**The Rise, Decline and Renewal of Silicon Valley's High Technology Industry** Dan Khanna, 2018-03-26 Originally published in 1997 this book examines the unique nature and characteristics of Silicon Valley and looks at the factors that led to the economic and competitiveness problems of the 1980s The research concluded that the information revolution caused a complex set of events that had global ramifications Silicon Valley was no longer operating as a driver of this revolution but it was facing the onslaught of the global competitiveness it had unleashed

**Industrial Development Global Report 1997** United Nations Industrial Development Organization, 1997 The UNIDO Industrial Development Global Report provides annual description and analysis of industrial development on both a global and a regional scale The 1997 Report addresses the challenge of diminishing global economic expansion and the falling per capita income of many developing countries by focusing on the long term dynamics of investment and economic growth As its central message it emphasizes the crucial importance investment as a necessary condition for economic growth

**The Emerging High-tech Industry** United States. Congress. House. Committee on Education and the Workforce. Subcommittee on Oversight and Investigations, 1998

**High-Technology Development in Regional Economic Growth** Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section

**The New Industrial Geography** Trevor Barnes, Meric S Gertler, 2002-01-04 Drawing on the theoretical resources of institutional economics The New Industrial Geography opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development

**Industrial Technology Development in Malaysia** Greg Felker, K. S. Jomo, Rajah

Rasiah,2013-02-01 This book and its companion Technology Competitiveness and the State examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development The focus is on the development of Malaysia s technological industrial base from a sector and firm specific perspective including the role of foreign multinationals in this process Industrial Technology Development in Malaysia provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies *Monthly Catalogue, United States Public Documents* ,1994

*Government Foresighted Leading* Yunxian Chen,Jianwei Qiu,2016-12-08 Over the past several decades of reform and opening up to the outside world remarkable economic growth has been achieved in China and has drawn considerable world attention The question of how to explain that phenomenon and the road China has taken towards its modernization have been the focus of attention from worldwide economists and experts This book attempts to explore China s economy from the perspective of government foresighted leading which gives full play to government functions particularly those of regional governments On the one hand government foresighted leading enables government to exercise foresighted leading by means of foundations mechanisms and regulations of market economy On the other hand it could reduce government malfunction and minimize the cost of remedying defects Government foresighted leading theory is an important innovation and contribution to the theoretical configuration of economics It not only offers an explanation of China s continuous economic growth but further classifies economics into microeconomics macroeconomics and mezzoeconomics which includes regional economics industrial economics or structural economics supplementing the traditional microeconomics and macroeconomics system

**Globalization, the Third World State and Poverty-Alleviation in the Twenty-First Century** B. Ikubolajeh Logan,2017-11-22 This title was first published in 2002 Bringing together an inspiring mix of US and African contributors this book explores the dynamics of the unfolding globalized economic political socio cultural and environmental systems Featuring incisive international commentary on the causes and consequences of poverty in the Third World it presents a powerful study of the strategies by which Third World governments and civil society can overcome poverty by insinuating themselves more creatively into the global order The result is one of the defining works so far produced on the tensions between globalization and development

**The Politics of High Tech Growth** Sean O'Riain,2004-04-26 This book argues that beneath the Irish trade and foreign investment boom lies a more interesting story of regional innovation promoted by an alliance between the state and local technical communities This alliance was governed through a decentralized set of state institutions drawing on global and local economic and political resources This Developmental Network State has had a significant impact on the growth of Ireland s high tech cluster and is central to the emergence of an international network of global high tech regions from Silicon Valley to Ireland Taiwan and Israel The book provides a detailed study of the rise of the software industry in Ireland and of the state institutions and political conditions

which promoted it It shows how new network state policies and institutions have been central to high tech regions elsewhere

*Innovation, Networks and Localities* Manfred M Fischer,Luis Suarez-Villa,Michael Steiner,1999-07-26 The relationship between innovation networks and localities is of central concern for many nations However despite increasing interest in the components of this research triangle efforts in these fields are hampered by a lackofconceptual and empirical insights This volume brings together contributions from a distinguished group of scholars working in different but related disciplines and aims to provide a fresh look at this research triangle The objective is to offer a concise overview of current developments and insights derived from recent studies in Europe and North America All of the contributions are based on original research undertaken in the various regions and nations and are published here for the first time We are grateful to all those who have contributed to this volume for their willingness to participate in the project Without their co operation this book would not have been possible We should like in addition to thank Angela Spence for her careful linguistic editing and assistance in co ordinating the production of the camera ready copy Lastly but not least we wish to express our gratitude for support from our home institutions and in particular the Austrian Academy of Sciences Institute for Urban and Regional Research the Austrian Ministry for Science and Transport the Styrian Government Section for Science and Research and the Federation of Austrian Industry in Styria for the financial backing received April 1999 Manfred M Innovation Networks and Learning Regions? James Simme,2004-08-02 Innovation Networks and Learning Regions address key issues of understanding in contemporary economic geography and local economic policy making in cities and regions in the advanced economies Developing the idea that innovation is the primary driving force behind economic change and growth the international range of contributors stress the importance of knowledge and information as the raw materials of innovation They examine the ways in which these elements may be acquired and linked through networks and demonstrate that there are empirical examples of innovative areas which do not have highly developed networks yet appear to be relatively successful in terms of local economic growth In so doing they raise crucial questions about the ways in which regions or localities might be described as truly learning areas and about the sustainability of future economic and quality of life success based on innovation and high technology *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1997* United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies,1996 Health Policy and High-tech Industrial Development Marco R. Di Tommaso,Stuart O. Schweitzer,2005-01-01 Health economists should consider the advantages of viewing a country s health system not only as a unique industry that produces both health care and high technology goods and services but that it also possess the ability to stimulate development of a broader array of high technology industries Development and industrial economists and policymakers will also see the health sector from this different and innovative perspective **Industrial Development in Singapore, Taiwan, and South Korea** Kai-Sun Kwong,2001 Economic

analysis of the industrial experiences of the newly industrialized economies in Asia is generally lacking in the literature This study attempts to fill that void by providing an in depth discussion on the economic impact of the industrial policies of Singapore Taiwan and South Korea in the three and a half decades after 1960 Throughout the study a broad perspective of macroeconomic development is maintained It is highly critical of the narrow minded objective of certain governments in maximizing the pace of industrialization at the expense of general economic well being A comparative analysis of the industrial experiences of the three economies also shows a diversity of constraints and processes Singapore relied on multinational corporations Taiwan on returned engineers and South Korea on chaebols There appears to be no Asian formula for industrialization In Hong Kong there is an ongoing debate on whether some form of industrial policy should be introduced in view of the perception that Hong Kong is lagging behind the other economies in terms of technology Drawing on the experiences of the other economies the concluding chapter of the book provides an informed and balanced answer to this question

**Advanced Technology Program** National Research Council, Technology and Economic Policy, Board on Science, Technology, and Economic Policy, 1999-11-21 The growth in government programs to support high technology industry within national economies and their impact on international science and technology cooperation and on the multilateral trading system are of considerable interest worldwide Accordingly these topics were taken up by STEP in a study carried out in conjunction with the Hamburg Institute for Economic Research and the Institute for World Economics in Kiel One of the principal recommendations for further work emerging from that study was a call for an analysis of the principles of effective cooperation in technology development to include lessons from national and international consortia including eligibility standards and assessments of what new cooperative mechanisms might be developed to meet the challenges of international cooperation in high technology products

**Intellectual Property and Innovation Management in Small Firms** Robert Blackburn, 2003-09-02 Intellectual property protection is increasingly becoming a central issue for businesses This book provides a wealth of original research on intellectual property management in small and medium sized enterprises while also addressing the context of innovation and knowledge management
