The New New Zealand William Edward

Moneyhun,2020-01-17 Today's New Zealand is an emerging paradigm for successful cultural relations. Although the nation's Maori indigenous Polynesian and Pakeha colonial European populations of the 19th century were dramatically different and often at odds, they are today co-contributors to a vibrant society. For more than a century, they have been working out the kind of nation that engenders respect and well-being and their interaction, though often riddled with confrontation, is finally bearing bicultural fruit. By their model, the encounter of diverse cultures does not require the surrender of one to the other; rather, it entails each expanding its own cultural categories in the light of the other. The time is ripe to explore modern New Zealand's cultural dynamics for what we can learn about getting along. The present anthropological work focuses on religion and related symbols, forms of reciprocity, the operation of power, and the concept of culture in modern New Zealand society.

[Global Indigenous Politics](#) Sheryl Lightfoot,2016-05-20

This book examines how Indigenous peoples' rights and Indigenous rights movements represent an important and often overlooked shift in international politics, a shift that powerful states are actively resisting in a multitude of ways. While Indigenous peoples are often dismissed as marginal non-state actors, this book argues that far from insignificant, global Indigenous politics is potentially forging major changes in the international system, as the implementation of Indigenous peoples' rights requires a complete rethinking and reordering of sovereignty, territoriality, liberalism, and human rights. After thirty years of intense effort, the transnational Indigenous rights movement achieved passage of the UN Declaration on the Rights of Indigenous Peoples in September 2007. This book asks: Why did movement need to fight so hard to secure passage of a bare minimum standard on Indigenous rights? Why is it that certain states are so threatened by an emerging international Indigenous rights regime? How does the emerging Indigenous rights regime change the international status quo? The questions are addressed by exploring how Indigenous politics at the global level compels a new direction of thought in IR by challenging some of its fundamental tenets. It is argued that global Indigenous politics is a perspective of IR that, with the recognition of Indigenous peoples' collective rights to land and self-determination, complicates the structure of international politics in new and important ways, challenging both Westphalian notions of state sovereignty and the neo-liberal foundations of states and the

international human rights consensus Qualitative case studies of Canadian and New Zealand Indigenous rights based on original field research analyse both the potential and the limits of these challenges This work will be of interest to graduates and scholars in international relations Indigenous studies international organizations IR theory and social movements
