**Political Struggles and the Forging of Autonomous Government Agencies** Cristopher Ballinas Valdés, 2011-06-30 Argues that autonomous agencies are not the result of a systematic design but are produced by the interactions of political and bureaucratic forces The case studies illustrate how political struggles between politicians and bureaucrats can create a muddle of agencies that lack coherence and are subject to conflicting levels of political control

**Development and Growth in the Mexican Economy** Juan Carlos Moreno-Brid, Jaime Ros, 2009-04-23 This book is the first comprehensive and systematic English language treatment of Mexico's economic history to appear in nearly forty years Drawing on several years of in depth research Juan Carlos Moreno Brid and Jaime Ros two of the foremost experts on the Mexican economy examine Mexico's current development policies and problems from a historical perspective They review long term trends in the Mexican economy and analyze past episodes of radical shifts in development strategy and in the role of markets and the state This book provides an overview of Mexico's economic development since Independence that compares the successive periods of stagnation and growth that alternately have characterized Mexico's economic history It gives special attention to developments since 1940 and it presents a re evaluation of Mexico's development policies during the State led industrialization period from 1940 to 1982 as well as during the more recent market reform process This reevaluation is critical of the dominant trend in economic literature and is revisionist in arguing that in particular the market reforms undertaken by successive Mexican governments since 1983 have not addressed the fundamental obstacles to economic growth Development and Growth in the Mexican Economy also details the country's pioneering role in launching NAFTA its membership in the OECD and its radical macroeconomic reforms Carefully argued and meticulously researched the book presents a wide ranging authoritative study that not only pinpoints problems but also suggests solutions for removing obstacles to economic stability and pointing the Mexican economy toward the road to recovery

**Jungle Laboratories** Gabriela Soto Laveaga, 2009-12-23 In the 1940s chemists discovered that barbasco a wild yam indigenous to Mexico could be used to mass produce synthetic steroid hormones Barbasco spurred the development of new drugs including cortisone and the first viable oral contraceptives and positioned Mexico as a major player in the global pharmaceutical industry Yet few people today are aware of Mexico's role in achieving these advances in modern medicine In Jungle Laboratories Gabriela Soto Laveaga reconstructs the story of how rural yam pickers international pharmaceutical companies and the Mexican state collaborated and collided over the barbasco By so doing she sheds important light on a crucial period in Mexican history and

challenges us to reconsider who can produce science Soto Laveaga traces the political economic and scientific development of the global barbasco industry from its emergence in the 1940s through its appropriation by a populist Mexican state in 1970 to its obsolescence in the mid 1990s She focuses primarily on the rural southern region of Tuxtepec Oaxaca where the yam grew most freely and where scientists relied on local indigenous knowledge to cultivate and harvest the plant Rural Mexicans at first unaware of the pharmaceutical and financial value of barbasco later acquired and deployed scientific knowledge to negotiate with pharmaceutical companies lobby the Mexican government and ultimately transform how urban Mexicans perceived them By illuminating how the yam made its way from the jungles of Mexico to domestic and foreign scientific laboratories where it was transformed into pills to the medicine cabinets of millions of women across the globe Jungle Laboratories urges us to recognize the ways that Mexican peasants attained social and political legitimacy in the twentieth century and positions Latin America as a major producer of scientific knowledge

*Economic Crises and the Breakdown of Authoritarian Regimes* Thomas B. Pepinsky, 2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change

**Privatization in Latin America** Alberto Chong, Florencio Lopez de Silanes, 2005-03-15 Privatization is under attack Beginning in the 1980s thousands of failing state owned enterprises worldwide have been turned over to the private sector But public opinion has turned against privatization A large political backlash has been brewing for some time infused by accusations of corruption abuse of market power and neglect of the poor What is the real record of privatization and are the criticisms justified Privatization in Latin America evaluates the empirical evidence on privatization in a region that has witnessed an extensive decline in the state's share of production over the past 20 years The book is a compilation of recent studies that provide a comprehensive analysis of the record of and accusations against privatization with important recommendations for the future Seven countries are investigated Argentina Bolivia Brazil Chile Colombia Mexico and Peru This book will be vital to anyone interested in the privatization debate but especially to those involved in civil service reform corporate governance economic policy finance and anticorruption efforts Privatization is important but controversial While economists typically favor it others are skeptical This

book provides strong scientific evidence that privatization has been beneficial for many Latin American countries although some privatizations failed and some groups in society lost out As usual the devil is in the details how privatization is carried out and what reforms accompany it are crucial to its success The book is definitely an invaluable contribution to the privatization debate Oliver Hart Andrew E Furer Professor of Economics Harvard University      **Globalization** Hector Cuadra-Montiel,2012-08-22 The book Globalization Approaches to Diversity takes the ambitious undertaking of presenting a series of global issues that range from historic to contemporary from transnational to local and from cultural to institutional It consists of twelve chapters divided into three sections Globalization Agendas Globalization Policies Globalization Experiences Its authors embody a global research culture One that is plural growing and dynamic as it is evidenced in their respective agendas and methodological approaches The value of this book lies in its diversity and its merit will be appreciated by a global community of scholars      **Corporate Citizenship in Latin America: New Challenges for Business** Jose Antonio Puppim De Oliveira,2022-10-15 Corporate citizenship and corporate social responsibility have become hot topics of debate for business academia and organised civil society in Latin America However although there is a lot of material in Spanish and Portuguese there are few publications available in English This special issue of JCC opens the discussion in English across different countries in the region      **Publications Catalog** Inter-American Development Bank,1999      Water, Power and Citizenship José Esteban Castro,2005-11-21 Water Power and Citizenship investigates the interrelationship between water politics and institutions and the development of citizenship rights from a historical sociological perspective The evolution of water s manifold social character and values as a source of power as a public good as a commodity or as a universal right is examined in the light of ever changing and mutually binding social and ecological processes The Basin of Mexico s rich water history becomes the vantage point to cast light on one of the most crucial challenges facing the international community that of eliminating water inequality and injustice      Politics in Mexico Roderic A. development and suggests ways to achieve greater equity in the distribution of wealth incomes and opportunities The study draws on data from 20 countries based on household surveys covering 3 6 million people and reviews extensive economic sociological and political science studies on inequality in Latin America Four broad areas for action by governments and civil society groups to break the destructive pattern are outlined 1 build more open political and social institutions that allow the poor and historically subordinate groups to gain a greater share of agency voice and power in society 2 ensure that economic institutions and policies seek greater equity through sound macroeconomic management and equitable efficient crisis resolution institutions that avoid the large regressive redistributions that occur during crises and that allow for saving in good times to enhance access by the poor to social safety nets in bad times 3 increase access by the poor to high quality public services especially education health water and electricity as well as access to farmland and the rural services and protect and enforce the property rights of the urban poor 4 reform income transfer programmes so that they reach the poorest families
