New Social Question Casey Harison, 2015-11-25 A New Social Question Capitalism Socialism and Utopia brings together a selection of papers presented at the conference on Capitalism and Socialism Utopia Globalization and Revolution at New Harmony Indiana in 2014 New Harmony is best known as the site of industrialist Robert Owen's experiment in communal living in 1825 and it was Owen's legacy that drew scholars from across the Atlantic Owen's work and his experiment at New Harmony again have currency as the world looks back on the 2008 economic crisis and as socialism seemingly banished with the failure of experiments in Eastern Europe and the former Soviet Union at the end of the last century has returned to the political and economic lexicon As David Harvey Thomas Piketty and Joyce Appleby have lately reminded us capitalism particularly the forms it has assumed since 1945 is probably exceptional perhaps ephemeral but also dynamic and resilient If the Great Recession has derailed personal lives destabilized economies and unnerved politicians it has also reminded us that we have not reached the end of history Where there was once a Social Question there is now a New Social Question This edited multi disciplinary volume will appeal to readers in political science economics history sociology anthropology literature communications and cultural studies and to academic audiences in North America Britain and elsewhere

Compatible Forest Management Robert A. Monserud, Richard W. Haynes, Adelaide C. Johnson, 2013-04-17 Public debate has stimulated interest in finding greater compatibility among forest management regimes The debate has often portrayed management choices as tradeoffs between biophysical and socioeconomic components of ecosystems Here we focus on specific management strategies and emphasize broad goals such as biodiversity wood production and habitat conservation while maintaining other values from forestlands desired by the public We examine the following proposition Commodity production timber nontimber forest products and the other forest values biodiversity fish and wildlife habitat can be simultaneously produced from the same area in a socially acceptable manner Based on recent research in the Pacific Northwest we show there are alternatives for managing forest ecosystems that avoid the divisive arena of either or choices Much of the work discussed in this book addresses two aspects of the compatibility issue First how are various forest management practices related to an array of associated goods and services Second how do different approaches to forest management affect relatively large and complex ecosystems

Topic Modeling Yanghui Rao, Qing Li, 2025-08-22 As a well known text mining tool topic modeling can effectively discover the latent semantic structure of text data Extracting topics from documents is also one of the fundamental challenges in natural language processing Although topic models have seen significant achievements over the past three decades there remains a scarcity of methods that effectively model temporal aspect Moreover many contemporary topic models continue to grapple with the issue of noise contamination particularly in social media data This book presents several approaches designed to address these two limitations Initially traditional lifelong topic models aim to accumulate knowledge learned from experience for future task However the sequence of topics extracted by these methods may shift over time leading to semantic misalignment between the topic representations across document streams Such misalignment can degrade the performances of various downstream tasks including online document classification and dynamic information retrieval at the topic level Additionally the challenge of coherent topic modeling is particularly relevant due to the noise and large scale of social media datasets Messages on social media platforms often consists of only a few words resulting in a lack of significant context Models applied directly to this type of text frequently encounter the problem of feature sparsity which can yield unsatisfactory outcomes In the context of emotion detection public emotions are known to fluctuate across different topics and topics can evoke public emotion Thus there is a strong interconnection between topic discovery and emotion detection Jointly modeling topics and emotions is a suitable strategy for these tasks This book also examines the impact of topics on emotion detection and other related areas
