Identity Flexibility During Adulthood Jan D. Sinnott, 2017-09-15 This volume seeks to explore the idea of identity as a flexible center of events around which aspects of the self and events in the outside world are organized Historically in much of the literature identity was conceptualized as a somewhat fixed unchanging construct Scholars now have a greater awareness of more nuanced theories about identity and there is a greater willingness to accept that identity is not fixed concrete and permanent but rather evolving and fluid Although this volume discusses a wide variety of aspects of identity as it flexibly changes during adulthood in the face of numerous experiences it is really addressing one key question How adaptive and fluid is identity and how can we know ourselves as both continuing and changing Exploring these ideas raises the importance of future research on adult identity With a firm grounding in the historical and theoretical background of identity research this volume begins by defining identity and the psychological self as a center around which the person s behaviors and self concepts revolve The following chapters gather the wisdom of many writers who all accepted the challenge of talking about creating a flexible adult self and identity during adulthood They come at this challenging question from many different perspectives using different tools Some survey existing literature and theory then summarize prior work in a meaningful way Some discuss their own research some reflect on personal experiences that have demanded a flexible identity Also included in the coverage are discussions of methodology and validity issues for studies and scales of identity With its dual focus on research and applied fields ranging across social and personality psychology industrial occupational psychology cross cultural psychology mental health existential issues relationships and demographic categories Identity Flexibility During Adulthood Perspectives on Adult Development is a fascinating and complex resource for psychologists sociologists anthropologists gerontologists and all those interested in our changing identities **A Plague of Paradoxes** Philip Setel, 1999 Presents an extended case study of the 20th century AIDS epidemic and the cultural circumstances from which it emerged The book brings together anthropology demography and epidemiology to explain how the Chagga people of Tanzania in Africa experience AIDS Guru Nanak Journal of Sociology , 1999 *Landscapes and the Law* Gunnel Cederlöf, 2019-06-28 *Landscapes and the Law* is situated at the crossroads of environmental colonial and legal history It

examines the role of law in consolidating early colonial rule from the perspective of people's access to nature in forests and hill tracts. This major interdisciplinary study is thus concerned with the social history of legal processes and the making of law being as relevant today as it was when first published a decade ago. The book is focused equally on the multitude of colliding claims for access to land and resources and the complex ways in which customary rights are redefined and codified for the purpose of securing and legitimizing colonial sovereign rule. Basing her archival and field work on the Nilgiri Hills in South India, Gunnel Cederlöf explores conflicting perceptions of nature and political visions that are projected onto landscapes and people. She traces debates on property and land rights and how the empirical sciences merge with the legal claims justifying land acquisition. Popular resistance strategies to such exploitation are analysed and a cross-cultural comparison made between early legal processes and social history in India, New Zealand and North America.

**Quality of Life and Well-Being in an Indian Ethnic Community** Gareth Davey, 2018-05-03 This book explores the quality of life among Badagas, an ethnic minority group in South India, as they navigate a society in flux with specific reference to rural to urban migration and new media. At an empirical level, it reveals how Badagas understand themselves and the multifaceted changes in their culture and daily lives, exploring a pertinent concern at the forefront of debate about the future from a global perspective. The book draws attention to the fact that people are adopting flexible identities and lifestyles in an attempt to survive and thrive in a changing India and world, a new Indian-ness shaped at the local level. It offers a timely update on previous research on Badagas, which dates to the 1990s, and also serves as an important case study on people's experiences of the social and economic transformation of Indian society as they become accustomed to new ideas, products and ways of life. As such, it is a must-read for all those interested in quality of life in India and developing societies.

**Sociology and Social Anthropology in India** Yogesh Atal, 2009 The Indian Council of Social Science Research, the premier organization for social science research in India, conducts periodic surveys in the major disciplines of the social sciences to assess disciplinary developments as well as to identify gaps in research in these disciplines.

**The Journal of the Royal Anthropological Institute**, 2002 Articles on all aspects of anthropology.

**South Asia in Transition** Robert Parkin, 2020-05-19 South Asia in Transition is an introductory book on the anthropology of South Asia, including India, Pakistan, Nepal, Sri Lanka, and Bangladesh, suitable for students at all levels and others interested in this topic. It assumes no prior knowledge of either the region or the discipline of anthropology. The book makes extensive use of existing publications to describe how anthropologists have approached the region and what they have said about it. The first group of chapters deals mostly with India and caste, class, tribes, religion, kinship and marriage, gender, the body and personhood, politics and political economy. A second group of chapters deals successively with Pakistan, Sri Lanka, and Nepal.

**Demographic Perspectives on India's Tribes** Arup Maharatna, 2005 The book discusses India's aggregate tribal people from the standpoint of their district demographic patterns and behaviour, including migration among them.
