War Department, 1944 **True Faith** Rev. Silas Kanyabigega DMin, 2017-02-24 God required the price to remove his anger against the humankind who offended him He wanted to see in that price a death with bloodshed as evidence demonstrating a

sacrifice for the forgiveness of the sinners For God all sinners had to die So when Jesus died the corpse of Jesus represented the corpse of all sinners God was satisfied when he saw the corpse of Jesus God put in his mind that he had killed all mankind The punishment was then given and the problem between him and the humankind was resolved Jesus Christs corpse has ability to be the price required by God His blood as a killed sacrifice is the evidence of the death required by God The blood of animals was not needed in the mankind's salvation process The blood required by God was to be a mankind's blood This blood had to come from the death of a perfect person perfect as God himself The problem was only to be solved by the blood of God himself because only God is perfect But God could only die by taking human form that is why the Second Person of the Trinity Jesus Christ descent to earth to die in the place of humankind through an agonizing death at the cross of Golgotha and therefore he paid the price required by God Then God died as self substitution for men He was God man In beliefs of different world religions we cant find any other god who died for people Only God in whom Christians believe in died for humankind and he had risen He is alive Only the Faith in God propitiated for sinners is True Faith and other beliefs are false faith

A Theory of Legitimate Expectations for Public Administration Alexander Brown,2017-11-28 It is an unfortunate but unavoidable feature of even well ordered democratic societies that governmental administrative agencies often create legitimate expectations procedural or substantive on the part of non governmental agents individual citizens groups businesses organizations institutions and instrumentalities but find themselves unable to fulfil those expectations for reasons of justice the public interest severe financial constraints and sometimes harsh political realities How governmental administrative agencies operating on behalf of society handle the creation and frustration of legitimate expectations implicates a whole host of values that we have reason to care about including under non ideal conditions not least justice fairness autonomy the rule of law responsible uses of power credible commitments reliance interests security of expectations stability democracy parliamentary supremacy and legitimate authority This book develops a new theory of legitimate expectations for public administration drawing on normative arguments from political and legal theory Brown begins by offering a new account of the legitimacy of legitimate expectations He argues that it is the very responsibility of governmental administrative agencies for creating expectations that ought to ground legitimacy as opposed to the justice or the legitimate authority of those agencies and expectations He also clarifies some of the main ways in which agencies can be responsible for creating expectations Moreover he argues that governmental administrative agencies should be held liable for losses they directly cause by creating and then frustrating legitimate expectations on the part of non governmental agents and if liable have an obligation to make adequate compensation payments in respect of those losses [AR 635-200](#)
