High School English Instruction Today James R. Squire, Roger K. Applebee, **High School English Instruction Today** J. Squire, 1968 **Resources in Education**, 1997 **Research in Education**, 1974 The Future of English Teaching Worldwide Andrew Goodwyn, Cal Durrant, Wayne Sawyer, Lisa Scherff, Don Zancanella, 2018-10-31 The seminal Dartmouth Conference 1966 remains a remarkably influential moment in the history of English teaching Bringing together leading voices in contemporary English education this book celebrates the Conference and its legacy drawing attention to what it has achieved and the questions it has raised Encompassing a multitude of reflections on the Dartmouth Conference The Future of English Teaching Worldwide provides fresh and revisionist readings of the meeting and its leading figures Chapters showcase innovative and exciting new insights for English scholars and address both theoretical and practical elements of teaching English in a variety of settings and countries Covering topics including the place of new media in English curricula the role of the canon poetry and grammar the text is divided into three accessible parts Historical perspectives Dartmouth today why it still matters Reflections but for the future This powerful collection will be of value to researchers postgraduate students literature scholars practitioners teacher educators trainee and in service teachers as well as other parties involved in the teaching and study of English **Exchanging Writing, Exchanging Cultures** Sarah Warshauer Freedman, 1994 What can teachers in British and American inner city schools learn from each other about literacy training To explore this question Sarah Warshauer Freedman and her British colleagues set up a writing exchange that matched classes from four middle and high schools in the San Francisco Bay area with their London equivalents Exchanging Writing Exchanging Cultures offers concrete lessons to school reformers policymakers and classroom teachers about the value and effectiveness of different approaches to teaching writing Freedman goes beyond the specific subject matter of this study looking anew at Vygotsky's and Bakhtin's theories of social interaction and addressing the larger questions of the relationship between culture and education The Evolution of College English Thomas P. Miller, 2014-03-18 Thomas P. Miller defines college English studies as literacy studies and examines how it has evolved in tandem with broader developments in literacy and the literate He maps out four corners of English departments literature language studies teacher education and writing studies Miller identifies their development with broader changes in the technologies and economies of literacy that have redefined what students write and read which careers they enter and how literature represents their experiences and aspirations Miller locates the origins of college English studies in the colonial transition from a religious to an oratorical conception of literature A belletristic model of literature emerged in the nineteenth century in response to the spread of the penny press and state mandated schooling Since literary studies became a common school subject professors of literature have distanced themselves from teachers of literacy In the Progressive era that distinction came to structure scholarly organizations such as the MLA while NCTE was established to develop more broadly based

teacher coalitions In the twentieth century New Criticism came to provide the operating assumptions for the rise of English departments until those assumptions became critically overloaded with the crash of majors and jobs that began in 1970s and continues today For models that will help the discipline respond to such challenges Miller looks to comprehensive departments of English that value studies of teaching writing and language as well as literature According to Miller departments in more broadly based institutions have the potential to redress the historical alienation of English departments from their institutional base in work with literacy Such departments have a potentially quite expansive articulation apparatus Many are engaged with writing at work in public life with schools and public agencies with access issues and with media ethnic and cultural studies With the privatization of higher education such pragmatic engagements become vital to sustaining a civic vision of English studies and the humanities generally
