Kisho Kurokawa - From Metabolism to Symbiosis Kisho Kurokawa,1992-07-23 *Kisho Kurokawa* Kishō Kurokawa,1988

Kisho Kurokawa, Architect and Associates Kishō Kurokawa,2000 By combining the abstraction of the 20th century with the iconography of history and the cultural identity of topos in a cosmology of culture I am trying to tackle the philosophical challenge of Abstract Symbolism BOOK JACKET *Kisho Kurokawa, Architecture of Symbiosis* Kishō Kurokawa,1987 **The Philosophy of Symbiosis** Kishō Kurokawa,1994 **Kisho Kurokawa** Kisho Kurokawa,1995

Kisho Kurokawa Kishō Kurokawa,Dennis Sharp,Catherine Slessor,Tomio Ōhashi,1999 The completion of the first phase of Kuala Lumpur International Airport in 1998 resulted in two 4000 m runways and a 335 000 m² main terminal building The airport can handle 25 million passengers a year By 2020 however the airport will be able to handle 120 000 000 passengers a year It is not surprising that everyone should wonder why Malaysia would need an international airport of that size The reason is the intense strategic competition that has already started Unquestionably the world will have an entirely new high speed transportation system by 2025 at the latest This will be the HSST Hypersonic Speed Transport which will carry between 300 and 500 passengers at speeds up to Mach 3.5 The HSST will be meaningless for short routes Therefore the required international hub airports will be limited to two in North America one in Central and South America one in Africa two in Europe one in Russia and three in Asia Like China and South Korea Malaysia is very eager to obtain one of the three Asian international hub airports because a country with such an airport and the associated infrastructure is very likely to become a financial information tourism and advanced industrial centre The airport is an integral part of a future linear capital corridor which was also developed by Kurokawa The area surrounding the airport will be used for an experiment in artificially restoring the tropical rain forest Creating such a forest is the most effective method for blocking out noise from the airport This is the basis of the architect's concept for a symbiosis between airport and forest In addition the architect believes that this is effective for expressing the identity of Malaysia as tropical rain forests are the typical vegetation of the country Kurokawa was a key figure of Japanese Metabolism he has played an essential role in this movement not only through projects and buildings but also through theoretical writings Since then he has been one of the leading architects in Japan **Each One a Hero** Kishō Kurokawa,1997 The word symbiosis comes from the Greek term for living together referring to a relationship between two or more organisms that is not only advantageous but necessary to both Today as national boundaries give way to larger economic alliances increased discussion and interchange is imperative Kisho Kurokawa the noted Japanese architect and urban planner argues that symbiosis is the means to this end Symbiosis differs basically from concepts of harmony or peace because it encompasses both opposition and competition The author sees evidence everywhere that an increasingly symbiotic attitude is taking root around the world not only in shifts toward democracy and interreliance but in the growing emphasis on pluralism multiculturalism and especially ecology the symbiosis

of diverse species The book touches on the writer's areas of professional specialization architecture and urban planning but the philosophy of symbiosis which already boasts a substantial following among some of the world's most prominent political and business leaders concerns us all In addition to multiple issues of direct concern to the evolving relationship economic political and cultural between the West and Japan the second half of *Each One a Hero The Philosophy of Symbiosis* analyzes in detail the Asian Renaissance underway today A spotlight is thrown on Malaysia and the plan for a Multimedia Super Corridor or Eco Media City currently attracting global notice and investment BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Contemporary Japanese Architecture** James Steele, 2017-03-16

Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture *The Oxford Dictionary of Architecture* James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of *The Oxford Dictionary of Architecture* has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader *An Introduction to Architectural Theory* Harry Francis Mallgrave, David J.

Goodman, 2011-03-16 A sharp and lively text that covers issues in depth but not to the point that they become inaccessible to beginning students *An Introduction to Architectural Theory* is the first narrative history of this period charting the veritable

revolution in architectural thinking that has taken place as well as the implications of this intellectual upheaval The first comprehensive and critical history of architectural theory over the last fifty years surveys the intellectual history of architecture since 1968 including criticisms of high modernism the rise of postmodern and poststructural theory critical regionalism and tectonics Offers a comprehensive overview of the significant changes that architectural thinking has undergone in the past fifteen years Includes an analysis of where architecture stands and where it will likely move in the coming years Kisho Kurokawa Dennis Sharp,2002 Known as the Big Eye the Oita Stadium is one of the chosen venues for the next World Cup in 2002 It will be reused for the second stage of the Japan Inter Prefectural Athletic Competition in 2008 after the World Cup continuing to grow in the future to become a large scale all purpose sports park for Oita The whole site covers an area of 225 ha and has several facilities outside the main football stadium These include general fitness training and lodging centres a botanical pool two multipurpose athletic fields two rugby and soccer practise pitches a softball field tennis courts and other game areas The main stadium features an open track for athletic events as well as the football pitch It can also be used year round for public events aided by its retractable roof For soccer matches spectator seats are placed right up to the edge of the pitch to bring them close to the action To change over for track events a retractable seating system was developed The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world *Kishō Kurokawa* Kishō Kurokawa,Stephen Dobney,1995 THE MASTER ARCHITECT SERIES is a series of monographs on some of the greatest architects and architectural firms of our time Each monograph will contain 256 pages displaying several hundred color photographs drawings sketches and renderings Although primarily a pictorial essay the books will contain selected projects described in concise detail along with a critique or overview of the firm a resume of the partners and a comprehensive bibliography **Kisho Kurokawa Architects and Associates** Kishō Kurokawa,Kisho Kurokawa Architects and Associates,2001 This volume presents 23 of the architect s most important projects documenting his attempt to challenge the homogenized designs of the Machine Age and explore the concept of symbiotic architecture which is an architecture of regionalism open to dialogue with the rest of the world *Envisioning Architecture* Eugenio Morello,Barbara E. A. Piga,2013 Kisho Kurokawa's Symbiosis Philosophy and

His Architecture Chee Chew Kan,1998 **Architects Today** Kester Rattenbury,Robert Bevan,Kieran Long,2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings *The New Paradigm in Architecture* Charles Jencks,2002-01-01 This book explores the broad issue of Postmodernism and tells the story of the movement that has changed the face of architecture over the last forty years In this completely rewritten edition of his seminal work Charles Jencks brings the history of architecture up to date and shows how demands for a new and complex architecture aided by computer design have led to more convivial sensuous and articulate buildings around the world **Intercultural Architecture** Kisho Kurokawa,1991 The Philosophy of Symbiosis John C. H. Lim,1993
