Heidegger and the Issue of Space Alejandro A. Vallega, 2008-01 As the only full length treatment in English of spatiality in Martin Heidegger's work this book makes an important contribution to Heidegger studies as well as to research on the history of philosophy More generally it advances our understanding of philosophy in terms of its exilic character a sense of alterity that becomes apparent when one fully engages the temporality or finitude essential to conceptual determinations By focusing on Heidegger's treatment of the classical difficulty of giving conceptual articulation to spatiality the author discusses how Heidegger's thought is caught up in and enacts the temporality it uncovers in *Being and Time* and in his later writings Ultimately when understood in this manner thought is an exilic experience a determination of being that in each case comes to pass in a loss of first principles and origins and simultaneously as an opening to conceptual figurations yet to come The discussion engages such main historical figures as Plato Aristotle Descartes Kant and indirectly Husserl as well as contemporary European and American Continental thought Heidegger and the Issue of Space Alejandro A.

the ideal research tool for anyone studying or working in the field of Heidegger Studies today      **Heidegger and a Metaphysics of Feeling** Sharin N. Elkholy, 2011-10-27 The early Heidegger of Being and Time is generally believed to locate finitude strictly within the individual based on an understanding that this individual will have to face its death alone and in its singularity Facing death is characterized by the mood of Angst anxiety as death is not an experience one can otherwise access outside of one's own demise In the later Heidegger the finitude of the individual is rooted in the finitude of the world it lives in and within which it actualizes its possibilities or Being Against the standard reading that the early Heidegger places the emphasis on individual finitude this important new book shows how the later model of the finitude of Being is developed in Being and Time Elkholy questions the role of Angst in Heidegger's discussion of death and it is at the point of transition from the nothing back to the world of projects that the author locates finitude and shows that Heidegger's later thinking of the finitude of Being is rooted in Being and Time      Daoist Resonances in Heidegger David Chai, 2022-05-05 East Asian imagery resonates throughout Martin Heidegger's writings In this exploration of the connections between Daoism and his thought an international team of scholars consider why the Daodejing and Zhuangzi were texts he returned to repeatedly and the extent Heidegger adhered to Daoism's core doctrines They discuss how Daoist thought provided him with a new perspective equipping him with images concepts and meanings that enabled him to continue his questioning of the nature of being Exploring the environment language death temporality aesthetics and race from the groundlessness of non-being oneness and the Way they illustrate how these themes reverberate with ontological spiritual and epistemological potential A lesson in the art of Daoist and cross cultural ways of thinking this collection marks the first sustained analysis of the influence of classical Daoism on a major 20th century German philosopher      **Heidegger and Kabbalah** Elliot R. Wolfson, 2019-10-01 While many scholars have noted Martin Heidegger's indebtedness to Christian mystical sources as well as his affinity with Taoism and Buddhism Elliot R. Wolfson expands connections between Heidegger's thought and kabbalistic material By arguing that the Jewish esoteric tradition impacted Heidegger Wolfson presents an alternative way of understanding the history of Western philosophy Wolfson's comparison between Heidegger and kabbalah sheds light on key concepts such as hermeneutics temporality language and being and nothingness while yielding surprising reflections on their common philosophical ground Given Heidegger's involvement with National Socialism and his use of antisemitic language these innovative readings are all the more remarkable for their juxtaposition of incongruent fields of discourse Wolfson's entanglement with Heidegger and kabbalah not only enhances understandings of both but more profoundly serves as an ethical corrective to their respective ethnocentrism and essentialism Wolfson masterfully illustrates the redemptive capacity of thought to illuminate common ground in seemingly disparate philosophical traditions      Martin Heidegger Bret W. Davis, 2014-12-05 Heidegger's writings are among the most formidable in recent philosophy The pivotal concepts of his thought are for many the source of both fascination and frustration Yet any student of philosophy needs to become

theses and Wasserstrom's opus more generally a distinguished group of his colleagues and former students demonstrate that religions can and must be understood through encounters in real time and space through the complex relations they create and maintain between people and between people and their pasts. The book also features an afterword by Wasserstrom himself which poses nine riddles to students of religion based on his personal experiences working on religion at the turn of the twenty-first century.

Heidegger and Aristotle Walter A. Brogan, 2012-02-01 Walter A. Brogan's long-awaited book exploring Heidegger's phenomenological reading of Aristotle's philosophy places particular emphasis on the *Physics*, *Metaphysics*, *Ethics*, and *Rhetoric*. Controversial and challenging, Heidegger and Aristotle claims that it is Heidegger's sustained thematic focus and insight that governs his overall reading of Aristotle, namely that Aristotle while attempting to remain faithful to the Parmenidean dictum regarding the oneness and unity of being nevertheless thinks of being as twofold. Brogan offers a careful and detailed analysis of several of the most important of Heidegger's treatises on Aristotle, including his assertion that Aristotle's twofoldness of being has been ignored or misread in the traditional substance-oriented readings of Aristotle. This groundbreaking study contributes immensely to the scholarship of a growing community of ancient Greek scholars engaged in phenomenological approaches to the reading and understanding of Aristotle.

*The Duplicity of Philosophy's Shadow* Elliot R. Wolfson, 2018-04-24 Martin Heidegger (1889-1976) is considered one of the most influential philosophers of the twentieth century in spite of his well-known transgressions, his complicity with National Socialism, and his inability to show remorse or compassion for its victims. In *The Duplicity of Philosophy's Shadow*, Elliot R. Wolfson intervenes in a debate that has seen much attention in scholarly and popular media from a unique perspective as a scholar of Jewish mysticism and philosophy who has been profoundly influenced by Heidegger's work. Wolfson sets out to probe Heidegger's writings to expose what remains unthought. In spite of Heidegger's explicit anti-Semitic statements, Wolfson reveals some crucial aspects of his thinking, including criticism of the biological racism and militant apocalypticism of Nazism that betray an affinity with dimensions of Jewish thought: the triangulation of the concepts of homeland, language, and peoplehood; Jewish messianism and the notion of historical time as the return of the same that is always different; inclusion/exclusion and the status of the other; the problem of evil in kabbalistic symbolism. Using Heidegger's own methods, Wolfson reflects on the inextricable link of truth and untruth and investigates the matter of silence and the limits of speech. He challenges the tendency to bifurcate the relationship of the political and the philosophical in Heidegger's thought but parts company with those who write off Heidegger as a Nazi ideologue. Ultimately, *The Duplicity of Philosophy's Shadow* argues the greatness and relevance of Heidegger's work is that he presents us with the opportunity to think the unthinkable as part of our communal destiny as historical beings.

Heidegger Among the Sculptors Andrew Mitchell, 2010-07-16 *Heidegger Among the Sculptors* is a provocative illustrated examination of Heidegger's sculptural writings that shows how they rethink the relationship between bodies and space and the place of art in our lives.

**Time in Exile** Marcia Sá Cavalcante Schuback, 2020-02-10

This book is a philosophical reflection on the experience of time from within exile. Its focus on temporality is unique as most literature on exile focuses on the experience of space as exile involves dislocation and moods of nostalgia and utopia. Marcia S. Cavalcante Schuback proposes that in exile time is experienced neither as longing back to the lost past nor as wanting a future to come but rather as a present without anchors or supports. She articulates this present as a gerundive mode in which the one who is in exile discovers herself simply being exposed to the uncanny experience of having lost the past and not having a future. To explore this she establishes a conversation among three authors whose work has exemplified this sense of gerundive time: the German philosopher Martin Heidegger, the French writer and essayist Maurice Blanchot, and the Brazilian writer Clarice Lispector. The book does not aim to discuss how these authors understand the relation between time and exile but presents a conversation with them in relation to this question that reflects new aspects in their work. Attempting to think and express this difficult sense of time from within exile, *Time in Exile* engages with the relation between thought and language and between philosophy and literature. Departing from concrete existential questions, S. Cavalcante Schuback reveals new philosophical and theoretical modes to understand what it means to be present in times of exile.

**Philosophies of Appropriated Religions** Soraj Hongladarom, Jeremiah Joven Joaquin, Frank J. Hoffman, 2023-12-21. This book brings together different intercultural philosophical points of view discussing the philosophical impact of what we call the appropriated religions of Southeast Asia. Southeast Asia is home to most of the world religions. Buddhism is predominantly practiced in Thailand, Vietnam, Myanmar, Singapore, Laos, and Cambodia. Islam in Malaysia, Indonesia, and Brunei, and Christianity in the Philippines and Timor-Leste. Historical data show, however, that these world religions are imported cultural products and have been reimagined, assimilated, and appropriated by the culture that embraced them. In this collection, we see that these appropriated religions imply a culturally nuanced worldview which in turn impacts how the traditional problems in the philosophy of religion are framed and answered in particular questions about the existence and nature of the divine, the problem of evil, and the nature of life after death. Themes explored include religious belief and digital transition, Theravada Buddhist philosophy, religious diversity, Buddhism and omniscience, indigenous belief systems, divine apology, and unmerited human suffering, dialecticism, and the problem of evil. Buddhist philosophy and Spinoza's views on death and immortality, belief and everyday realities in the Philippines, comparative religious philosophy, gendering the Hindu concept of dharma, Christian devotion and salvation during the Spanish colonial period in the Philippines through the writings of Jose Rizal, indigenous Islamic practices in the Philippines, practiced traditions in contemporary Filipino celebrations of Christmas, role of place aspects in the appropriation of religions in Southeast Asia, and fate and divine omniscience. This book is of interest to scholars and researchers of philosophy of religion, sociology of religion, anthropology of religion, cultural studies, comparative religion, religious studies, and Asian studies.

**The Spectricity of Humanness** Zachary Isrow, 2022-08-22. The question of humanness requires a philosophical anthropology and we need a revision of what

philosophical anthropology means in light of contemporary efforts in speculative realism and object oriented ontology This is the main claim of the book which expands into the smaller supporting claims that 1 contemporary work in speculative realism indicates that Heidegger s analytic of Dasein needs to be rethought in consideration of certain Kantian values 2 recent philosophical anthropology offers an incomplete look at the central concern of philosophical anthropology namely the question of humanness 3 current ontological models do not account adequately for humanness because they do not begin with humanness From these considerations a new ontological model better suited to account for humanness is proposed spectral ontology Under spectral ontology Being is treated as a spectrum consisting of beings nonbeings and hyperbeings Nonbeings or nonrelational entities and hyper beings are spectral insofar as they are like a specter which haunts the being that manifests in the world Thus spectral in this sense refers to both the nonrelational status of nonbeings and to an ontology which reflects such a spectrum of Being

**"Into Life." Franz Rosenzweig on Knowledge, Aesthetics, and Politics**

,2021-07-26 The articles collected in Into Life Franz Rosenzweig on Knowledge Aesthetics and Politics focus on the significance of Franz Rosenzweig s work far beyond the realms of theology and philosophy of religion They engage with a wide range of issues in philosophy and offer new insights both by presenting an array of unpublished and underestimated sources and by bringing Rosenzweig s thought into dialogue with new approaches and interlocutors such as Stanley Cavell William Alston Carl Schmitt and Martin Heidegger The result is a refreshing and original perspective on the work of one of the most significant thinkers of the twentieth century

*Theory and Methods* Chris Philo,2017-05-15 This volume tackles the complex terrain of theory and methods seeking to exemplify the major philosophical social theoretic and methodological developments some with clear political and ethical implications that have traversed human geography since the era of the 1960s when spatial science came to the fore Coverage includes Marxist and humanistic geographies and their many variations over the years as well as ongoing debates about agency structure and the concepts of time space place and scale Feminist and other positioned geographies alongside poststructuralist and posthumanist geographies are all evidenced as well as writings that push against the very limits of what human geography has embraced over these fifty plus years The volume combines readings that are well known and widely accepted as classic with readings that while less familiar are valuable in how they illustrate different possibilities for theory and method within the discipline The volume also includes a substantial introduction by the editor contextualising the readings and in the process providing a new interpretation of the last half century of change within the thoughts and practices of human geography

*The Bodily Dimension in Thinking* Daniela Vallega-Neu,2006-06-01 Daniela Vallega Neu questions the ontological meaning of body and thinking by carefully taking into account how we come to experience thought bodily She engages six prominent figures of the Western philosophical tradition Plato Nietzsche Scheler Merleau Ponty Heidegger and Foucault and considers how they understand thinking to occur in relation to the body as well as how their thinking is itself bodily Through a deconstructive and

performative reading she explores how their thinking reveals a bodily dimension that is prior to what classical metaphysics comes to conceive as mind body duality Thus Vallega Neu uncovers the bodily dimension that sustains their thought and their work As she contends the trace of the body in our thought not only exposes the strangers we are to ourselves but may also lead to a new understanding of how we come to be who we are in relation to the world we live in Book jacket
