Infamy Lydia Cacho, 2016-03-21 In 2005 after publishing her book The Demons of Eden where she denounced the very powerful men behind the a Mexican child pornography ring Lydia Cacho became a target Exactly eight months after the publication of the book one morning as she was making her way to work Lydia was apprehended by the police from the neighboring state of Puebla and taken into custody during a nightmarish 24 hours during which she was tortured intimidated and abused In this chilling memoir comparable to Ayaan Hirsi Ali's Infidel Lydia tells her story and exposes the horrific ways in which women and young girls in particular are abused then disposed of while an oftentimes corrupt government simply sits and watches

Comic Effects Paul Lewis, 1989-08-15 Lewis draws on both humor theories and research arguing for the development of interdisciplinary methodologies in the study of literary humor He demonstrates that the sociologist of humor and the comic playwright approach the same subject humor in and between groups with different tools that writers of Bildungsromane and developmental psychologists share a common interest in the role of humor in maturation and that the monsters that haunt the psyches of professional comedians can be useful in understanding the odd minglings of humor and fear in Gothic fiction His treatment of writers who differ widely in their use of humor suggests that the complexity and diversity of humor make it a richly variable determinant of character genre and writer

Highway of Dreams A. Michael Noll, 2013-11-26 This important volume reviews the history of the telecommunication superhighway pointing out its beginnings in the interactive TV and broadband highway of the wired cities more than two decades ago It explains the technological uncertainties of the superhighway and many of its futuristic services and also gives an understandable review of the technological principles behind today's modern telecommunication networks and systems Recognizing that technology is only one factor in shaping the future the author a well recognized telecommunications expert analyzes the financial policy business and consumer issues that undermine the superhighway The book concludes by showing that today's switched telephone network and CATV systems already form a telecommunication

superhighway carrying voice data image and video communication for a wide variety of services that enable us to stay in contact with anyone anywhere on our planet Highway of Dreams is written clearly with understandable explanations for nonspecialists It challenges the technological utopia offered by the promoters of the superhighway and suggests that consumer needs finance corporate culture and policy often have far greater impact on the future than technology alone

Autonorama Peter Norton, 2021-10-21 The foundation has been laid for fully autonomous Elon Musk announced in 2016 when he assured the world that Tesla would have a driverless fleet on the road in 2017 It s twice as safe as a human maybe better Promises of technofuturistic driving utopias have been ubiquitous wherever tech companies and carmakers meet In *Autonorama* The Illusory Promise of High Tech Driving technology historian Peter Norton argues that driverless cars cannot be the safe sustainable and inclusive mobility solutions that tech companies and automakers are promising us The salesmanship behind the driverless future is distracting us from investing in better ways to get around that we can implement now Unlike autonomous vehicles these alternatives are inexpensive safe sustainable and inclusive Norton takes the reader on an engaging ride from the GM Futurama exhibit to smart highways and vehicles to show how we are once again being sold car dependency in the guise of mobility He argues that we cannot see what tech companies are selling us except in the light of history With driverless cars we re promised that new technology will solve the problems that car dependency gave us zero crashes zero emissions zero congestion But these are the same promises that have kept us on a treadmill of car dependency for 80 years *Autonorama* is hopeful advocating for wise proven humane mobility that we can invest in now without waiting for technology that is forever just out of reach Before intelligent systems data and technology can serve us Norton suggests we need wisdom Rachel Carson warned us that when we seek technological solutions instead of ecological balance we can make our problems worse With this wisdom Norton contends we can meet our mobility needs with what we have right now
