Otherworlds Aisling Nora Byrne, 2016 This book offers a new perspective on the otherworlds of medieval literature These fantastical realms are among the most memorable places in medieval writing by turns beautiful and monstrous alluring and terrifying Passing over a river or sea or entering into a hollow hill heroes come upon strange and magical realms These places are often very beautiful filled with sweet music and adorned with precious stones and rich materials There is often no darkness time may pass at a different pace and the people who dwell there are usually supernatural Sometimes such a place is exactly what it appears to be the land of heart's desire but the otherworld can also have a sinister side trapping humans and keeping them there against their will Otherworlds Fantasy and History in Medieval Literature takes a fresh look at how medieval writers understood these places and why they found them so compelling It focuses on texts from England but places this material in the broader context of literary production in medieval Britain and Ireland The narratives examined in this book tell a rather surprising story about medieval notions of these fantastical places Otherworlds are actually a lot less other than they might initially seem Authors often use the idea of the otherworld to comment on very serious topics It is not unusual for otherworld depictions to address political issues in the historical world Most intriguing of all are those texts where locations in the real world are reimagined as otherworlds The regions on which this book focuses Britain Ireland and the surrounding islands prove particularly susceptible to this characterization

This World, Other Worlds María Cátedra Tomás, 1992-11-15 The Vaqueiros de Alzada a cattle herding people in the Asturian mountains of Spain have one of the highest suicide rates in Europe and an attitude toward death that gives this statistic unusual meaning This World Other Worlds considers death among the Vaqueiros as a central cultural fact which reveals local ideas about the origin and destiny of humans the relations of humans and animals the configuration of the universe and the nature of society Interested chiefly in the conceptual and meaningful aspects of death Mar a C tedra focuses on the cultural resources with which the Vaqueiros confront their own mortality how they experience death and what this reveals about the way they see this world and other worlds Applying sensitive ethnographic insight to a rich body of oral testimony C tedra discloses an unsuspected symbolic universe native to the Vaqueiros Death is seen here in close coherent relation to pain age and suffering sickness and suicide one must understand the cultural valuation of different ways of dying and the conditions

under which suicides take place To understand what it means to be a Vaqueiro is to understand how suicide can be perceived by a people as acceptable A groundbreaking work in European ethnography This World Other Worlds takes symbolic analysis to a new level In its illumination of local conceptions of death grace and sainthood the book also makes a substantial contribution to the anthropology of religion
