Congressional Record United States. Congress,1992 *Army* ,1993 The Dragon Awakes ,1999 Four essays analyze broad trends in Chinese military modernization While they treat strategic capabilities the essays analyze considerably more They look at the whole pattern of Chinese military modernization strategy doctrine information warfare ground naval and air forces The essays come to much the same conclusion that while the PLA is acquiring pockets of modern capabilities through a variety of legal and illegal endeavors these selective acquisitions do not offset the overall obsolescence of most of China s armed forces **Blitzkrieg to Desert Storm** Robert Michael Citino,2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals

the lessons of India's blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War. Citino especially considers the evolution of U.S. doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties. He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior. Throughout, Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower, training, doctrine, and command and control mechanisms. Brimming with new insights, Citino's study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare. Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9/11 era.

Professional Journal of the United States Army, 1999 **The Russian Armed Forces at the Dawn of the Millennium**, 2000. This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College's Center for Strategic Leadership from 7 through 9 February 2000. The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U.S. led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO. The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself. The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state of the Russian military. Focusing primarily on the socio-political dimension of the military but not ignoring the military technical dimension, the presentations delivered during the conference looked at Russia's domestic environment, the state of the military, perceived threats, and Russia's capacity to generate responses to those threats.
