Invincible and Righteous Outlaw Minsoo Kang, 2018-12-31 One of the most important and popular premodern Korean novels The Story of Hong Gildong is a fast paced adventure story about the illegitimate son of a nobleman who becomes the leader of a band of honest outlaws who take from the rich and punish the corrupt Despite the importance of the work to Korean culture it is often described as the story of the Korean Robin Hood studies of the novel have been hindered by a number of myths namely that it was authored in the early sixteenth century by statesman Heo Gyun who wrote it not only in protest of Joseon dynasty laws on the rights of illegitimate children but also as a manifesto of his own radical political ideas In Invincible and Righteous Outlaw the first book length study of the novel in English Minsoo Kang reveals that The Story of Hong Gildong was most likely written by an anonymous mid nineteenth century writer whose primary concern was appealing to the increasing number of readers in the late Joseon looking to be entertained and that the myth of Heo's authorship can be traced to the writing of literary scholar Kim Taejun in the 1930s Following a detailed examination of the history and literary significance of the novel including analysis based on Eric Hobsbawm's work on the universal figure of the noble robber Kang surveys the many afterlives of the hero Hong Gildong who throughout the decades has appeared and reappeared in countless revisionist novels films television dramas and comics even inspiring the creation of a Hong Gildong theme park in South Korea He shows how the story was altered distorted and reinvigorated during and after the Japanese colonial period in both the North and the South for political social and literary purposes While demonstrating the continued relevance of the novel and its hero in Korean culture up to the present day Kang makes it clear that such narratives have served mostly to distance readers from a better understanding of this classic work

A History of Korea Michael J. Seth, 2010-10-16. In this comprehensive yet compact book, Michael J. Seth surveys Korean history from Neolithic times to the present. He explores the origins and development of Korean society, politics, and its still little known cultural heritage from their inception to the two Korean states of today. Telling the remarkable story of the origins and evolution of a society that borrowed and adopted from abroad, Seth describes how various tribal peoples in the peninsula came together to form one of the world's most distinctive communities. He shows how this ancient, culturally and ethnically homogeneous society was wrenched into the world of late nineteenth century imperialism, fell victim to Japanese expansionism, and then became arbitrarily divided into two opposed halves, North and South, after World War II. Tracing the past seven decades, the book explains how the two Koreas, with their deeply different political and social systems and geopolitical orientations, evolved into sharply contrasting societies. South Korea, after an unpromising start, became one of the few postcolonial developing states to enter the ranks of the first world with a globally competitive economy, a democratic political system, and a cosmopolitan and dynamic culture. North Korea, by contrast, became one of the world's most totalitarian and isolated societies, a nuclear power with an impoverished and famine-stricken population. Seth describes and analyzes the radically different and historically unprecedented trajectories of the two Koreas: formerly one tight-knit society. Throughout, he adds a rich dimension by placing Korean history into broader global perspective and by including primary readings from each era. All readers looking for a balanced, knowledgeable history will be richly rewarded.

King Chǒngjo, an Enlightened Despot in Early Modern Korea Christopher Lovins, 2019-03-25

The first detailed analysis in English of monarchy and governance in Korea during King Chǒngjo's reign. Were the countries of Europe the only ones that were early modern? Was Asia's early modernity cut short by colonialism? Scholars examining early modern Eurasia have not yet fully explored the relationships between absolute rule and political modernization in the highly contested early modern world. Using a comparative perspective that places Chǒngjo, king of Korea from 1776 to 1800, in context with other Korean kings and with contemporary Chinese and European rulers, Christopher Lovins examines the shifting balance of power in Korea in favor of the crown at the expense of the aristocracy during the early modern period. This book is the first to analyze in English the recently discovered collection of 297 private letters written by Chǒngjo himself. These letters were a vital channel of communication outside of official court historians' scrutiny since private meetings between the king and his ministers were forbidden by custom. Royal politics played out in an arena of subtle communication with court officials trying to read the king's unstated, elliptically hinted-at intentions and the king trying to suggest what he wanted done while maintaining plausible deniability. Through close analysis of both official records and private letters, including Chǒngjo's secret letters, Lovins shows that in contrast to previous assumptions, the late eighteenth-century Korean monarchs were not weak and ineffective but instead were in the process of building an absolutist polity.
