northwestern Europe around this time Indispensable for its new perspective on long term Chinese history and its explanation of the roots of China s present day environmental crisis this book opens a door into the Chinese past

Born Expecting the Pleistocene: Psychology and the Problem of Civilization Mark Seely, 2012-03-01 Anarcho primitivism meets psychological science to provide a unique perspective on the mismatch between our evolved human nature and the demands of life in a global industrial civilization Our sophisticated psychological systems reflect a finely tuned response to more than two million years of life in small broadly egalitarian foraging bands Civilization represents a catastrophic disruption of this response redirecting our natural proclivities in the service of a planet devouring machine But all is not lost The very elements of our psychology that keep us yoked to civilization s drivetrain are also the source of our potential liberation lynchpins that can be released as we work to reclaim our freedom

Values at Sea Dorinda G. Dallmeyer, 2003 The human impact on vast areas of the oceans remains relatively unregulated Sometimes in fact the only controls over our exploitation of marine resources lie in our environmental consciousness While the field of environmental ethics has explored rights and duties for land use stewardship and policy relatively little attention has been given to comparable issues of marine environments Values at Sea makes an important step toward moving environmental ethics discussions into a broader framework Gathered here are fifteen papers by an interdisciplinary group of scholars including ethicists marine scientists anthropologists economists geographers lawyers and activists From the Great Lakes to the Pacific Islands from the open sea to coastal areas the papers cover a broad array of ethical issues and policy matters related to such topics as the valuation of marine life indigenous peoples knowledge and environmental stewardship endemic and exotic species aquaculture oil spills and species protection

Sacred Ecology Fikret Berkes, 2017-09-01 *Sacred Ecology* examines bodies of knowledge held by indigenous and other rural peoples around the world and asks how we can learn from this knowledge and ways of knowing Berkes explores the importance of local and indigenous knowledge as a complement to scientific ecology and its cultural and political significance for indigenous groups themselves With updates of relevant links for further learning and over 180 new references the fourth edition gives increased voice to indigenous authors and reflects the remarkable increase in published local observations of climate change

Reframing the Emotional Worlds of the Early Childhood Classroom Samara Madrid, David Fernie, Rebecca Kantor, 2014-10-30 This volume examines the emotional world of the early childhood classroom as it affects young children whose emotional wellbeing is crucial to successful learning educators for whom teaching is never a solely cognitive act parents and administrators In a culture where issues such as bullying and teacher burnout comprise major challenges to student success this book brings together diverse voices researchers practitioners children and parents and multiple perspectives theoretical and personal to refocus attention on the pivotal role of emotion in schools To do so editors Samara Madrid David Fernie and Rebecca Kantor envision emotion as a dynamic fluid and negotiated construct performed and produced in the daily lives of children and adults alike A nuanced yet cohesive analysis *Reframing the Emotional Worlds of the Early Childhood Classroom* thus presents a challenge to the overriding concern with quantifiable classroom achievement that increasingly threatens to push the emotional lives of classroom participants to the margins of educational and public discourse
