Occupy Management Monika Kostera,2015-03-05 It can be said that our times are characterized both by the omnipresence of organizations and by the destabilization of organized social life caused by the erosion of its structural and moral foundations such as long term employment social trust or an actual observance of the proclaimed codes of ethics At the same time there is a huge and growing potential for organized change due to the amount of students and graduates of different types of management studies and programmes all over the world The role of the state may become atrophied and corporations seem all too eager to seize ever more power while renouncing responsibility towards the environment and the employees but a huge and unprecedented number of people from all walks of life all social classes and all countries now have the qualifications to take over the responsibility for social organizations The objective of Occupy Management Inspirations and Ideas for Self Organization and Self Management is to make it evident to the student why and how he or she can manage without becoming part of corporate power structures Aimed at postgraduate students studying organizational and management theory as well as social entrepreneurship this book is not a simple

repetition of essential knowledge in these areas but a re direction of such knowledge towards self management and self organization

Exploring Children's Creative Narratives Dorothy Faulkner, Elizabeth Coates, 2011-04-04 How should we understand children's creativity This fascinating collection of international research offers fresh perspectives on children's creative processes and the expression of their creative imagination through dramatic play stories artwork dance music and conversation Drawing on a range of research evidence from innovative educational initiatives in a wide variety of countries Exploring Children's Creative Narratives develops new theoretical and practical insights that challenge traditional thinking about children's creativity The chapters written by well respected international contributors offer new conceptual and interpretive frameworks for understanding children's creativity contest conventional discourses about the origins and nature of creativity challenge the view that young children's creativity can only be judged in terms of their creative output explore the significance children themselves attribute to their creative activity argue the need for a radical reappraisal of the influence of the sociocultural context on children's creative expression discuss the implications of this research in relation to teacher education and curriculum design This broad yet coherent compilation of research on creativity in childhood is essential reading for students researchers and policy makers in early childhood as well as for Early Years professionals with a particular interest in creativity
