**The Transformation of American Air Power** Benjamin S. Lambeth, 2018-10-18 Since the unprecedentedly effective performance of the allied air campaign against Iraq during Operation Desert Storm the role of American air power in future wars has become a topic of often heated public debate In this balanced appraisal of air power s newly realized strengths in joint warfare Benjamin Lambeth a defense analyst and civilian pilot who has flown in most of the equipment described in this book explores the extent to which the United States can now rely on air delivered precision weapons in lieu of ground forces to achieve strategic objectives and minimize American casualties Beginning with the U S experience in Southeast Asia and detailing how failures there set the stage for a sweeping refurbishment of the nation s air warfare capability Lambeth reviews the recent history of American air power including its role in the Gulf War and in later conflicts in Bosnia Kosovo and Serbia He examines improvements in areas ranging from hardware development to aircrew skills and organizational adaptability Lambeth acknowledges that the question of whether air power should operate independently or continue to support land operations is likely to remain contentious He concludes however that air power its strategic effectiveness proven can now set the conditions for victory even from the outset of combat if applied to its fullest potential The Admirals' Advantage Christopher Ford, David A Rosenberg, 2014-04-15 Operational intelligence knowledge of the enemy s location and actions is crucial to effective military operations The Admirals Advantage offers a revealing look at naval operational intelligence based on the findings of a classified Operational Intelligence OPINTEL Lessons Learned Project and a 1998 Symposium at the Navy and Marine Corps Intelligence Training Center Participants included senior intelligence and operational leaders who explored the evolution and significance of OPINTEL since World War II Past and current practices were examined with inputs from fleet and shore commands and insights from interviews and correspondence with senior flag officers and intelligence professionals **Seapower** Geoffrey Till, 2018-06-19 This is the fourth revised and updated edition of Geoffrey Till s Seapower A Guide for the Twenty first Century The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind s prosperity and security and this is even more true in the early twenty first century with the emergence of an increasingly globalised world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today s navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime

century This book investigates the consequences of all this for the developing nature composition and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty first century Seapower is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and international relations **High Seas**

William A. Owens, 1995 Breaking with tradition Admiral William Owens vice chairman of the Joint Chiefs of Staff and one of the nation's foremost strategic thinkers prescribes new roles and missions and revolutionary new ships and aircraft needed for a new Navy and lets readers in on their planning **The Chairmanship of the Joint Chiefs of Staff, 1949-2016**

Nathan S. Lowrey, 2016 This revised fifth edition examines the development of the chairmanship as an institution over the last sixty seven years It presents an expanded historical essay and four additional career biographies with associated updates to the supplementary sections and appendices p vii Seaforth World Naval Review 2015 Conrad Waters, 2014-11-05 Now

in its seventh year this annual has established an international reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months It combines regional surveys with one off major articles on noteworthy new ships and other important developments Besides the latest warship projects it also looks at wider issues of importance to navies such as aviation and electronics and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance The 2015 edition looks in detail at the French Navy and the Bangladesh and Myanmar navies while significant ships include the Montford Point class mobile landing platforms the Samuel Becket offshore patrol vessels and the Skjold class fast attack craft There are technological reviews dealing with naval aviation by David Hobbs and current mine warfare developments by Norman Friedman while warship recycling is discussed by Ian Buxton Intended to make interesting reading as well as providing authoritative reference there is a strong visual emphasis including specially commissioned drawings and the most up to date photographs and artists impressions For anyone with an interest in contemporary naval affairs whether an enthusiast or a defence professional this annual has become required reading **American Carrier Air Power at the Dawn of a New Century** Benjamin S.

Lambeth, 2006-05-22 In the Afghanistan war U S carrier based fighters substituted almost entirely for land based theater air forces The Navy's carriers again played a key role in conducting around the clock operations against Saddam Hussein's forces in Iraq American carrier air power is now able to conduct coordinated deep strike missions well beyond coastal reaches The Navy's performance over Afghanistan and Iraq showed how the nation's carrier force can provide around the clock target coverage consistently accurate target attack and multiple successful target attacks per sortie Sea Power in the Twenty-First Century Charles Koburger, 1997-09-16 As the U S Navy enters the twenty first century many of the ships aircraft weapons and tactics it employed so successfully during the Cold War will no longer be cost effective or even effective Future battlefields will shift the locus of naval action from the high seas into littoral waters demanding sustained operations

in relatively narrow shallow waters Naval forces in the twenty first century must not only meet the traditional requirements of command of the sea ships planes troops and bases carrying out forward presence crisis response strategic deterrence and sealift They must now put these together to obtain the four key operational capabilities of littoral warfare command control intelligence and surveillance and communication battlespace dominance power projection and force sustainment The core of the new U S strategic concept is power projection and it envisions naval forces directly leading Army and Air Force elements to influence events ashore most probably in the Third World And this navy must be cost effective Signal ,1995

*Budgeting for Naval Forces* Eric Jackson Labs,2000 Prepared for the Subcommittee on Sea Power of the U S Senate Committee on Armed Services Addresses the question of how much money the U S Department of the Navy needs to sustain its current force of about 300 ships and 3 500 aircraft Examines the Navy s missions its modernization plans and the budgetary implications of supporting the service s current and planned fleets through 2020 It also looks at four alternative force structures that the Navy might be able to sustain at roughly its current funding level of 90 billion adjusted for inflation Charts and tables Routledge Handbook of Defence Studies David J. Galbreath,John R. Deni,2018-02-12 The Routledge Handbook of Defence Studies provides a comprehensive collection of essays on contemporary defence studies by leading international scholars Defence studies is a multi disciplinary study of how agents predominantly states prepare for and go to war Whereas security studies has been broadened and stretched to cover at times the near totality of international and domestic affairs and war studies has come to mean not just operations and tactics but also experiences and outcomes defence studies remains a coherent area of study primarily aimed at how defence policy changes over time and in relation to stimulating factors such as alterations in power strategy and technology This new Handbook offers a complete landscape of this area of study and contributes to a review of defence studies in terms of policy security and war but also looks forward to new challenges to existing conceptions of defence and how this is changing as states and their militaries also change The volume is divided into four thematic sections Defence as Policy Defence Practice Operations and Tactics and Contemporary Defence Issues The ability to review the field while also looking forward to further research is an important element of a sustainable text on defence studies In as much as this volume is able to highlight the main themes of defence studies it also offers an in depth look into how defence issues can be examined and compared in a contemporary setting This Handbook will be of great interest to students of defence studies strategic studies war studies security studies and IR **Home Squadron** James C Rentfrow,2014-04-15 This study examines the transformation of the United States Navy as a fighting organization that took place on the North Atlantic Station between 1874 and 1897 At the beginning of this period the warships assigned to this station were collectively administered by a rear admiral but were operationally deployed as individual units each of whose actions were directed by their captains By 1897 the North Atlantic or Home Squadron as it was known was a group of warships constituting a protean battle fleet that is an organized body moving and fighting in close order which meant that

the actions of the captains were directed by a commanding admiral The process of the development of an American battle fleet resulted in the construction of a new organizational identity for the North Atlantic Squadron This process was as critical as the eventual outcome It was not linear but one in which progress in critical areas was modulated by conflicting demands that caused distraction From 1874 1888 exercises in fleet tactics under steam were carried out sporadically utilizing existing wooden cruising vessels From 1889 1894 the last wooden cruisers were decommissioned and the Squadron consisted entirely of new steel warships Ad hoc concentrations of vessels for purposes besides exercise and training retarded the continued development of doctrine and tactics necessary for a multi ship fighting capability during this time However much work was done to develop a concept of multi ship operations From 1895 1897 the identity of the North Atlantic Squadron as a combat unit solidified Tactical exercises were held that had specific offensive and defensive wartime applications These exercises were necessary to develop a combat capability The results of this study demonstrate that the United States government had an interest in developing an offensive naval combat capability as early as the 1870 s Based on the record of the North Atlantic Squadron it is argued that imperial aspirations in the sense of possessing a capability to restrict the actions of other great powers in the Caribbean region existed prior to the War of 1898 However the process of change often resulted in the appearance of capability without the rigorous exercise necessary to possess it *Strategy Shelved* Steven Wills, 2021-08-15

As U S strategy shifts once again to focus on great power competition *Strategy Shelved* provides a valuable analytic look back to the Cold War era by examining the rise and eventual fall of the U S Navy s naval strategy system from the post World War II era to 1994 Steven T Wills draws some important conclusions that have relevance to the ongoing strategic debates of today His analysis focuses on the 1970s and 1980s as a period when U S Navy strategic thought was rebuilt after a period of stagnation during the Vietnam conflict and its high water mark in the form of the 1980s maritime strategy and its attendant six hundred ship navy force structure He traces the collapse of this earlier system by identifying several contributing factors the provisions of the Goldwater Nichols Act of 1986 the aftermath of the First Gulf War of 1991 the early 1990s revolution in military affairs and the changes to the Chief of Naval Operations staff in 1992 following the end of the Cold War All of these conditions served to undermine the existing naval strategy system The Goldwater Nichols Act subordinated the Navy to joint control with disastrous effects on the long serving cohort of uniformed naval strategists The first Gulf War validated Army and Air Force warfare concepts developed in the Cold War but not those of the Navy s maritime strategy The Navy executed its own revolution in military affairs during the Cold War through systems like AEGIS but did not get credit for those efforts Finally the changes in the Navy OPNAV staff in 1992 served to empower the budget arm of OPNAV at the expense of its strategists These measures laid the groundwork for a thirty year strategy of means where service budgets a desire to preserve existing force structure and lack of strategic vision hobbled not only the Navy but also the Joint Force s ability to create meaningful strategy to counter a rising China and a revanchist Russian threat Wills concludes his analysis with an

assessment of the return of naval strategy documents in 2007 and 2015 and speculates on the potential for success of current Navy strategies including the latest tri service maritime strategy His research makes extensive use of primary sources oral histories and navy documents to tell the story of how the U S Navy created both successful strategies and how a dedicated group of naval officers were intimately involved in their creation It also explains how the Navy s ability to create strategy and even the process for training strategy writers was seriously damaged in the post Cold War era

**Defensive Restructuring of the Armed Forces in Southern Africa** Bjørn Møller,Gavin Cawthra,2019-01-15 Published in 1997 the work explores the reorientation of security policies and the accompanying restructuring of the armed forces going on in Southern Africa under entirely new circumstances Democracy has come to South Africa the civil wars in Angola and Mozambique have ended and the region is establishing a regional framework for cooperation While covering the entire region a special focus is placed on South Africa which is predestined to play a leading role but which is struggling with the legacy of the apartheid regime and its repeated aggressions against neighbouring states A defensive restructuring of the South African of the South African military is an element in the building of mutual trust The implications of such defensive restructuring to a non offensive defence are described in detail In addition to the analytical contribution the work also contains central documents and a bibliography

**The Chairmanship of the Joint Chiefs of Staff, 1949-1999** ,2000 By Lorna S Jaffe et al Gives a historical perspective on the development of the chairmanship as an institution as well as on the Chairman s an d Vice Chairman s role in the formation and implementation of our national security policy Sheds light on civil military relations at the highest level during the Cold War and its immediate aftermath Provides valuable insight into the interaction of individuals circumstances and law which produced the chairmanship as we know it today

**The Threat on the Horizon** Loch K. Johnson,2011-02-09 The Aspin Brown Commission of 1995 1996 led by former U S Defense Secretaries Les Aspin and Harold Brown was a landmark inquiry into the activities of America s secret agencies The purpose of the commission was to help the Central Intelligence Agency and other organizations in the U S intelligence community adapt to the quite different world that had emerged after the end of the Cold War in 1991 In The Threat on the Horizon eminent national security scholar Loch K Johnson who served as Aspin s assistant offers a comprehensive insider s account of this inquiry Based on a close sifting of government documents and media reports interviews with participants and above all his own eyewitness impressions Johnson s thorough history offers a unique window onto why the terrorist attacks of 2001 caught the United States by surprise and why the intelligence community failed again in 2002 when it predicted that Iraq possessed weapons of mass destruction It will be the first published account by an insider of a presidential commission on intelligence a companion volume to Johnson s acclaimed study of the Church Committee investigation into intelligence in 1975 A Season of Inquiry This examination of the Aspin Brown Commission is an invaluable source for anyone interested in the how the intelligence agencies of the world s most powerful nation struggled to confront new global threats that followed the collapse of the Soviet

empire and why Washington D C was unprepared for the calamities that would soon arise *Joint Force Quarterly* ,1995  
Naval Engineers Journal ,1999 *Naval Strategy in Northeast Asia* Duk-Ki Kim,2012-10-12 Over the past decade  
Northeast Asia has been dominated by quite significant strategic change which is ongoing and brings with it many  
uncertainties naval capabilities in Northwest Asia are instrumental in promoting maritime security interests helping to build  
a stable security environment through active participation in regional naval co operation This landmark book explores the  
region s maritime peace and stability and examines in depth the strategic military and apolitical issues that underpin any  
effort to develop maritime co operation **The Chairmanship of the Joint Chiefs of Staff, 1949-2019** Nathan S.
