Historic Railroads of Nebraska Michael M. Bartels,James J. Reisdorff,2002 The advance of Union Pacific Railroad tracklayers across Nebraska was part of America s great adventure of the 19th century It marked the beginning of the era of the iron horse in Nebraska a time when the whistle of an approaching train became synonymous with prosperity and contact with the outside world Historic Railroads of Nebraska takes a photographic journey down the tracks of the five major railroads and various short lines that helped Nebraska progress into a national center of agriculture and business The trip begins with the formative years of Nebraska towns that were established along railroad lines in the 19th century It then travels through the 20th century and documents the major changes and challenges that the railroad industry faced Through over 200 photographs this book chronicles the era of streamlined passenger trains rustic steam locomotives and a bustling Omaha Union Station The journey makes stops at railroad landmarks significant cities the state s only railroad tunnel and the legendary North Platte Canteen The Iron Road in the Prairie State Simon Cordery,2016-01-20 In 1836 Abraham Lincoln and Stephen Douglas agreed on one thing Illinois needed railroads Over the next fifty years the state became the nation s railroad hub with Chicago at its center Speculators greed growth and regulation followed as the railroad industry consumed unprecedented amounts of capital and labor A nationwide market resulted and the Windy City became the site of opportunities and challenges that remain to this day In this first of its kind history full of entertaining anecdotes and colorful characters Simon Cordery describes the explosive growth of Illinois railroads and its impact on America Cordery shows how railroading in Illinois influenced railroad financing the creation of a national economy and government regulation of business

Cordery's masterful chronicle of rail development in Illinois from 1837 to 2010 reveals how the state's expanding railroads became the foundation of the nation's rail network

Iron Rails, Iron Men, and the Race to Link the Nation Martin W. Sandler, 2015-09-08

Experience the race of rails to link the country and meet the men behind this incredible feat in a riveting story about the building of the transcontinental railroad brought to life with archival photos

In the 1850s gold fever swept the West but people had to walk, sail or ride horses for months on end to seek their fortune

The question of faster, safer transportation was posed by national leaders

But with 1,800 miles of seemingly impenetrable mountains, searing deserts and endless plains between the Missouri River and San Francisco could a transcontinental railroad be built?

It seemed impossible

Eventually two railroad companies the Central Pacific which laid the tracks eastward and the Union Pacific which moved west began the job

In one great race between iron men with iron wills tens of thousands of workers blasted the longest tunnels that had ever been constructed built the highest bridges that had ever been created and finally linked the nation by two bands of steel changing America forever
