## **High Tech And Toxics A Guide For Local Communities:**

*High Tech and Toxics* Susan Sherry, 1985      **High Tech and Toxics** ,2006      **Toxic and Hazardous Chemicals, Title III, and Communities** Caroline McNeil, Elaine Bratic Arkin, David McCallum, 1999-08 Prepared for State and local government officials LEPCs and other community groups that want to make Title III of the Superfund Amend and Reauth Act of 1986 work It is intended as a practical guide for those who have little or no previous experience in the field of communication and whose time and resources are limited Discusses planning which is vital to the success of a communication program Suggests ways to get and keep people involved especially important because Title III affects so many sectors of the community A how to do it section talks about specific tasks such as giving a speech or writing a press release      **Silicon Valley and the Environmental Inequalities of High-Tech Urbanism** Jason A. Heppler, 2024-04-23 In the half century after World War II California's Santa Clara Valley transformed from a rolling landscape of fields and orchards into the nation's most consequential high tech industrial corridor How Santa Clara Valley became Silicon Valley and came to embody both the triumphs and the failures of a new vision of the American West is the question Jason A Heppler explores in this book A revealing look at the significance of nature in social cultural and economic conceptions of place the book is also a case study on the origins of American environmentalism and debates about urban and suburban sustainability Between 1950 and 1990 business and community leaders pursued a new vision of the landscape stretching from Palo Alto to San Jose a vision that melded the bucolic naturalism of orchards pleasant weather and green spaces with the metropolitan promise of modern industry government funded research and technology Heppler describes the success of a new clean future facing economy coupled with a pleasant green environment in drawing people to Silicon Valley And in this overwhelming success he also locates the rapidly emerging faults created by competing ideas about forming these idyllic communities specifically widespread environmental degradation and increasing social stratification Cities organized around high tech industries suburban growth and urban expansion were as Heppler shows crucibles for empowering elites worsening human health and spreading pollution What do nature and place mean and who gets to define these terms Key to Heppler's work is the idea that these questions reflect and determine what and who matters in any conversation about the environment Silicon Valley and the Environmental Inequalities of High Tech Urbanism vividly traces that idea through the linked histories of Silicon Valley and environmentalism in the West      **Information Resources in Toxicology** P.J. Bert Hakkinen, Gerald Kennedy, Frederick W. Stoss, 2000-01-10 Information Resources in Toxicology Third Edition is a sourcebook for anyone who needs to know where to find toxicology information It provides an up to date selective guide to a large variety of sources books journals organizations audiovisuals internet and electronic sources and more For the Third Edition the editors have selected organized and updated the most relevant information available New information on grants and other funding opportunities physical hazards patent literature and technical reports have also been added This comprehensive time saving

tool is ideal for toxicologists pharmacologists drug companies testing labs libraries poison control centers physicians legal and regulatory professionals and chemists Serves as an all in one resource for toxicology information New edition includes information on publishers grants and other funding opportunities physical hazards patent literature and technical reports Updated to include the latest internet and electronic sources e mail addresses etc Provides valuable data about the new fields that have emerged within toxicological research namely the biochemical cellular molecular and genetic aspects     **Program Recommendations for State Section 313 Program Coordinators** ,1990     Toxic Town Peter C. Little,2014-03-14 Shows the risks of high tech pollution through a study of an IBM plant s effects on a New York town In 1924 IBM built its first plant in Endicott New York Now Endicott is a contested toxic waste site With its landscape thoroughly contaminated by carcinogens Endicott is the subject of one of the nation s largest corporate state mitigation efforts Yet despite the efforts of IBM and the U S government Endicott residents remain skeptical that the mitigation systems employed were designed with their best interests at heart In Toxic Town Peter C Little tracks and critically diagnoses the experiences of Endicott residents as they learn to live with high tech pollution community transformation scientific expertise corporate state power and risk mitigation technologies By weaving together the insights of anthropology political ecology disaster studies and science and technology studies the book explores questions of theoretical and practical import for understanding the politics of risk and the ironies of technological disaster response in a time when IBM s stated mission is to build a Smarter Planet Little critically reflects on IBM s new corporate tagline arguing for a political ecology of corporate social and environmental responsibility and accountability that places the social and environmental politics of risk mitigation front and center Ultimately Little argues that we will need much more than hollow corporate taglines claims of corporate responsibility and attempts to mitigate high tech disasters to truly build a smarter planet     The Workbook ,1986     **Chemical Alert!** Marvin S. Legator,Sabrina F. Strawn,2010-07-05 In the 1978 Love Canal toxic waste crisis concerned citizens did a far better job of evaluating the health of the community than did the professionals of the New York Health Department asserts Marvin Legator In Chemical Alert A Community Action Handbook he and coeditor Sabrina Strawn offer a step by step guide that can be used by any lay person or citizens group to determine whether a health risk exists in their area Writing for the general reader with no scientific expertise environmental medical and legal professionals instruct communities on the organizational and investigative techniques that will produce a valid scientific case study With these tools citizens living near petrochemical plants or waste disposal areas or who may have simply noticed a high incidence of certain health problems in their community can determine for themselves whether a problem really exists and seek remediation Given the reality that government agencies often lack the resources or the will to detect health hazards before they affect a community an informed citizenry should be its own best environmental watchdog     *Hazardous Waste Contamination of Water Resources (concerning Groundwater Contamination in Santa Clara Valley, CA)* United States. Congress. House. Committee on Public

Works and Transportation. Subcommittee on Investigations and Oversight,1986      History of Technology Volume 26 Ian Inkster,2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays It deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred      Risk Communication about Chemicals in Your Community Susan G. Hadden,Barry V. Bales,1996-07 Outlines the requirements and availability of data on chemical releases including descriptions of real life scenarios This information is meant to be used for community emergency planning purposes Discusses SARA which put requirements on businesses to handle chemicals safely and to report the presence of large amounts of chemicals at their site Also includes what is risk glossary of terms references and sources and list of extremely hazardous substances Ideal for public education and information      *Making Microchips* Jan Mazurek,1998-12-07 An examination of the environmental and economic implications of the computer microchip industry s exodus from California s Silicon Valley to New Mexico Virginia Ireland and Taiwan In *Making Microchips* Jan Mazurek examines the environmental and economic implications of the computer microchip industry s exodus from California s Silicon Valley to New Mexico Virginia Ireland and Taiwan Globalization economic restructuring and changing manufacturing processes in this rapidly growing industry present difficult new questions for environmental policy Mazurek challenges the assumptions of U S policies designed to promote the competitiveness of domestic microchip makers She argues that although these initiatives focus on the economic effects of environmental regulation they fail to acknowledge how economic and organizational changes within the industry collide with and often confound efforts to monitor and manage pollution from chemicals used in microchip manufacturing Despite its reputation as a clean industry microchip manufacturing is fraught with hazards More than sixty dangerous acids solvents caustics and gases are used to make microchips and some of them are suspected to be carcinogens and or reproductive toxins Mazurek describes the environmental by products of chipmaking including soil contamination air and water pollution and damage to human health Applying insights from economic geography to questions of how and where companies organize production she shows how Silicon Valley played a pivotal role in the development of the microchip Pairing federal environmental data with structural and geographic information on the six firms that continue to build wafer fabrication plants in the United States she demonstrates how reorganization and relocation of manufacturing facilities divert attention from trends in toxic emissions and how they complicate public and private efforts to improve the industry s environmental performance In the concluding chapter Mazurek marshals her findings in a broader analysis of the expansion of global manufacturing and the resultant environmental problems      Public Citizen ,1989      *The Temporalities of Waste* Fiona Allon,Ruth Barcan,Karma Eddison-Cogan,2020-10-29 This book investigates the complex and unpredictable temporalities of waste Reflecting on waste in the context of sustainability materiality social practices subjectivity and

environmental challenges the book covers a wide range of settings from the municipal garbage crisis in Beirut to food rescue campaigns in Hong Kong and the toxic by products of computer chip production in Silicon Valley Waste is one of the most pressing issues of the day central to environmental challenges and the development of healthier and more sustainable futures The emergence of the new field of discard studies in addition to expanding research across other disciplines within the social sciences is testament to the centrality of waste as a crucial social material and cultural problem and to the need for multi and transdisciplinary approaches like those provided in this volume This edited collection seeks to develop a framework that understands the material properties of different kinds of waste not as fixed stable or singular but as dynamic relational and often invisible It brings together new and cutting edge research on the temporalities of waste by a diverse range of international authors Collectively this research presents a persuasive argument about the need to give more credence to the capacities of waste to provoke us in materially and temporally complex ways especially those substances that complicate our understandings of life as bounded duration This book will be of great interest to students and scholars of the environmental humanities cultural studies anthropology and human geography **American Journal of Public Health** ,1986-07 Includes section Books and reports *In The U.S. Interest* Janet Welsh Brown,2021-11-28 In the U S interest explores the implications this growing interdependence holds for US foreign policy in the developing world It links US jobs trade and geopolitical interests to the environmental economic and political health of key developing nations Case studies of Mexico Egypt Kenya and the Philippines analyze Third World resource environmental and population problems revealing the need for US policymakers to recognize US national interest in international environmental cooperation *Serious Reduction of Hazardous Waste* ,1986 *Managing Chemical Risks Corporate Response to* Sara Michael S. Baram,Patricia Dillon,1992-01-21 SARA Title III is a legislative attempt to lower the risk of chemical manufacturing and use to the public These regulations have been in place now for over four years and this valuable new book represents a series of studies that explores the environmental management behavior of industrial corporations The book features excellent case studies that will serve as important reference material for environmental managers health and safety officials regulators consultants and environmental attorneys *Journal of Business Research* ,1991
