Jones, 2016-03-23 A comprehensive exploration of the philosophical issues raised by mysticism This work is a comprehensive study of the philosophical issues raised by mysticism Mystics claim to experience reality in a way not available in normal life a claim which makes this phenomenon interesting from a philosophical perspective Richard H Jones s inquiry focuses on the skeleton of beliefs and values of mysticism knowledge claims made about the nature of reality and of human beings value claims about what is significant and what is ethical and mystical goals and ways of life Jones engages language epistemology metaphysics science and the philosophy of mind Methodological issues in the study of mysticism are also addressed Examples of mystical experience are drawn chiefly from Buddhism and Advaita Vedanta but also from Christianity Judaism Islam and Daoism This is a significant extension of the seminal work by Walter Stace *Mysticism and Philosophy* That work has stimulated much literature all of which Jones manages to review here He critically extends Stace s universal core and embeds it in a sophisticated discussion of the extent range and metaphysical implications of mysticism Ralph W Hood Jr coauthor of *The Psychology of Religion An Empirical Approach* **The Bigger Picture** Alexander Beiner, 2023-06-13 Can psychedelic drugs help us tackle the biggest problems we face globally Can they heal the cultural spiritual and political wounds we re wrestling with Psychedelics have hit the mainstream as powerful new mental health treatments But as clinicians explore what these molecules can do for our individual minds *The Bigger Picture* goes further to illuminate how psychedelics can help us find new ways to make sense of and come through the crises we face around the world Drawing on the latest research as well as his unique experience as a participant in a ground breaking clinical trial investigating the potent psychedelic DMT Alexander Beiner reveals the role of psychedelics in addressing global issues such as global warming geopolitical instability and political polarization the dark side of the psychedelic renaissance and psychedelic capitalism what it takes to elicit huge personal and cultural transformation through psychedelics Embark on a journey into *The Bigger Picture* a new era of science and spirituality with

the potential to radically transform our perceptions of ourselves one another and our life on this planet      Neuropsychedelica Nicolas Langlitz, 2013 Neuropsychedelica examines the revival of psychedelic science since the Decade of the Brain After the breakdown of this previously prospering area of psychopharmacology and in the wake of clashes between counterculture and establishment in the late 1960s a new generation of hallucinogen researchers used the hype around the neurosciences in the 1990s to bring psychedelics back into the mainstream of science and society This book is based on anthropological fieldwork and philosophical reflections on life and work in two laboratories that have played key roles in this development a human lab in Switzerland and an animal lab in California It sheds light on the central transnational axis of the resurgence connecting American psychedelic culture with the home country of LSD In the borderland of science and religion Neuropsychedelica explores the tensions between the use of hallucinogens to model psychoses and to evoke spiritual experiences in laboratory settings Its protagonists including the anthropologist himself struggle to find a place for the mystical under conditions of late modern materialism      **Psychology and the Perennial Philosophy** Samuel Bendeck Sotillos, 2013-05-01 Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society In this groundbreaking anthology leading authors from the perennialist school including Huston Smith Seyyed Hossein Nasr and Frithjof Schuon draw on the age old insights of the world's wisdom traditions to argue that modern psychology behaviorism psychoanalysis humanistic and transpersonal psychology overlooks the specifically spiritual factors contributing to mental health and illness      *Christ Returns from the Jungle* Marc G. Blainey, 2021-06-01 After more than 450 years of European intrusions into South America's rainforest small groups of people across Europe now gather discreetly to participate in Amazonian ceremonies their local governments consider a criminal act As devotees of a new Brazil based religion called Santo Daime they claim that they contact God by way of ayahuasca a potent psychoactive beverage first developed by native communities in pre Columbian Amazonia This bitter brown liquid is a synergy of plants containing DMT a mind altering chemical classified as an illicit hallucinogen in most countries By contrast Santo Daime members daimistas revere ayahuasca as a sacrament combining it with rituals and theologies borrowed from Christian mysticism indigenous shamanism Afro Brazilian spiritualism and Western esotericism The Santo Daime religion was founded in 1930 by an Afro Brazilian rubber tapper named Raimundo Irineu Serra now known as Mestre Master Irineu Presenting results from more than a year of fieldwork with Santo Daime groups in Europe Marc G Blainey contributes new understandings of contemporary Westerners search for existential well being on an increasingly interconnected planet As a thorough exploration of daimistas beliefs about the therapeutic potentials of ayahuasca this book takes readers on an ethnographic journey into the deepest recesses of the human psyche      **Applied Mysticism** Richard H. Jones, 2025-03-01 Examines how mystical practices and experiences are being applied in secular contexts today Today is an exciting time for mysticism Interest in mysticism today often involves what Aldous Huxley called applied mysticism that is taking mystical

practices and experiences out of their traditional contexts where the focus was on the total transformation of the individual and applying them often within a secular framework to help other people with more limited worldly problems such as a person's well being in society or general social change. Neuroscientists are taking mystical experiences seriously studying meditators and psychedelic subjects to gain knowledge of how the brain works. Cognitive scientists are exploring mystical altered states of consciousness to expand the spectrum of consciousness states in particular whether there is a state of pure consciousness. Buddhist meditation is being taken out of its religious contexts and adapted by psychotherapists to help with problems such as depression or addiction. The use of psychedelics in psychotherapy is also gaining traction while New Age thinkers are extolling the alleged merger of post Newtonian science with mysticism. Mystical ideas are being adapted to problems on the social level for example in socially engaged Buddhism. This is the first book to explore all these varieties of applied mysticism together and to examine the current state of the field with a focus on philosophical issues in a readily accessible manner.

*Ecology, Cosmos and Consciousness* Mark A. Schroll, 2018-05-26 *Ecology Cosmos and Consciousness* is a pioneering work that attempts to shift current paradigms. Its editor and lead author Mark A. Schroll incisively identifies the problems humanity faces as a result of philosophies, sciences and religious movements that ignore the importance of an earth based focus of humanistic and transpersonal inquiry. The result is a transpersonal post modern systems oriented approach to cultural theory that is both provocative and well argued both visionary and practical both scholarly and whimsical. Stanley Krippner Ph.D. Professor of Psychology Saybrook University Oakland California.

Jewish Radicalisms Frank Jacob, Sebastian Kunze, 2019-12-16 Jewish radical thoughts and actions can be described in a variety of terms and dimensions. Often there is a connection implied between left wing ideas and activists as well as their radicalism. This volume surveys Jewish radicalisms and presents different approaches on this global historical phenomenon which are conceptualised as three different phenomena: Cultural, political and religious radicalism. The volume is focussed on the 20th century and tries to grasp the manifold ideas of Jewish radicalism and thereby wants to open up the discussion on this category. This discussion is needed not only within Jewish Studies to engage with this topic and broaden our understanding of Jewish Radicalism as well as to form a useful applicable category. This volume is to be understood as a call for and a contribution to this debate.

Darwin's Pharmacy Richard M. Doyle, 2011-10-01 Are humans unwitting partners in evolution with psychedelic plants? Darwin's Pharmacy shows they are by weaving the evolutionary theory of sexual selection and the study of rhetoric together with the science and literature of psychedelic drugs. Long suppressed as components of the human tool kit, psychedelic plants can be usefully modeled as eloquence adjuncts that intensify a crucial component of sexual selection in humans: discourse. Psychedelic plants seduce us to interact with them building an ongoing interdependence: rhetoric as evolutionary mechanism. In doing so they engage our awareness of the noosphere or thinking stratum of the earth. The realization that the human organism is part of an interconnected ecosystem is an apprehension of immanence that could ultimately benefit the planet.

and its inhabitants To explore the rhetoric of the psychedelic experience and its significance to evolution Doyle takes his readers on an epic journey through the writings of William Burroughs and Kary Mullis the work of ethnobotanists and anthropologists and anonymous trip reports The results offer surprising insights into evolutionary theory the war on drugs the internet and the nature of human consciousness itself Watch the book trailer <https://www.youtube.com/watch?v=xft2cAob4>
