## Hidden Memories:

**Discover Your Hidden Memory & Find the Real You** Dr. Menis Yousry, 2011-09-05 From before each of us was born and up to a young age our experiences of the world and of our parents shaped us in ways we do not even realise Our brains were not developed enough to make sense of our early lives and so these experiences become unresolved unconscious memories Our responses to situations and events are often unconscious reflexes we devise to protect ourselves As adults this can lead us to repeat unwanted patterns that prevent us achieving what we really want This book reveals the powerful invisible waves of influence that inform our actions bind us to the past and hold us back in our present Simple but effective exercises provide the tools to identify exactly how our actions today are connected to our early childhood experiences and our relationships with our parents as well as to past generations history and culture It also shows us what we can do about it now

Psychedelic Experience Aidan Lyon, 2023-09-26 Psychedelic Experience presents a philosophical account of psychedelic experience A central premise of the book is that such experiences are mind revealing experiences and that they can be induced by means other than psychedelics In particular the book argues that psychedelic experiences can also be had as the result of meditation Aiden Lyon presents a unified conceptual framework for thinking about the different kinds of psychedelic experiences one may have as a result of psychedelics meditation and their combination This framework is then used to shed new light on various commonalities between psychedelics and meditation such as the ability to promote long lasting increases in mindfulness and their reputation for inducing mystical experiences Finally the book uses these new philosophical resources to flip things around and shine the light back on philosophy itself arguing that psychedelic experiences can be used as tools for doing philosophy The result is a new approach to philosophy or the revival of an ancient one which integrates traditional analytic methods with a range of psychedelic techniques

*Conscious Liberation Misty*

Liebisch,2023-01-20 Liberation is the freedom from the limits and thoughts that influence our behavior as well as the freedom and autonomy to free our minds from the shackles of the past Conscious Liberation A Method for Personal Transformation and a Pathway to Healing is a method that explores the concept of how negative life experiences that cause disruptions in our subconscious mind leave us with a lasting imprint that we are often not aware of You may feel unfilled overwhelmed unworthy or sad for no apparent reason You may have trouble with relationships struggle with self worth or have difficulty with emotions or self regulation You have tried therapy but it didn t last long Now you feel stuck wondering if you will ever feel whole This book takes the reader on a journey of self discovery and healing by giving them personal stories information healing exercises and examples and advice By accessing and addressing the needs of our inner selves and the memories that shape it we can learn to release the past feel healthy whole and fulfilled and lead a more gratifying life This book is an essential tool for anyone looking to understand and heal the emotional wounds of their past and uncover the hidden influences of their mind all on their own Conscious Liberation     The Mind of Your Newborn Baby David Chamberlain,1998-04-02 This is the long awaited tenth anniversary edition of Dr Chamberlain s 1988 classic Babies Remember Birth In paperback format and enriched with a new last chapter this book has the potential to revolutionize the way we look at babies both before and after birth Part I is filled with user friendly information about the mind and abilities of newborns as well as a thorough look at their development before birth Parts II and III present evidence that babies do remember birth and are very much aware of the people around them at that time Dr Chamberlain writes compellingly about the newborn s sensitivity awareness and vulnerability He emphasizes the importance and power of the infant and parent connection during pregnancy and after birth When the information in this book becomes common knowledge we will look at our children with new respect and understanding     **Extreme Religious Behaviours** Johannes Bronkhorst,2024-06-17 Certain religious behaviours clearly reduce biological fitness These behaviours include celibacy along with various forms of asceticism and rituals that harm the performer Such behaviours are found in widely different cultures How is this possible This book shows that these behaviours as is religion in general are by products of features of the human mind whose evolutionary fitness is beyond doubt and explores those features Which are those features This book proposes a twofold answer It draws attention to the layered nature of human consciousness in which different manners of experience are superimposed on each other This goes a long way toward accounting for the universal religious belief in some kind of transcendental world a higher reality different from ordinary reality The layering of consciousness comes about in childhood and gains in prominence with the acquisition of a first language which is the second feature highlighted in this book Together these features explain a variety of normal religious behaviours and beliefs and account for the possibility of mystical experience They also explain the occurrence of behaviours that do not augment evolutionary fitness     Real World Psychology Catherine A. Sanderson,Karen R. Huffman,2019-12-24 Real World Psychology balances comprehensive coverage

of the key concepts in introductory psychology with a concise presentation style and engages students with current and interesting research that explores these concepts in real life contexts Real World Psychology features the incomparable author team of Karen Huffman Palomar College and Catherine Sanderson Amherst College who create an outstanding text that is appealing to students and instructors at a wide range of academic institutions The new edition has been thoroughly updated and features a new focus on Scientific Thinking and Practical Applications underscoring the fact that connecting the principles of psychological science to everyday life is critical to student engagement and ultimately key to their success not only in the introductory psychology course but in whatever their chosen field of study and in everyday life Students will leave the course with an appreciation of how a basic yet scientific understanding of human behavior can benefit them in their studies in their personal lives and in their professional endeavors

Jewish-American Artists and the Holocaust Matthew Baigell, 1997 Jewish themes in American art were not very visible until the last two decades although many famous twentieth century artists and critics were and are Jewish Few artists responded openly to the Holocaust until the 1960s when it finally began to act as a galvanizing force allowing Jewish American artists to express their Jewish identity in their work Baigell describes how artists initially deflected their responses into abstract forms or by invoking biblical and traditional figures and then in more recent decades confronted directly Holocaust imagery and memory He traces the development of artistic work from the late 1930s to the present in a moving study of a long overlooked topic in the history of American art

*Heritage, Memory, and Punishment* Shu-Mei Huang, Hyun-Kyung Lee, 2019-09-23 Based on a transnational study of decommissioned postcolonial prisons in Taiwan Taipei and Chiayi South Korea Seoul and China Lushun this book offers a critical reading of prisons as a particular colonial product the current restoration of which as national heritage is closely related to the evolving conceptualization of punishment Focusing on the colonial prisons built by the Japanese Empire in the first half of the twentieth century it illuminates how punishment has been considered a subject of modernization while the contemporary use of prisons as heritage tends to reduce the process of colonial modernity to oppression and atrocity thus constituting a heritage of shame and death which postcolonial societies blame upon the former colonizers A study of how the remembering of punishment and imprisonment reflects the attempts of postcolonial cities to re-articulate an understanding of the present by correcting the past *Heritage Memory and Punishment* examines how prisons were designed built partially demolished preserved and redeveloped across political regimes demonstrating the ways in which the selective use of prisons as heritage reframed through nationalism leaves marks on urban contexts that remain long after the prisons themselves are decommissioned As such it will appeal to scholars of sociology geography the built environment and heritage with interests in memory studies and dark tourism
