The Long Arm of Moore's Law Cyrus C. M. Mody, 2016-12-09 How beginning in the mid 1960s the US semiconductor industry helped shape changes in American science including a new orientation to the short term and the commercial Since the mid 1960s American science has undergone significant changes in the way it is organized funded and practiced These changes include the decline of basic research by corporations a new orientation toward the short term and the commercial with pressure on universities and government labs to participate in the market and the promotion of interdisciplinarity In this book Cyrus Mody argues that the changes in American science that began in the 1960s co evolved with and were shaped by the needs of the civilianized US semiconductor industry In 1965 Gordon Moore declared that the most profitable number of circuit components that can be crammed on a single silicon chip doubles every year Mody views Moore s Law less as prediction than as self fulfilling prophecy pointing to the enormous investments of capital people and institutions the semiconductor industry required the long arm of Moore s Law that helped shape all of science Mody offers a series of case studies in microelectronics that illustrate the reach of Moore s Law He describes the pressures on Stanford University s electrical engineers during the Vietnam era IBM s exploration of alternatives to semiconductor technology the emergence of consortia to integrate research across disciplines and universities and the interwoven development of the the molecular electronics community and associated academic institutions as the vision of a

molecular computer informed the restructuring of research programs

A Review of the New Initiatives at the NASA Ames Research Center National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2001-06-23 NASA Ames Research Center in the heart of Silicon Valley is embarking on a program to develop a science and technology park bringing together leading companies and universities to capitalize on Ames exceptional mission and location Other initiatives under consideration include the integration of SBIR grants with a planned on site incubator virtual collaboration and possibly a new public venture capital program The STEP Board was asked by the NASA Administrator to hold a one day symposium to review these initiatives This report includes commissioned research papers and a summary of the proceedings of the symposium organized in response to the NASA request

Growth Policy in the Age of High Technology Jurgen Schmandt, Robert Wilson, 2018-03-29 Originally published in 1990 this book provides an authoritative and detailed account of the initiatives of US state governments with science and technology programs designed to foster economic growth Two key questions are posed Do state governments have policy instruments that are sufficiently powerful to affect the levels and growth rates of their regional economies and Are national and global economic forces so powerful that they render state action ineffective Several subsidiary themes are discussed in this context namely the most commonly used policy instruments the impacts on federalism and on governance and how well the universities and other educational institutions serve the economic activities imposed on them

The Man Behind the Microchip Leslie Berlin, 2005-06-10 Hailed as the Thomas Edison and Henry Ford of Silicon Valley Robert Noyce was a brilliant inventor a leading entrepreneur and a daring risk taker who piloted his own jets and skied mountains accessible only by helicopter Now in The Man Behind the Microchip Leslie Berlin captures not only this colorful individual but also the vibrant interplay of technology business money politics and culture that defines Silicon Valley Here is the life of a high tech industry giant The co founder of Fairchild Semiconductor and Intel Noyce co invented the integrated circuit the electronic heart of every modern computer automobile cellular telephone advanced weapon and video game With access to never before seen documents Berlin paints a fascinating portrait of Noyce an ambitious and intensely competitive multimillionaire who exuded a just folks sort of charm a Midwestern preacher's son who rejected organized religion but would counsel his employees to go off and do something wonderful a man who never looked back and sometimes paid a price for it In addition this vivid narrative sheds light on Noyce's friends and associates including some of the best known managers venture capitalists and creative minds in Silicon Valley Berlin draws upon interviews with dozens of key players in modern American business including Andy Grove Steve Jobs Gordon Moore and Warren Buffett their recollections of Noyce give readers a privileged first hand look inside the dynamic world of high tech entrepreneurship A modern American success story The Man Behind the Microchip illuminates the triumphs and setbacks of one of the most important inventors and entrepreneurs of our time

James B. Hunt Wayne Grimsley, 2003 Democrat James B Hunt had a long career in politics serving as governor of North Carolina from 1977 through 1985 and then again

from 1993 through 2001 He not only exemplified the progressive tradition of earlier North Carolina governors but transformed the tradition to embrace a concern for minorities women s rights and consumer issues This biography of James B Hunt begins with a discussion of the influence of his father a hard driving federal official who demanded much from his oldest son his mother a college educated teacher who encouraged him to study and work hard and his hometown of Rock Ridge where he developed his strong community ethic but had to deal with the town s support for racial segregation and tobacco It chronicles his years at North Carolina State College where he was student president for two terms his transformation from a campaign volunteer for Terry Sanford to a political insider at both the state and national levels and his close relationships with Sanford and his key adviser Bert Bennett The author then discusses how Hunt still unknown to most of the public defeated candidates with more campaign money to become lieutenant governor of the state in 1972 and describes his first two successful campaigns for the governorship and the actions he took and programs he implemented in his first term as governor

High-tech Betrayal Victor Gary Devinatz,1999 Based on seven months of working at a medical electronics factory dispels myths that the new high technology factories are better or safer places to work than auto factories and steel mills Also offers a perspective on trying to organize workers in a small non union factory in the early 1980s Annotation copyrighted by Book News Inc Portland OR

The Geography of Innovation M.P. Feldman,2013-06-29 This book offers a geographic dimension to the study of innovation and product commercialization Building on the literature in economics and geography this book demonstrates that product innovation clusters spatially in regions which provide concentrations of the knowledge needed for the commercialization process The book develops a conceptual model which links the location of new product innovations to the sources of these knowledge inputs The geographic concentration of this knowledge forms a technological infrastructure which promotes information transfers and lowers the risks and the costs of engaging in innovative activity Empirical estimation confirms that the location of product innovation is related to the underlying technological infrastructure and that the location of the knowledge inputs are mutually reinforcing in defining a region s competitive advantage The book concludes by considering the policy implications of these findings for both private firms and state governments This work is intended for academics policy practitioners and students in the fields of innovation and technological change geography and regional science and economic development This work is part of a larger research effort to understand why the location of innovative activity varies spatially specifically the externalities and increasing returns which accrue to location xi Acknowledgements This work has benefitted greatly from discussions with friends and colleagues I wish to specifically note the contribution of Mark Kamlet Wes Cohen Richard Florida Zoltan Acs and David Audretsch I would like to thank Gail Cohen Shaivitz for her dedication in editing the final manuscript

Technology in the Garden Michael I. Luger,Harvey A. Goldstein,2000-11-09 More than half of the 116 research parks now operating in the United States were established during the 1980s with the aim of boosting regional economic growth But until now no one has

systematically analyzed whether research parks do in fact generate new businesses and jobs Using their own surveys of all existing parks and case studies of three of the most successful Research Triangle Park in North Carolina Stanford Research Park in California and the University of Utah Research Park Michael Luger and Harvey Goldstein examine the economic impact of such facilities As the name suggests a research park is typically meant to provide a spacious setting where basic and applied technological research can be quietly pursued Because of the experience of a few older and prominent research parks new parks are expected to generate economic growth for their regions New or old most parks have close ties to universities which join in such ventures to enhance their capabilities as centers of research provide outlets for entrepreneurial faculty members and increase job opportunities for graduate students Too often the authors say the vision of incubating economic growth in a gardenlike preserve of research and development has failed because of poor planning lack of firm leadership and bad luck Although the longest lasting parks have met their original goals the newer ones have enjoyed at best only slight success Luger and Goldstein conclude that the older facilities have captured much of the market for concentrations of research and development firms and they discuss alternative strategies that could achieve some of the same goals as research parks but in a less costly way Many of these alternatives continue to include a role for universities and Luger and Goldstein shed fresh light on the linkage between higher education and the use of knowledge for profit

Regional Innovation Strategies Kevin Morgan, Claire Nauwelaers, Regional Studies Association (Seaford, England), 1999
Regional Innovation Strategies offers the first comprehensive analysis of the new wave of innovation oriented regional policies. It draws conclusions from the European Regional Technology Plans and Regional Innovation Strategies both in old industrialised areas and in regions where development is slow and compares this with US and Canadian experiences. Anticipating the enlargement of the EU, Regional Innovation Strategies also assesses the growing interest in the subject within policy, academic and practitioner circles in Central and Eastern European countries. This book aims to provide information on the new regional innovation policies and gives the first assessment of this promising pool of regional experiences.

Schlüsseltechnologie-Industrien Harald Bathelt, 2013-03-12
Angesichts der geänderten Wachstumsbedingungen in vielen Industriestaaten und ausgeprägter Strukturkrisen in alt industrialisierten Regionen zeigten Wissenschaft, Wirtschaft und Politik seit Mitte der 70er Jahre ein steigendes Interesse an Schlüsseltechnologie-Industrien. Man hoffte, daß Humankapital intensive technologisch sophistizierte Schlüsseltechnologie-Industrien in der Lage seien, Arbeitsplatzverluste in traditionellen Industriesektoren auszugleichen, neue Entwicklungsimpulse für die Gesamtwirtschaft auszuüben und auf lange Sicht die Beschäftigungssituation und das Wirtschaftswachstum auch auf regionaler Ebene zu stabilisieren. Vor diesem Hintergrund untersucht die vorliegende Arbeit den Einfluß von Schlüsseltechnologie-Industrien auf den regionalen Strukturwandel am Beispiel der USA und Kanadas. Als Untersuchungsregionen wurden das Silicon Valley Kalifornien, die Route 128 Region Massachusetts, das Research Triangle North Carolina, die Atlanta MSA Georgia, Ottawa's Telecom Valley Ontario und Canada's Technology Triangle Ontario ausgewählt. Basierend auf Untersuchungen vor Ort und einer eigens durchgeführten Unternehmensbefragung von 160 Schlüsseltechnologie-Unternehmen wird der Frage nachgegangen, welche Entwicklungsdeterminanten das Entstehen von Schlüsseltechnologie-Agglomerationen beeinflussen. Ausgehend von einer regionalen Untersuchungsebene werden die Bedingungen analysiert, unter denen Schlüsseltechnologie-Unternehmen ihre Standortentscheidungen treffen und in Beziehung zu theoretischen Erklärungsansätzen der industriellen Standortlehre gesetzt.

Growing a Japanese Science City James W. Dearing, 2002-09-11
Tsukuba Science City is the world's most ambitious attempt to turbocharge scientific collaboration. James W. Dearing looks at the political and economic context within which the plans for Tsukuba were laid, how those plans changed during the process of implementation and at the functioning of Tsukuba today. Tsukuba is vitally important to Japan's basic scientific research. Its history, its failures and successes need to be understood by governments and businesses planning for scientific research and economic growth.

Innovation in Science and Organizational Renewal Thomas Heinze, Richard Münch, 2016-07-11
This book looks at the types of new research organizations that drive scientific innovation and how ground-breaking science transforms research fields and their organization. Based on historical case studies and comparative empirical data, the book presents new and thought-provoking evidence that improves our knowledge

and understanding about how new research fields are formed and how research organizations adapt to breakthroughs in science While the book is firmly based in science history it discusses more general sociological and policy propositions regarding scientific innovations and organizational change The volume brings together leading scholars both from the United States and Europe

Technology, Regions, and Policy John Rees, 1986 Technology Regions and Policy examines the links between technological change regional development and government policy This timely book provides a synthesis of recent scholarship the results of original research projects carried out by a distinguished group of academics It explores the complex questions of how high technology areas develop the factors influencing the spread of industrial technology and the impact of technological change on labor creation and displacement

Tar Heel Politics 2000 Paul Luebke, 2000-11-09 Offering an insightful analysis of North Carolina political trends and personalities Paul Luebke moves beyond the usual labels of Republican and Democrat conservative and liberal In Tar Heel Politics 2000 he argues that North Carolina s real political battle is between two factions of the state s political and economic elite modernizers and traditionalists Modernizers draw their strength from the bankers developers news media and

other urban interests that support growth he says Traditionalists in contrast are rooted in small town North Carolina and fundamentalist Protestantism tied to agriculture and low wage industries and threatened by growth and social change Both modernizers and traditionalists are linked with politicians who represent their interests An updated and revised version of Luebke s Tar Heel Politics Myths and Realities 1990 Tar Heel Politics 2000 highlights the resurgence of the southern Republican Party for the first time in a century and discusses a number of significant changes that have occurred over the last decade These include the institutionalization of a viable two party system in the General Assembly the further shift of native born whites throughout the South into the Republican voting column and ideological conflict in North Carolina that parallels to some extent the post 1994 battles between the Republican Congress and the Clinton White House In addition the book provides a detailed analysis of the political appeal of Senator Jesse Helms and draws on Luebke s insights as a member of the North Carolina State House since 1991
