Hegemony Key Ideas Series:

Dissenters and Mavericks Margery Sabin, 2002 This study reinstates the author at the centre of the relationship between literature and history It explores the tension between discourse analysis and literary criticism then discusses writers who have achieved a measure of freedom from the limitations of their historical moments *Manufactured Schema* David V. Khabaz, 2006 A couple of decades after Margaret Thatcher managed to radically transform the rules of industrial relations in Britain there has been a great deal of debate comment and analysis by a wide range of commentators with various ideological persuasions Thatcherism has therefore become an infamous concept in the study of modern British politics This book re examines one of the most controversial features of that era the relationship between the media in particular the press the Prime Minister and the trades unions in the 1980s The book is based on the assumption that Thatcher s policies were supported by the most partisan press industry to date This assumption is empirically substantiated with the aid of a comprehensive research program This research compares the editorials of the national press in the 1970s to provide a more in depth understanding of the differential outlook of the press to the miners and their strikes Through an added qualitative scrutiny of the role of Murdoch s newspapers in three successive general elections involving Thatcher the book argues that the relationship between Thatcher and Murdoch had a deep impact not only upon the press but on British society as a whole

Beyond Comfort Zones in Multiculturalism Sandra Jackson, Jose Solis, 1995-10-24 For peoples whose legal agreements treaties and other accords and conventions with the United States have been violated multiculturalism as a pedagogical tool often becomes suspect of reinforcing the continued reification and abstraction of their cultures and nations with little if any real meaning for educational and social transformation The continued oppression and repression of the exercise of self determination for African Americans the persistence of policies aimed at the destruction of indigenous populations and land the insidious continuation of classical colonialism in the case of Puerto Rico are all vivid reminders to these peoples of the racist classist sexist and homophobic patriarchy that characterizes their status In order to restore people s rights to fully determine their own histories Jackson and Solis point out that it is imperative to destroy the material foundations that breed and recycle the ideology discourse and cultural practices of domination It is not enough to celebrate diversity and difference there must be grand scale social political economic and educational transformation Popular Modernisms Bruce A. Barber, 2024-07-26 Popular Modernisms examines a process that has occurred throughout the history of art one that accelerated with the social effects of the industrial revolution the development of capitalism and the inception of modern social relations It argues that the shocks of modernist art encouraged the production of visual satires parodies ironies and pastiches and that in the company of other forms of text or performance based criticism these were the means by which those in marginal or subordinate social positions could exercise their displeasure and opposition to the ruling ideas and dominant classes of the day Expressing feelings ranging from mild discomfort to pure rage this criticism enabled social

subordinates to contest or resist the dominance of high culture over low in terms eloquently described by Antonio Gramsci as the hegemony of the dominant centre culture over its margins The focus upon graphic satires cartoons and comics of modern art attempts to provide some practical explication of the symbolic contest of power as this process represents the struggle to achieve and maintain cultural hegemony A further aim in this book is to investigate the symbolic contestation of cultural meanings in social terms and thereby enrich our understanding of classed society There are I believe many social and political confluences that intersect within the symbolic construction and interpretation of culture This contest of power can be read as ideological conflict between various dominant and subordinate groups classes and class **Mainstream** ,1987
