The Still Divided Academy Stanley Rothman, April Kelly-Woessner, Matthew Woessner, 2010-12-16 The Still Divided Academy is a wonderful examination of the academic community that shows their inner workings by addressing a broad range of issues including academic politics tenure perceived and real political imbalance academic freedom and diversity Administrators professors and students have very different priorities values and expectations and therefore often have conflicting opinions on these issues Drawing on data collected in a specially commissioned public opinion survey as well as other recent research on higher education Rothman Kelly Woessner and Woessner create an incredibly readable presentation of both the similarities and differences between those running our universities and those attending them The authors manage to remain impressively neutral instead they give us a fuller perspective of the people on our college campuses

The Future of American Higher Education Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the realities of growing social inequality the intractable presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who

have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B. Rubin Marc Bousquet Patricia Hill Collins Lori Patton Davis William Deresiewicz Stanley Fish Marybeth Gasman Henry Giroux Sara Goldrick Rabb Amy Gutmann Russell Jacoby Randall Kennedy David Kirp David F. Baker, 2023-07-03 Winner of the 2012 ASHE CAHEP Barbara Townsend Lecture Award To prosper and thrive in an increasingly unpredictable national and global environment U.S. higher education will need to adapt, innovate and evolve once again as it has during every major societal change over the past four centuries The purpose of this new edition published a turbulent decade after the first is to provide institutional leaders from department chairs to trustees with a broad understanding of the academic enterprise strategic guidance and key principles to assist them in navigating the future and drive the success of their institutions as they confront the unimaginable Recognizing that the hallmark of higher education in the U.S. is the diversity of institution types each of which is affected differently by external and internal influences the authors provide examples and ideas drawn from the spectrum of colleges and universities in the not-for-profit sector This book covers the major functions and constituent departments and units within institutions the stakeholders from students and faculty through the echelons of administration the external environment of elected officials foundations philanthropists and the new changing media and innovations in teaching technology data analytics legal frameworks as well as economic demographic and political pressures The book is informed by the proposition that adhering to four principles which the authors identify as having enabled institutions of higher education to successfully navigate ever-changing and volatile pasts will enable them to flourish in the coming decades The four principles are 1 Be mission-centric by making all key decisions based on a core mission and set of values 2 Be able to adapt to environmental change in alignment with the mission and core values 3 Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus 4 Be models for inclusion equity and positive social change **State Higher Educational Institutions of Iowa** Charles Hubbard Judd, Charles William Eliot, J. Academy Adrianna Kezar, Tom DePaola, Daniel T. Scott, 2019-10-29 Why the Gig Academy is the dominant organizational form within the higher education economy and its troubling implications for faculty students and the future of college education Over the past two decades higher education employment has undergone a radical transformation with faculty becoming contingent staff being outsourced and postdocs and graduate students becoming a larger share of the workforce For example the faculty has shifted from one composed mostly of tenure track full time employees to one made up of contingent part time teachers Non tenure track instructors now make up 70 percent of college faculty Their pay for teaching eight courses averages 22 400 a year less than the annual salary of most fast food workers In The Gig Academy Adrianna Kezar Tom DePaola and Daniel T Scott assess the impact of this disturbing workforce development Providing an overarching framework that takes the concept of the gig economy and applies it to the university workforce this book scrutinizes labor restructuring across both academic and nonacademic spheres By synthesizing these employment trends the book reveals the magnitude of the problem for individual workers across all institutional types and job categories while illustrating the damaging effects of these changes on student outcomes campus community and institutional effectiveness A pointed critique of contemporary neoliberalism the book also includes an analysis of the growing divide between employees and administrators The authors conclude by examining the strengthening state of unionization among university workers Advocating a collectivist action oriented vision for reversing the tide of exploitation Kezar DePaola and Scott urge readers to use the book as a tool to interrogate the state of working relations on their own campuses and fight for a system that is run democratically for the benefit of all Ultimately The Gig Academy is a call to arms one that encourages non tenure track faculty staff postdocs graduate students and administrative and tenure track allies to unite in a common struggle against the neoliberal Gig Academy [Making the World Global](#) Isaac A. Kamola, 2019-06-07 Following World War II the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge

about the world as a collection of distinct nation states As neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold By the 1990s American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education In *Making the World Global* Isaac A Kamola examines how the relationships among universities the American state philanthropic organizations and international financial institutions created the conditions that made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced
